The Metamorphosis of Leadership in a Democratic Mexico Roderic Ai Camp, 2010-11-04 The Metamorphosis of Leadership in a Democratic Mexico is a broad analysis of Mexico s changing leadership over the past eight decades stretching from its pre democratic era 1935 1988 to its democratic transition 1988 2000 to its democratic period 2000 the present In it Roderic Camp one of the most distinguished scholars of Mexican politics seeks to answer two questions 1 how has Mexican political leadership evolved since the 1930s and in what ways beyond ideology has the shift from a semi authoritarian one party system to a democratic electoral system altered the country s leadership and 2 which aspects of Mexican leadership have been most affected by this shift in political models and when and why did the changes in leadership occur Rather than viewing Mexico s current government as a true democracy Camp sees it as undergoing a process of consolidation under which the competitive electoral process has resulted in a system of governing institutions supported by the majority of citizens and significant strides toward plurality Accordingly he looks at the relationship between the decentralization of political power and the changing characteristics experiences and paths to power of national leaders The book which represents four decades of Camp s work is based upon a detailed study of 3000 politicians from the 1930s through the present incorporating regional media accounts and Camp s own interviews with Mexican presidents cabinet members assistant secretaries senators governors and party presidents **North Africa (RLE Economy of the Middle East)** Richard Lawless, Allan Findlay, 2015-05-15 This book covers the contemporary politics and economic development of the four countries of North Africa Morocco Algeria Tunisia and Libya The first part is devoted to contemporary politics and political systems in each of these countries It traces their political development since independence with the emphasis on the

last ten to fifteen years The second part concentrates on economic developments in each of the four countries A separate chapter on each state provides a comprehensive analysis of the economic strategies adopted since independence They discuss the impact of the planning strategies on the structure of the national economies and the social consequences resulting from these economic policies notably in the field of employment and income distribution First published in 1984

Electoral Politics in the Middle East Jacob M. Landau, Ergun Özbudun, Frank Tachau, 2015-07-24 Comparative political study of the Middle East got off to a late start Unlike any previous studies in comparative politics this book first published in 1980 represents an important methodological advance in that it proceeds by themes rather than by countries and uniquely focuses on three major aspects of electoral politics in three contemporary Middle Eastern states The three countries Turkey Lebanon and Israel are chosen because they are the only Middle Eastern countries with a tradition of free elections On the other hand they also display certain characteristics found in other non competitive Middle Eastern political systems such as the role and prominence of religion The study is based on extensive original research and presents the first comparative treatment of electoral issues voting behaviour and parliamentary elites emphasising the context of rapid socio economic change a theme particularly pertinent to those countries with their tradition of free elections The variety of political behaviour within the countries concerned coupled with the prevailing complexities resulting from disparities in language and cultural inheritance makes the comparative approach particularly revealing The attitudes and behaviour of the voters can be seen to be at least as important as the laws and mechanisms involved

Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29 Why the world's most resilient dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure Algeria and the Cold War Mohammed

Lakhdar Ghetta, 2017-11-24 Throughout the Cold War Africa was a theatre for superpower rivalry That the U S and the Soviet Union used countries in Sub Saharan Africa to their own advantage is well known Sub Saharan countries also exploited Cold War hostilities in turn But what role did countries in North Africa play This book offers an international history of U S Algerian relations at the height of the Cold War The Algerian president Houari Boumediene actively adjusted Algeria s foreign policy to promote the country s national development pursuing its own commitment to non alignment and Third World leadership Algeria s foreign policy was directly opposed to that of the U S on major issues such as the Arab Israeli conflict and Western Sahara conflict and the Algerian government was avowedly socialist Yet as this book outlines Algeria was able to negotiate a position for itself between the U S and the Soviet bloc winning support from both and becoming a key actor in international affairs Based on materials from recently opened archives this book sheds new light on the importance of Boumediene s era in Algeria and will be an essential resource for historians and political scientists alike *Newsletter* United States. Department of State, 1970 **The Paradox of Plenty** Terry Lynn Karl, 1997-10-10 The Paradox of Plenty explains why in the midst of two massive oil booms in the 1970s oil exporting governments as different as Venezuela Iran Nigeria Algeria and Indonesia chose common development paths and suffered similarly disappointing outcomes Meticulously documented and theoretically innovative this book illuminates the manifold factors economic political and social that determine the nature of the oil state from the coherence of public bureaucracies to the degree of centralization to patterns of policy making Karl contends that oil countries while seemingly disparate are characterized by similar social classes and patterns of collective action In these countries dependence on petroleum leads to disproportionate fiscal reliance on petrodollars and public spending at the expense of statecraft Oil booms which create the illusion of prosperity and development actually destabilize regimes by reinforcing oil based interests and further weakening state capacity Karl s incisive investigation unites structural and choice based approaches by illuminating how decisions of policymakers are embedded in institutions interacting with domestic and international markets This approach which Karl dubs structured contingency uses a state s leading sector as the starting point for identifying a range of decision making choices and ends by examining the dynamics of the state itself **Constitution of Nations - Africa** A.J.
