Revolution In World Politics:

Revolution and World Politics Fred Halliday, 1999-08-23 The relation of revolutions to international relations is central to modern history. Revolutions have as much as war or nationalism shaped the development of world politics. Equally, revolutions have been in cause, ideology and consequence international events. By putting the international politics of revolution centre stage, Fred Halliday's book makes a major contribution to the understanding of both revolution and world politics.

The Revolution in World Politics Morton A. Kaplan, 1962 Revolution and International Politics Peter Calvert, 1996 Presenting an analysis of the role of revolution in international politics, this edition takes account of developments since the first edition was published in 1984, such as the dramatic changes in Eastern Europe and the Soviet Union between 1989 and 1991, and the re-evaluation by a number of scholars of the French Revolution. This is followed by various revisionist studies of revolution itself. The book incorporates recent work in the field which calls for some significant changes of emphasis in order to understand the nature of international politics today. International relations as a discipline has moved away from state-centred theory; the new emphasis is on globalization, interdependence and the importance of non-state actors.

The Revolution in World Politics Morton A. Kaplan, 1962 *The Revolution in World Politics* K. S. Spiegler, 1962 Revolution and International Politics Peter Calvert, 2016 This book aims to present an analysis of the role of revolution in international politics. Concerning itself with the time frame from the French Revolution up to the fall of the Iron Curtain, this book covers the study of revolution itself, the importance of globalisation, interdependence and non-state actors, and the change in the nature of international politics theory. World Politics Jeffrey Haynes, Peter Hough, Shahin Malik, Lloyd Pettiford, 2013-09-13 From the war on terror to the global financial crisis, traditional concepts of world politics are being challenged on a daily basis. In these uncertain times, the study of international relations and the forces that shape them have never been more important. Written specifically for students who are approaching this subject for the first time, *World Politics* is the most accessible, coherent and up-to-date account of the field available. It covers the historical backdrop to today's political situations, the complex interactions of states and non-state actors, the role of political economy, human security in all its forms, and the ways in which culture, religion and identity influence events. *World Politics* takes a new approach that challenges traditional interpretations and will equip students with the knowledge and the confidence needed to tackle the big issues.

Political Islam, World Politics and Europe Bassam Tibi, 2014-07-11 The new and updated edition of *Political Islam, World Politics and Europe* focusses on the shift within political Islam in light of 9/11 and the events of the Arab Spring, from a jihadist struggle to institutional Islamism. Refuting what has often been referred to by commentators as the moderation of Islamism, the second edition of this book introduces the concept of institutional Islamism, a process which Tibi argues was accelerated in the aftermath of the Arab Spring. Both jihadist and institutional Islamism pursue the same goal of an Islamist state but disagree fundamentally on the strategy for achieving it. Whilst

ji-hadism is committed to the idea of a violent Islamic world revolution institutional Islamism embraces political institutions as a means to an end Turning to the events of the Arab Spring in Tunisia Libya and Egypt this book attempts to determine whether an abandonment of violence is enough to underpin a shift to genuine democracy Analysing the fall of Morsi in particular Tibi questions what lessons can be learnt from his presidency and argues that this event will not change the overall trend of development from ji-hadism to institutional Islamism A timely addition to existing literature this book will be of interest to students and scholars studying Middle Eastern and European Politics Political Islam and International Relations

The Revolution in World Politics. Morton A. Kaplan Morton A.. Kaplan,1962 *The Far-Right in World Politics* Alexander Anievas,Richard Saull,2024-11-01 This book addresses the reasons why the contemporary far right has gained political resonance in a variety of states across both the Global North and South The rise of far right forms of politics in recent years throughout a range of geopolitical locales suggests the emergence of a distinct conjuncture in world politics indicating a common set of enabling conditions and characteristics It is this unprecedented context in the history of the post war liberal international order that this edited volume aims to address In doing so it brings together a diverse range of scholars many of whom have developed an internationally recognized expertise in the study of the far right and International Relations IR Reflecting a plurality of methodological and theoretical perspectives the chapters cover a variety of theoretical and conceptual issues including analyses of different geopolitical and national expressions of the contemporary far right Notwithstanding such diversity the primary analytical focus of the book is to situate and explain the far right as a distinct part of the history of modern international relations especially with respect to the development of and crises within the contemporary international order From this perspective the contributions combine to demonstrate the deeply embedded symptoms of far right politics centred on racialized imaginaries across the globe and re produced within the sinews of an evolving liberal international order even as the far right also represents an antagonism to some elements of said order Providing a much needed global perspective this book will be of great interest to students and scholars of populism far right politics conservatism and international relations The chapters in this book were originally published as a special issue of Globalizations and are accompanied by a new epilogue

