Emerging Paradigms in Delivery of Therapeutic Agents for the Treatment of Glioblastoma describes the intense research and clinical developments that are required to optimize the available treatment options and the potential side effects to heal brain cancer The success of this strategy includes the use of validated biomarkers appropriate patient selection criteria strategies to prevent adverse events and the implementation of immunotherapy in multimodal treatment approach In 18 chapters this title sets forth the rationales for promising therapies like immunotherapy including immune checkpoint blockade chimeric antigen receptor T CAR T cell therapy oncolytic virotherapy and vaccine therapy In addition the book reviews potential novel agents the current status of preclinical and clinical trials and the challenges and future perspectives in glioblastoma immuno oncology This book is a valuable resource for health professionals scientists and researchers health practitioners students and all those who wish to broaden their knowledge in the allied field Helps to design and develop nanocarrier drug delivery systems and devices for the treatment of glioblastoma Explores a wide range of promising approaches for the diagnosis and treatment of glioblastoma using the latest advancement in cutting edge nanomedical technologies Covers recent advances and perspectives of novel drug delivery based concepts for brain cancer research Includes recent patents and clinical trials in glioblastoma research which will help fill in the gap between industries and academia

Advancing Cancer Therapy: Innovative Strategies Targeting Immune Evasion and Metabolic Modulation Ana Luísa De Sousa-Coelho,Andrés Méndez Lucas,Nuno Miguel Nunes,Francesca Rapino,Mónica Teotónio Fernandes,2025-10-01

Cancer is one of the leading causes of death globally and although there is accumulating knowledge about the mechanisms of cancer development and progression the cancer burden continues to escalate This greatly impacts the patients their families communities and health systems In some instances cancer can be prevented If identified early it is more likely to respond to first line treatments like surgery radiotherapy hormonal treatments and more recent targeted biological therapies and immunotherapies However some cancers may develop resistance to therapies and when diagnosed in advanced stages or at relapse current therapies may be largely ineffective Therefore there is a need to better understand cancer and unveil new targets and approaches for treating it more effectively In this context immune evasion and altered cellular metabolism have emerged as hallmarks of cancer and hot topics in cancer research Unlike conventional cancer therapies novel approaches that promise to alleviate the

current cancer burden are emerging New discoveries unveiled important targets for therapy translating to clinical practice namely immunotherapies which unfortunately are ineffective in several types of cancer and patients Recently metabolism shifts have been increasingly recognized as a target to improve cancer responses to chemotherapy and immunotherapy This Research Topic aims to highlight the most recent advances in the field of cancer therapy focusing on new approaches that go beyond traditional ones in the treatment of any type of cancer Main themes include but are not limited to Tumor microenvironment and metabolic modulation Novel targets for immunotherapy These approaches may include drug repurposing and advanced delivery strategies among others that will allow to advance precision medicine In this Research Topic we welcome submissions such as Brief Research Report Case Report Clinical Trial Mini Review Review Original Research and Systematic Review Our objective is to produce a high quality article collection covering new promising discoveries and innovative approaches either at the pre clinical or clinical levels

Cognitive Behavioural Prevention of Suicide in Psychosis Nicholas Tarrier,Patricia Gooding,Daniel Pratt,2013 This practical and informative text lays out the product of a number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at least influence suicide behaviour in other disorders The authors describe methods of assessment through individual formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in explaining suicidal thoughts and

behaviours A psychological theory of suicide behaviour is needed in order to develop a mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis
