*Review and Evaluation of Alternative Chemical Disposal Technologies* Panel on Review and Evaluation of Alternative Chemical Disposal Technologies, Commission on Engineering and Technical Systems, Division on Engineering and Physical Sciences, National Research Council, 1996-11-29 In 1994 the National Research Council published *Recommendations for the Disposal of Chemical Agents and Munitions* which assessed the status of various alternative destruction technologies in comparison to the Army s baseline incineration system The volume s main finding was that no alternative technology was preferable to incineration but that work should continue on the neutralization technologies under Army consideration In light of the fact that alternative technologies have evolved since the 1994 study this new volume evaluates five Army chosen alternatives to the baseline incineration system for the disposal of the bulk nerve and mustard agent stored in ton containers at Army sites located in Newport Indiana and Aberdeen Maryland respectively The committee assessed each technology by conducting site visits to the locations of the technology proponent companies and by meeting with state regulators and citizens of the affected areas This volume makes recommendations to the Army on which if any of

the five technologies has reached a level of maturity appropriate for consideration for pilot scale testing at the two affected sites

Risk Methodologies for Technological Legacies Dennis Bley, Vitaly A. Eremenko, 2012-12-06 The Cold War Era left the major participants the United States and the former Soviet Union FSU with large legacies in terms of both contamination and potential accidents Facility contamination and environmental degradation as well as the accident vulnerable facilities and equipment are a result of weapons development testing and production Although the countries face similar issues from similar activities important differences in waste management practices make the potential environmental and health risks of more immediate concern in the FSU and Eastern Europe In the West most nuclear and chemical waste is stored in known contained locations while in the East much of the equivalent material is unconfined contaminating the environment In the past decade the U S started to address and remediate these Cold War legacies Costs have been very high and the projected cost estimates for total cleanup are still increasing Currently in Russia the resources for starting such major activities continue to be unavailable

*Evaluation of Chemical Events at Army Chemical Agent Disposal Facilities* National Research Council, Division on Engineering and Physical Sciences, Board on Army Science and Technology, Committee on Evaluation of Chemical Events at Army Chemical Agent Disposal Facilities, 2002-12-25 For over a decade the Army has been carrying out a program aimed at the destruction of accumulated chemical weapons stored at several sites While destruction by incineration has been successful several incidents called chemical events occurred during the disposal process or decontamination activities that raised some public concerns about the safety of operations of three third generation incineration facilities As a result the Congress asked the NRC to investigate whether the incidents provide information useful to help ensure safe operation of the future sites This book presents an analysis of causes of and responses to past chemical events implications of such events for ongoing and future demilitarization activities and recommendations for preparing for future events