Revolution and World Order David Armstrong,1993-06-10 In this important study David Armstrong examines the impact of revolutionary states on the international system These states have always posed major problems for the achievement of world order revolution is often accompanied by international as well as civil conflict while revolutionary doctrines have proven to be highly disruptive of the existing structure of international politics Dr Armstrong asks whether revolutionary states are socialized into adopting acceptable patterns of international behaviour or whether it is international society that is forced to change when these new states appear He looks in detail at the French American and Russian revolutions and at several post 1945 revolutionary states he also examines the relationship between revolutionary states and the principal ordering devices of international society international law

diplomacy and the balance of power His book is a major contribution to international relations and an important development and application of the international society concept *Islam in Global Politics* Bassam Tibi,2012-03-12 Reaching beyond traditionally politicised scholarship to provide a unique perspective on the place of religion and culture in global and local politics this book examines the impact of Islam on civilizational relations between different groups and polities Bassam Tibi takes a highly original approach to the topic of religion in world politics exploring the place of Islam in society and its frequent distortion in world politics to the more radical Islamism Looking at how this becomes an immediate source of tension and conflict between the secular and the religious Tibi rejects the clash of civilizations theory and argues for the revival of Islamic humanism to help bridge the gap Chapters expand on inter civilizational conflict in global politics dialogue between religious and secular East and West western concepts of Islamism euro Islam and the Islamic diaspora in Europe Islamic humanism as a tool for bridging civilizations Shedding new light on the highly topical subject of Islam in politics and society this book is an essential read for scholars and students of international politics Islamic studies and conflict resolution

the realm of foreign policy In Neoclassical Realist Theory of International Relations Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that neoclassical realism is far more than an extension of Waltz s structural realism or an effort to update the classical realism of Hans Morgenthau E H Carr and Henry Kissinger with the language of modern social science Rejecting the artificial distinction that Waltz draws between theories of international politics and theories of foreign policy the authors contend neoclassical realism can explain and predict phenomena ranging from short term crisis behavior to foreign policy to patterns of grand strategic adjustment by individual states up to long term patterns of international outcomes It is therefore a more powerful theory of international politics than structural realism Yet it is also a more intuitively satisfying approach than liberal Innenpolitik theories or constructivism The authors detail the variables and assumptions of neoclassical realist theory address various aspects of theory construction and methodology lay out the areas of convergence and sharp disagreement with other leading theoretical approaches liberalism constructivism analytic eclecticism and foreign policy analysis FPA and demonstrate how neoclassical realist theory can be used to resolve longstanding puzzles and debates in international relations theory

Goldstone, Leonid Grinin, Andrey Korotayev, 2022-05-19 The 21st century has witnessed a considerable and increasing number of political revolutions around the world This contradicts the popular belief of many experts in the 1970s that revolutions occurred mainly in monarchies and empires Instead the revolutions of this century have several new characteristics which call for a renewed analysis of the subject This handbook offers a comparative perspective on the new wave of revolutions of the last decade Presenting case studies on the color revolutions the Arab revolutions of 2010 2011 and the global wave of revolutions in 2013 2018 that spanned regions ranging from Africa to the Caucasus it offers a better understanding of the varied forms features and historical backgrounds of revolutions as well as their causes Accordingly it highlights recent revolutions in their historical and world systems contexts The handbook is divided into seven parts the first of which examines the history of views on revolution and important aspects of the theory of revolution The second part analyzes revolutions within long term historical trends and in their world system contexts In turn the third part explores specific major revolutionary waves in history The fourth part analyzes the first revolutionary wave of the 21st century 2000 2009 the so called color revolutions while the fifth discusses the second wave the Arab Spring 2010 2013 as an important turning point The sixth part is dedicated to analyzing revolutions and revolutionary movements beyond the Arab Spring and some revolutionary events from the third wave that began in 2018 The seventh and final part offers forecasts on the future of revolutions Given its scope the book will appeal to scholars and students from various disciplines interested in historical trends sociopolitical change contentious politics social movements and revolutionary processes involving both nonviolent campaigns and political violence Once again this volume demonstrates the kind of open minded systematic analysis that the field of revolutionary studies

Counterfactual Thought Experiments in World Politics Philip E. Tetlock,Aaron Belkin,1996-09-08

Political scientists often ask themselves what might have been if history had unfolded differently if Stalin had been ousted as General Party Secretary or if the United States had not dropped the bomb on Japan Although scholars sometimes scoff at applying hypothetical reasoning to world politics the contributors to this volume including James Fearon Richard Lebow Margaret Levi Bruce Russett and Barry Weingast find such counterfactual conjectures not only useful but necessary for drawing causal inferences from historical data Given the importance of counterfactuals it is perhaps surprising that we lack standards for evaluating them To fill this gap Philip Tetlock and Aaron Belkin propose a set of criteria for distinguishing plausible from implausible counterfactual conjectures across a wide range of applications The contributors to this volume make use of these and other criteria to evaluate counterfactuals that emerge in diverse methodological contexts including comparative case studies game theory and statistical analysis Taken together these essays go a long way toward establishing a more nuanced and rigorous framework for assessing counterfactual arguments about world politics in particular and about the social sciences more broadly
