The Revolt Against Reason Arnold Lunn, 1971 *The Revolt Against Reason* Sir Arnold Henry Moore Lunn, 1951

Radicalism and the Revolt Against Reason Irving Louis Horowitz, 1961 **Revolt Against Modernity** Ted V.

McAllister, 1996 Provides the first comparison of the thought of these two political philosophers and its influence on contemporary American conservatism **In Praise of Idleness** Bertrand Russell, 2020-08-26

Intolerance and bigotry lie at the heart of all human suffering So claims Bertrand Russell at the outset of *In Praise of Idleness* a collection of essays in which he espouses the virtues of cool reflection and free enquiry a voice of calm in a world of maddening unreason From a devastating critique of the ancestry of fascism to a vehement defence of useless knowledge with consideration given to everything from insect pests to the human soul this is a tour de force that only Bertrand Russell could perform **The**

Problem of Atheism Augusto Del Noce, 2022-01-05 In 1964 Augusto Del Noce assembled in a book some of his best works on Marxism atheism and the history of modern philosophy The result was *Il problema dell'ateismo* which he always regarded as foundational to his way of thinking The book remains his best known work and is still in print in Italy almost sixty years later *The Problem of Atheism* offers the first English translation of this landmark book one of the earliest works to recognize the new secularizing trends in Western culture following World War II Del Noce situates atheism historically reconstructing its philosophical trajectory through European modernity Documenting the author's entire intellectual experience these essays explore the birth of modern philosophy reckon with the great European crisis of 1917 to 1945 and the Cold War that followed and mine the opposition between Marxism and the rise of the affluent society The result is rich with premonitions of the cultural landscape that would take shape throughout the 1960s and the decades that followed Proving its English translation to be long overdue *The Problem of Atheism* remains relevant to contemporary debates about secularization political theology and modernity **Margins of Disorder** Gal Gerson, 2004-08-06

Traces how progressive liberals in Edwardian Britain responded to contemporary intellectual trends The Real is Not the Rational Joan

Stambaugh, 1986-01-01 What is real What is man Beginning with these two fundamental questions *The Real is not the Rational* searches back into the history of philosophy for the development of these issues It presents selected key stages in the history of the rationalist tradition indicating the direction in which rationalism sought what is real The role of non rationalist tendencies within rationalism and the shift to an emphasis on the irrational in the nineteenth century are also examined The study seeks alternatives to the rational irrational dilemma alternatives found in Heidegger who takes the non rational seriously It also looks for alternatives in Buddhism which dissolves the dichotomy between the rational and the irrational since its prime concern was never with reason but has always been soteriological **Contemporary Debates in**

Islam NA NA, 2016-04-30 Also available in paperback as *Modernist and Fundamentalist Debates in Islam* During the second half of the nineteenth century a group of prominent Muslim theologians began to critically examine classical conceptions and

methods of jurisprudence and devised a new approach to Islamic theology This new approach was nothing short of an outright rebellion against Islamic orthodoxy displaying an astonishing compatibility with nineteenth century Enlightenment era thought In the 20th century this modernist movement declined to be replaced by another cultural episode characterized by the growing power of Islamic fundamentalism This volume looks at these two very different approaches to Islam The editors have selected the most prominent Islamic thinkers of modernist and fundamentalist viewpoints diverse nationalities and from both the late decades of the nineteenth century and the early decades of the 20th century The writers discuss their own views with regard to such issues as philosophical and political perceptions of democracy the state the history of Islam women s rights personal lifestyle education and the West

Modernist and Fundamentalist Debates in Islam M. Moaddel, K. Talattof, 2016-04-30 With resurgent interest in the Muslim world and in particular political Islam this collection of translated essays by major Muslim thinkers from the Middle East and South Asia demonstrates the ongoing and contentious debate between modernizers seeking to adapt Western ways and fundamentalists who rejected them From Jamal al Din al Afghani in the nineteenth century to Ayatollah Khomeini in the twentieth the selections provide an opportunity to examine a diversity of Muslim thinkers thoughts on important topics like jurisprudence politics relations with the west and women in their own words

The Cultural Politics of Analytic Philosophy Thomas L. Akehurst, 2011-10-20 The Cultural Politics of Analytic Philosophy examines three generations of analytic philosophers who between them founded the modern discipline of analytic philosophy in Britain The book explores how philosophers such as Bertrand Russell A J Ayer Gilbert Ryle and Isaiah Berlin believed in a link between German aggression in the twentieth century and the nineteenth century philosophy of Hegel and Nietzsche Thomas L Akehurst thus identifies in this political critique of continental philosophy the origins of the hugely significant faultline between analytic and continental thought an aspect of twentieth century philosophy that is still poorly understood The book also uncovers a tripartite alliance in British analytic philosophy between nation political virtue and philosophical method In revealing this structure behind the assumptions of certain analytical thinkers Akehurst challenges the conventional wisdom that sees analytic philosophy as a semi detached narrowly academic pursuit On the contrary this important book suggests that the analytic philosophers were espousing a national philosophy one they believed operated in harmony with British thinking and the British values of liberty and tolerance

Reading 1922 Michael North, 2001-12-20 This engaging study returns to a truly remarkable year the year in which both Ulysses and The Waste Land were published in which The Great Gatsby was set and during which the

Fascisti took over in Italy the Irish Free State was born the Harlem Renaissance reached its peak Charlie Chaplin's popularity crested and King Tutankhamen's tomb was discovered In short the year which not only in hindsight became the primal scene of literary modernism but which served as the cradle for a host of major political and aesthetic transformations resonating around the globe In his previous study the acclaimed *Dialect of Modernism* OUP 1994 Michael North looked at the racial and linguistic struggles over the English language which gave birth to the many strains of modernism Here he expands his vision to encompass the global stage and tells the story of how books changed the future of the world as we know it in one unforgettable year

Foundations of New Socialism Robert Corfe, 2001 How can sincere support be given wholly to a political party unless it has clear principles underpinning its base Such a question is of particular relevance when asked of the Labour party in view of the events which have shattered the foundations of socialism worldwide over the past decade The author who has considerable practical experience as a Labour party activist sets out to re-establish the concept of socialism as a vision for the future But the forward looking views of New Socialism need to be very different from the old The transformation of society over the past 60 years means that old doctrines have to be replaced by new if socialism is to be made attractive to the modern man or woman

Egalitarianism Robert Corfe, 2008-02-04 In view of the recent transformation of society in the industrialised world a new sociological significance is given to the meaning of high culture property in its different forms and freedom through democracy

Basics of Perception in Architecture Jörg Kurt Grütter, 2020-10-14 This book makes the extremely complex process of architectural perception far more transparent and thus contributes to a better understanding of our built environment Why is there so much debate about the appearance of our built environment about the aesthetics of architecture today Why do opinions about the aesthetic quality of buildings often diverge extremely even among experts Why can't we agree on architecture on what is beautiful and what is not Most areas of construction such as statics and building physics are measurable and can therefore be substantiated with objective arguments Yet this does not apply to the unquantifiable aesthetics of architecture Accordingly judgments on aesthetics are always subject specific and strongly dependent on the viewer Nevertheless the aesthetics of architecture is not just a matter of taste Many relationships between buildings as objects and viewers as subjects can be determined objectively with the help of perceptual psychology and information theory as this book demonstrates
