*Perspectives on the New Economics and Regulation of Telecommunications* Institute for Research on Public Policy, 1996  
This volume is a compilation of papers reflecting many of the issues related to telecommunications that are being debated today and are likely to continue to be addressed in the next few years. The papers examine the ways in which economic and technological forces are changing the regulation of telecommunications and the characteristics of the industry itself. After an introduction on issues such as the information highway, industry consolidation, market integration, and constraints on new policies, the papers cover such topics as the changes in Canadian telecommunications and their economics, the role of telecommunications in productivity and competition, the business network concept as an alternative governance structure, competition policy, convergence of technologies, separation of infrastructure from services, European telecommunications policy, and the historical context in which Canada has handled earlier transformations of a technological nature. **US Intervention Policy and Army Innovation** Richard Lock-Pullan,2004-08-02 *US Intervention Policy and Army Innovation* examines how the US Army rebuilt itself after

the Vietnam War and how this has affected US intervention policy from the victory of the Gulf War to the failure of Somalia the Bosnian and Kosovo interventions and the use of force post 9 11 Richard Lock Pullan analyzes the changes in US military intervention strategy by examining two separate issues the nature of the US Army as it rebuilt itself after the Vietnam War and the attempts by the US to establish criteria for future military interventions He first argues that US strategy traditionally relied upon national mobilization to co ordinate political aims and military means he subsequently analyzes how this changed to a formula of establishing militarily achievable political objectives prior to the use of force Drawing on a vast body of material and on strategic culture and military innovation literature Lock Pullan demonstrates that the strategic lessons were a product of the rebuilding of the Army s identity as it became a professional all volunteer force and that the Army s new doctrine developed a new way of war for the nation embodied in the AirLand Battle doctrine which changed the approach to strategy This book finally gives a practical analysis of how the interventions in Panama and the Gulf War vindicated this approach and brought a revived confidence in the use of force while more recent campaigns in Somalia Kosovo and Bosnia exposed its weaknesses and the limiting nature of the Army s thinking The legacy of the Army s innovation is examined in the new strategic environment post 9 11 with the operations in Afghanistan and Iraq

Managing the Business Case for Sustainability Stefan Schaltegger, Marcus Wagner, 2017-09-08 The difficulties in moving towards corporate sustainability raise the question of how environmental and social management can be integrated better with economic business goals Over the last decade the relationship between environmental and economic performance and more recently the interaction between sustainability performance and business competitiveness have received considerable attention in both theory and practice However to date only partial aspects of the relationship between sustainability performance competitiveness and economic performance have been studied from a theoretical as well as an empirical perspective And to date no unique relationship has prevailed in empirical studies A number of explanations have been put forward to explain this including methodological reasons such as the lack of statistical data the low quality of that data or the fact that such data is often available for short time periods only Other theoretical explanations have been developed such as the influence of different corporate strategies or the relatively small influence of environmental or sustainability issues as one factor among many on the economic or financial success of firms So how should the business case for sustainability be managed This is the starting point for this book which compiles insights on a large number of aspects of the link between sustainability performance business competitiveness and economic success in an attempt to provide a comprehensive and structured view of this relationship The book provides an unrivalled body of knowledge on the state of theory and practice in this field and identifies prospective future fields of work The book includes conceptual frameworks for the interaction of social environmental and economic issues in business environments case studies of companies that have successfully integrated social environmental and economic issues analyses of the causal and empirical relationship between environmental and or social performance

business performance and firm level competitiveness concepts and tools useful for improving business value with proactive operational strategies assessment of the factors influencing operational sustainability strategies and their economic impact and comparisons of interactions between sustainability performance and firm competitiveness across industry sectors and countries Managing the Business Case for Sustainability is the definitive work in its field the most comprehensive book yet published on the theory and practice of managing sustainability performance competitiveness environmental social and economic performance in an integrated way It will be essential reading for managers academics consultants fund managers governments and government agencies NGOs and international bodies who need a broad and comprehensive overview of the business case for sustainability **The Scope for Inflation Targeting in Developing Countries** Mr.Paul R.

Masson,Mr.Miguel A. Savastano,Mr.Sunil Sharma,1997-10-01 Inflation targeting IT serves as monetary policy framework in several advanced economies where it has enhanced policy transparency and accountability The paper considers its wider applicability to developing countries The prerequisites for a successful IT framework are identified as an ability to carry out an independent monetary policy free of fiscal dominance or commitment to another nominal anchor like the exchange rate and a quantitative framework linking policy instruments to inflation These prerequisites are largely absent among developing countries though several of them could with some further institutional changes and an overriding commitment to low inflation make use of an IT framework
