The fifth Oxford Conference was held on September 17th 19th 1991 at the Fuji Institute of Training in Japan the first time that the meeting has taken place in the Asian area The facts that only a relatively few Japanese had attended previous Oxford Conferences and that Japan is far from other regions with possible participants made the organizers anticipate a small attendance at the meeting However contrary to our expectations 198 active members 72 foreign and 126 domestic participants submitted 146 papers from 15 countries This was far beyond our preliminary estimate and could have caused problems in providing accommodation for the participants and in programming their scientific presentations These difficulties however were successfully overcome by using nearby hotels by telecasting presentations into a second lecture room and by displaying a substantial number of poster presentations during the whole period of the meeting The meeting had two types of sessions regular and current topics The first paper in each session represented a shon overview or introduction so as to make it easier for the audience to comprehend the problems at issue Because of the large number of papers submitted carefully selected speakers mostly well known scholars made excellent presentations that were followed by lively discussions In this way the conference laid a foundation on which to base its continued scientific success **Making**

**DEUS EX MACHINA** Adam Jacobs, 2025-07-09 Deus Ex Machina is not about divine rescue It is about the moment the system breaks and the psyche sees it In this book the machine is not a plot device but the structure of belief itself social cognitive institutional What appears as salvation from outside is in truth the rupture of an inside that never asked to be whole This is not a story about gods descending It is about the human rising unexpectedly within their own collapse Layered recursive and relentlessly interrogative Deus Ex Machina is a philosophical journey through dissonance authority and the fiction of inevitability It invites the reader to see modern life as a stage managed by mechanisms so seamless we forget they are constructed When these mechanisms fail through trauma betrayal system error or existential fatigue the illusion shatters What then Adam Jacobs draws from mythology technology psychoanalysis and post structural thought to explore how we build machines of meaning and how we break them to become real The book offers a grammar for revelation not as divine truth but as the collapse of false coherence Here the deus is not a god but a glitch The machina is not salvation but the scaffold that collapses to show us we were never truly trapped This is not a comfortable read It is a suggestive disruption an invitation to un narrate un mask and re enter the present through the door that wasn't supposed to open Deus Ex Machina is for those who sense something false behind the seamless and are ready to confront the artificial with clarity not conspiracy It is a book of thresholds
