*A New Testament commentary for English readers, by various writers, ed. by C.J. Ellicott* Charles John Ellicott, 1896

Military Neuroscience and the Coming Age of Neurowarfare Armin Krishnan, 2016-10-04 Krishnan describes military applications of neuroscience research and emerging neurotechnology with relevance to the conduct of armed conflict and law enforcement This work builds upon literature by scholars such as Moreno and Giordano and fills an existing gap not only in terms of reviewing available and future neurotechnologies and relevant applications but by discussing how the military pursuit of these technologies fits into the overall strategic context The first to sketch future neurowarfare by looking at its potentials as well as its inherent limitations this book's main theme is how military neuroscience will enhance and possibly transform both classical psychological operations and cyber warfare Its core argument is that nonlethal strategies and tactics could become central to warfare in the first half of the twenty first century This creates both humanitarian opportunities in making war less bloody and burdensome as well as some unprecedented threats and dangers in terms of preserving freedom of thought and will in a coming age where minds can be manipulated with great precision The Coming Age of Scarcity Michael N. Dobkowski, Isidor Wallimann, 1998-03-01 Michael Dobkowski and Isidor Walliman have edited a book that although ominous is not a fatalistic look at the future The Coming Age of Scarcity lays out the perils of not recognizing the reality of genocide or of acknowledging the full implications of warfare Showing how scarcity and surplus populations can lead to disaster The Coming Age of Scarcity is about evil It tells of ethnic cleansing and excavates the world's expanding killing fields The writers in this volume are all too aware that the future suggests that present day population growth land resources energy consumption and per capita consumption cannot be sustained without leading to greater catastrophes The essays in this volume ask What is the solution in the face of mass death and genocide As philosopher John K Roth says in the Foreword The essays can sensitize us against despair and indifference because history shows that human made mass death and genocide are not inevitable and no events related to them will ever be A New Testament commentary for English readers, by various writers, ed. by C.J. Ellicott Charles John Ellicott (bp. of Gloucester), 1884 *The New York Times Book Review Index, 1896-1970: Subject index*, 1973 The Lost Chance in China and the Rise of Cold War Populism Stephen J. Hartnett, 2025-10-01 The Lost Chance in China and the Rise of Cold War Populism offers a rollicking retelling of the fate of America's diplomats stationed in China during World War II and the start of the Chinese Civil War documenting how their efforts to find peace in China clashed with the anti Communist network of right wing advocates known as the China Lobby Fueled by America's end of the war fury over the loss of China to Mao and the Communists the on the ground experts in Asia lost the public relations battle to Cold War populists who pushed a toxic version of public anger that built the rhetorical foundation of McCarthyism Hartnett diagnoses the moment's political battles by mapping a series of interlocking dispositions emotion based reactions that short circuited critical thinking and empathy instead feeding strident anti Communism

xenophobia and class based resentments Hartnett's masterwork offers a haunting prehistory to our contemporary moment when populism again stokes outrage and fear at the cost of nuanced international understanding      *Encyclopedia of Political Theory* Mark Bevir, 2010-03-18 How do we arrange our collective affairs Why do we live together in the ways we do How ought we to live together All humans think about the world they live in its history and future and the ideals by which they want to live in relation to others How we think today decisively influences the world of tomorrow This encyclopedia attempts to bring greater clarity and understanding to political debate Drawing together a team of international scholars the Encyclopedia of Political Theory examines the ideas of the major political theorists from before Plato to our own times the main schools of political thought the concepts and issues that have captured the imagination and attention of political theorists and some of the main institutions and practices inspired by political thought With more than 450 entries these three volumes provide a quick one stop source to key topics in the field Key Features Examines the global landscape of all the key theories and the theorists behind them Includes specific lists of entries that deal with constitutional thought and democratic thought Refers to distinctive norms and features of various governments legal systems and societies Devotes large parts to the history of ideas about government ethics and society Provides a chronology of political theory to help readers see how a given theorist school or issue fits into the bigger historical picture Key Themes Ancient Thought Applied Ethics Biographies Comparative Theory Constitutional Thought Critical Theory Democratic Thought Early Modern Thought International Theory Justice Liberal Theory Medieval Thought Modern Theory Power and Authority Religious Thought Self and Community This work is designed to serve as a reference source for anyone interested in the roots of contemporary political theory It will be a welcome addition to any academic or public library      *Insurgency and Counterinsurgency* Jeremy Black, 2016-07-29 This timely book offers a world history of insurgencies and of counterinsurgency warfare Jeremy Black moves beyond the conventional Western centric narrative arguing that it is crucial to ground contemporary experiences in Afghanistan and Iraq in a global framework Unlike other studies that begin with the American and French revolutions this book reaches back to antiquity to trace the pre modern origins of war within states Interweaving thematic and chronological narratives Black probes the enduring linkages between beliefs events and people on the one hand and changes over time on the other hand He shows the extent to which power politics technologies and ideologies have evolved creating new parameters and paradigms that have framed both governmental and public views Tracing insurgencies ranging from China to Africa to Latin America Black highlights the widely differing military and political dimensions of each conflict He weighs how and why lessons were learned or rather asserted in both insurgency and counterinsurgency warfare At every stage he considers lessons learned by contemporaries the ways in which norms developed within militaries and societies and their impact on doctrine and policy His sweeping study of insurrectionary warfare and its counterinsurgency counterpart will be essential reading for all students of military history      **Golden Age** ,1922      **The Sentient Machine** Amir Husain, 2017-11-21 A

must read for anyone looking to understand how artificial intelligence is poised to transform human society and life Paul Scharre Author of *Four Battlegrounds Power in the Age of Artificial Intelligence* The future is now Acclaimed technologist and inventor Amir Husain explains how we can live amidst the coming age of sentient machines and artificial intelligence and not only survive but thrive Artificial machine intelligence is playing an ever greater role in our society We are already using cruise control in our cars automatic checkout at the drugstore and are unable to live without our smartphones The discussion around AI is polarized people think either machines will solve all problems for everyone or they will lead us down a dark dystopian path into total human irrelevance Regardless of what you believe the idea that we might bring forth intelligent creation can be intrinsically frightening But what if our greatest role as humans so far is that of creators Amir Husain a brilliant inventor and computer scientist argues that we are on the cusp of writing our next and greatest creation myth It is the dawn of a new form of intellectual diversity one that we need to embrace in order to advance the state of the art in many critical fields including security resource management finance and energy In *The Sentient Machine* Husain prepares us for a brighter future not with hyperbole about right and wrong but with serious arguments about risk and potential Dr Greg Hyslop Chief Technology Officer The Boeing Company He addresses broad existential questions surrounding the coming of AI Why are we valuable What can we create in this world How are we intelligent What constitutes progress for us And how might we fail to progress Husain boils down complex computer science and AI concepts into clear plainspoken language and draws from a wide variety of cultural and historical references to illustrate his points Ultimately Husain challenges many of our societal norms and upends assumptions we hold about the good life

**People's War** Thomas A Marks, Paul Rich, 2019-12-18

Far from being an anachronism much less a kit bag of techniques people's war raises what has always been present in military history irregular warfare and fuses it symbiotically with what has likewise always been present politically rebellion and the effort to seize power The result is a strategic approach for waging revolutionary warfare the effort to make a revolution Voluntarism is wedded to the exploitation of structural contradiction through the building of a new world to challenge the existing world through formation of a counterstate within the state in order ultimately to destroy and supplant the latter This is a process of far greater moment than implied by the label guerrilla warfare so often applied to what Mao and others were about This volume deals with the continuing importance of Maoist and post Maoist concepts of people's war Drawing on a range of examples that include Peru Colombia Bolivia the Caucasus and Afghanistan the collection shows that the study of people's war is not just an historical curiosity but vital to the understanding of contemporary insurgent and terrorist movements The chapters in this book were originally published as a special issue of *Small Wars Insurgencies*

*The Oxford Handbook of the History of Communism* S. A. Smith, 2014-01-09 The impact of Communism on the twentieth century was massive equal to that of the two world wars Until the fall of the Soviet Union in 1991 historians knew relatively little about the secretive world of communist states and parties Since then the opening of state party and diplomatic archives

of the former Eastern Bloc has released a flood of new documentation The thirty five essays in this Handbook written by an international team of scholars draw on this new material to offer a global history of communism in the twentieth century In contrast to many histories that concentrate on the Soviet Union The Oxford Handbook of the History of Communism is genuinely global in its coverage paying particular attention to the Chinese Revolution It is global too in the sense that the essays seek to integrate history from above and from below to trace the complex mediations between state and society and to explore the social and cultural as well as the political and economic realities that shaped the lives of citizens fated to live under communist rule The essays reflect on the similarities and differences between communist states in order to situate them in their socio political and cultural contexts and to capture their changing nature over time Where appropriate they also reflect on how the fortunes of international communism were shaped by the wider economic political and cultural forces of the capitalist world The Handbook provides an informative introduction for those new to the field and a comprehensive overview of the current state of scholarship for those seeking to deepen their understanding

*The Age of Battles* Russell F. Weigley, 2004-04-28 One of the most interesting important and ambitious books about the conduct and perhaps the ultimate futility of war Gunther E Rothenberg A highly scholarly and wonderfully absorbing study John Bayley The London Review of Books What Russell F Weigley writes the rest of us read The Age of Battles is a persuasive reminder that even in the age of rational warfare one can honestly wonder why war seemed an unavoidable policy choice Allan R Millett The Journal of American History

