Physical Characteristics of Early Films as Aids to Identification Camille Blot-Wellens, 2022-01-19 Any archivists who have held a piece of film in their hands wondering how to go about identifying it recognize the true value of film preservationist Harold Brown's work In 1967 Brown delivered a pioneering lecture on the identification of early films at the annual Congress of the International Federation of Film Archives FIAF in East Berlin Years of working with Britain's National Film Archive collections and the close examination of thousands of nitrate prints of the silent period made Brown a leading authority on early film identification and an unsurpassed model of methodological consciousness in the archival field In 1990 FIAF published Brown's *Physical Characteristics of Early Films as Aids to Identification* an updated version and a continuation of his 1967 lecture This publication has long been archivists' trusted companion constituting a concentrated encyclopedia on all the information that can be discovered or verified through aspects of the film other than the actual projected image such as perforation shapes embossed and punched marks stock manufacturers and producers' edge marks frame characteristics title styles and production serial numbers It also included essays on key individual production companies of the silent era Over the last 30 years this manual a basic typewritten 100 page volume including 20 pages of black white illustrations with its easily recognizable red cover has been an invaluable reference for film archivists and scholars However as Brown himself acknowledged in the 1990 edition the manual was far from definitive Camille Blot Wellens the editor of this new expanded edition of Brown's 1990 book belongs to the new generation of researchers who have used *Physical Characteristics* extensively in their work and have gathered considerable new information on the subject This new edition is the result of a project she initiated in 2014 with FIAF's support Brown's original text is now augmented with new original research on key film manufacturers and producers by Camille Bolt Wellens and other leading archivists and researchers in the field Richly illustrated the book contains over 900 images including 125 in full color this new 336 page edition of Harold Brown's seminal manual will be welcomed by many and will no doubt become a must have working tool for many in the film archiving and academic fields

[Panorámicas urbanas](#) Gorostiza López, Jorge, 2017-03-28 El cine naci cuando las ciudades comenzaron a transformarse en los complejos y problemáticos lugares que habitamos hoy en día Las poblaciones desde

entonces fueron el lugar donde se desarrollaron los argumentos de las películas y llegaron a tener en algunos casos un papel tan crucial como el de los protagonistas de carne y hueso. En este libro se recorre desde el optimismo vivido en los años veinte del siglo pasado con la aparición de nuevas edificaciones como los rascacielos que transformaron las grandes ciudades hasta las fascinantes metrópolis actuales de países con economías en expansión que al mismo tiempo continúan sufriendo problemas de marginalidad y delincuencia. Las 50 películas seleccionadas son primordiales para poder estudiar y al mismo tiempo entender y llegar a conocer cómo ha sido esa evolución de la ciudad hasta la actualidad así como para constatar la influencia de la imagen en movimiento en esas poblaciones.
