Barrio-Logos Raúl Homero Villa, 2009-03-06 Struggles over space and resistance to geographic displacement gave birth to much of Chicano history and culture In this pathfinding book Raúl Villa explores how California Chicano activists journalists writers artists and musicians have used expressive culture to oppose the community destroying forces of urban renewal programs and massive freeway development and to create and defend a sense of Chicano place identity Villa opens with a historical overview that shows how Chicano communities and culture have grown in response to conflicts over space ever since the United States annexation of Mexican territory in the 1840s Then turning to the work of contemporary members of the Chicano intelligentsia such as Helena Maria Viramontes Ron Arias and Lorna Dee Cervantes Villa demonstrates how their expressive practices re imagine and re create

the dominant urban space as a community enabling place In doing so he illuminates the endless interplay in which cultural texts and practices are shaped by and act upon their social and political contexts **Material Dreams** Kevin Starr,1990-04-12 Kevin Starr is the foremost chronicler of the California dream and indeed one of the finest narrative historians writing today on any subject The first two installments of his monumental cultural history *Americans and the California Dream* have been hailed as mature well proportioned and marvelously diverse and diverting The New York Times Book Review and rich in details and alive with interesting and sometimes incredible people Los Angeles Times Now in *Material Dreams* Starr turns to one of the most vibrant decades in the Golden State s history the 1920s when some two million Americans migrated to California the vast majority settling in or around Los Angeles In a lively and eminently readable narrative Starr reveals how Los Angeles arose almost defiantly on a site lacking many of the advantages required for urban development creating itself out of sheer will the Great Gatsby of American cities He describes how William Ellsworth Smyth the Peter the Hermit of the Irrigation Crusade the self educated Irish engineer William Mulholland who built the main aqueducts to Los Angeles and George Chaffey who diverted the Colorado River transforming desert into the lush Imperial Valley brought life supporting water to the arid South He examines the discovery of oil the boosters and land developers the evangelists such as Bob Shuler the Methodist Savanarola of Los Angeles and Aimee Semple McPherson and countless other colorful figures of the period There are also fascinating sections on the city s architecture the impact of the automobile on city planning the Hollywood film community the L A literati and much more By the end of the decade Los Angeles had tripled in population and become the fifth largest city in the nation In *Material Dreams* Starr captures this explosive growth in a narrative tour de force that combines wide ranging scholarship with captivating prose **Masses, Classes and the Public Sphere** Mike Hill,Warren Montag,2000 This volume poses fundamental questions about the function and relevance of the public sphere both politically and practically *The Library of Dr. Roger K. Lemon,2008-05-14 On the agricultural frontier and through technological progress Europeans and others and their descendants have sought to fulfill their dreams of improvement Through businesses governments and other bodies city dwellers expedited these desires by organizing settlements communications trade finance and manufacturing In turn cities grew mightily To assess the present condition of cities *Liberal Dreams and Nature s Limits* focuses on five large North American cities at various times in the past Philadelphia about 1760 New York 1860 Chicago 1910 Los Angeles 1950 and Toronto 1975 Life inside these cities specifically the economy society and politics public services land development and the geographies of circulation workplaces and residential districts is the central concern of this book Another concern is drawing contrasts and similarities between the American and Canadian urban experiences North Americans most now living in cities face the challenge of a social frontier how to maintain

civility in a near stagnant economy Despite recent advances in cyberspace nature has imposed limits on technical progress defined by speed convenience and comfort Promethean gains through creative destruction are no longer possible Increased preoccupation with money status and safety suggests that the striving inspired by liberalism is still appealing Yet without growth liberal dreams cannot be fulfilled To ensure work income equity and a degree of freedom in thought and action citizens and leaders in both countries will have to commit themselves as never before to managing fairness through social democracy Sustainable cities are not possible otherwise **Library of Congress Catalogs** Library of Congress,1982
