Marines on the Beach Christopher Paul,2008-09-30 Paul explores both how and why U S military intervention decisions are made Pursuit of that inquiry requires the identification of decision participants thorough examination of the decision making processes they employ and recognition of several factors that influence intervention decisions the national interest legitimacy and the legacies of previous policies This book provides chapter length treatment of each of these issues The research is based on detailed historical case studies for the four U S Marines on the beach military interventions in Latin America since World War II The Dominican Republic 1965 Grenada 1983 Panama 1989 and Haiti 1994 Additional cases notably Afghanistan and Iraq enter the discussion when considering findings with broader implications Of the existing theories of governance that compete to explain government policy making Paul finds that elite theory provides the best general model for intervention decision making but that the notions of both pluralist and class theorists contribute to a complete explanation and sometimes in an unexpected way Findings also indicate considerable contribution from and constraint by institutional sources However far from finding that institutional factors are wholly deterministic this research offers support for a choice within constraints model Conclusions suggest that top decision makers especially the president enjoy wide latitude in framing the national interest and in choosing where to and where not to intervene

Liberalism Oren M. Levin-Waldman, 2010-11-23 Levin Waldman argues that if American public policy were to be evaluated against a different set of principles ones more closely aligned with core liberal values especially the common good liberalism would be in greater harmony with contemporary public opinion and thought Liberalism rests on a moral vision of what constitutes the good life and a set of principles that can measure whether public policy accords with society's underlying philosophical principles Levin Waldman faults modern liberalism for obscuring these principles through a misplaced reliance on neutrality Liberalism he contends appears to have diverged from mainstream perceptions of traditional American values because policy is debated and formulated within the confines of this neutrality standard Levin Waldman develops a new methodology intended to take us away from the usual cost benefit analysis and move us closer to assessing public policies in terms of what best serves the common good *International Relations Theory for the Twenty-First Century* Martin

Singapore this book examines the production of a set of institutionalized relationships and ethical meanings that link citizens to each other and the state It looks at how questions of culture and morality are resolved and how state society relations are established that render paradoxes and inequalities acceptable and form the basis of a national political culture The Singapore government has put in place a number of policies to encourage marriage and boost fertility that has attracted much attention and are often taken as evidence that the Singapore state is a social engineer The book argues that these policies have largely failed to reverse demographic trends and reveals that the effects of the policies are far more interesting and significant As