Drones and the Annihilation-Image in Contemporary Warfare Gabriel F. Caetano, 2024-10-26 This book analyses the entanglement between Washington and Hollywood to shed light on the violence inherent in the image as a semiotic material agent in contemporary warfare In the 21st century the weaponized military drone an image centered machine has spearheaded the geopolitical curatorship of the USA in the context of the war on terror Drone violence shares the same characteristics as cinema image and movement However a drone s image is not purely a reflection of the nature of war it is more than representational it is performative Building upon the concept of annihilation image this book argues that the image wields a destructive agency as it transitions from reflection to diffraction Rather than mirroring reality the annihilation image creates a brutal pattern of difference in the world It is a destructive ontology in which seeing and annihilating are in a state of superposition Therefore everything that is framed is potentially dead That is to say by framing bodies and objects in the terrain a state of superpositional violence is created in which one is alive but virtually dead

**The Coming Age of Imagination** Phil Teer, 2020-02-06 Every adult paid a living wage No strings attached Universal basic income is a very old idea that is fast becoming the radical idea of the twenty first century It could eradicate poverty and avoid a much predicted dystopian future of automation and high unemployment but it could also have an unexpected effect an explosion of mass creativity Phil Teer draws insights from the creative and entrepreneurial effects of basic income experiments and weaves them into stories of how the Romantic poets invented consumerism artists regenerated cities like

New York Glasgow and Berlin and creative geniuses like David Bowie Bob Dylan Kurt Vonnegut Haruki Murakami and many others liberated their creative spirits and transformed their lives The Coming Age of Imagination is a creative manifesto for universal basic income When we no longer have to worry about money we have the opportunity to be creative on a mass scale Simply put basic income changes everything AI, Automation, and War Anthony King, 2025-08-19 Why AI will not replace human strategic judgement in war Is AI about to automate war Will autonomous drone swarms and killer robots controlled by AI dominate the battlespace and determine the winner In AI Automation and War Anthony King debunks this science fiction tinged narrative of AI's military potential exploring instead the actual applications of AI by the armed forces over the last decade He finds that AI is not going to replace human commanders and combatants the machines are not about to take over Rather the military has used and will continue to use AI to process data at a scale and speed that exceeds the capacity of humans AI will be used primarily to improve military understanding and intelligence King explains that military commanders enabled by the data processing power of AI will be able to see the battlespace at a previously unattainable depth fidelity and speed AI will help the armed forces plan target and conduct cyber operations faster and more effectively In order to harness AI in this way however a radical organisational transformation is taking place The armed forces are integrating civilian technologists into operational headquarters to work alongside military staff This partnership between the armed forces and the technology sector signals the emergence of a military tech complex that promises to be as powerful in this century as the military industrial complex was in the last **History**, 1917 *Beyond Ukraine* Tim Sweijs, Jeffrey H. Michaels, 2024-04-02 War in the 21st century will remain a chameleon that takes on different forms and guises This book offers the first comprehensive update and revision of ideas about the future of war since Russia's 2022 invasion of Ukraine It argues that the war has fundamentally shifted our perspective on the nature and character of future war but also cautions against marginalising many other parallel trends types of war and ways of waging them World renowned international experts from the War Studies field consider the impact of the war in Ukraine on the broader social phenomenon of war they analyse visions of future war examine the impact of technological innovation on its conduct assess our ability to anticipate its future and consider lessons learned for leaders soldiers strategists scholars and concerned citizens Beyond Ukraine features contributions from Azar Gat Beatrice Heuser Antulio Echevarria Audrey Cronin T X Hammes Kenneth Payne Frank Hoffman David Betz Jan Willem Honig and many other pre eminent thinkers on the past present and future of war including an afterword by the late Christopher Coker **The Publishers' Trade List Annual**, 1977 **The Coming Democracy** Ann Florini, 2013-04-10 National governments are proving ill equipped to manage an increasingly complicated suite of global problems from infectious diseases to climate change to conflicts over international trade In The Coming Democracy leading political analyst Ann Florini sets forth a compelling new paradigm for transnational governance one based on the concept of transparency the idea that the free flow of information on topics ranging from corporate and government behavior to nuclear

proliferation to biodiversity protection provides powerful ways to hold decision makers accountable and to give ordinary people meaningful voice in shaping the policies that affect them Dramatic breakthroughs in information technology of the past decade have made such transparency possible on a global scale Florini offers a clear and comprehensive assessment of the possibilities for using transparency to develop effective approaches to transnational governance She shows how this new form of governance promises real hope for managing global problems and provides a compelling scenario that demonstrates how existing conventions and institutions can lead the way in the evolution of a better system of global governance
