Los Requisitos Radiología De Mama:

Radiología de mama Debra M. Ikeda, 2005-09-07 Nuevo libro de la serie Los Requisitos en Radiología que reúne y sintetiza todo el conocimiento actual sobre la radiología de mama tema que es un auténtico reto para el profesional que diagnostica y trata esta patología tanto por su amplitud como por las implicaciones personales que tiene para el paciente. Como todos los libros de la serie la autora no pretende ofrecer una obra exhaustiva sino un texto conciso que ofrezca el material necesario para la práctica clínica y ayude a conocer en qué contextos clínicos el cáncer tiene más probabilidades de aparecer desarrollar una sistemática de análisis de imagen generar diagnósticos diferenciales en las masas calcificaciones y captaciones y ser capaces de reorientar a los pacientes una vez se hallan detectado ciertos hallazgos. El diagnóstico por imagen de la mama comprende el cribaje poblacional screening diagnóstico correlación clínica procedimientos intervencionistas e incluso parte de psicología para lo que se revisan múltiples técnicas de imagen ya que el diagnóstico por imagen de la mama ya no está únicamente centrado en la mamografía sino que también incluye la ultrasonografía y la resonancia magnética que de hecho juegan un importante papel como guía en los procedimientos intervencionistas de la mama. Aunque centrada en el papel técnico del radiólogo esta obra se hace eco de un enfoque integral a la hora de detectar diagnosticar y tratar a la paciente con cáncer de mama y entiende que el radiólogo debe estar más implicado tanto en la biopsia como en el seguimiento y formar parte de un equipo multidisciplinar en el que también participen cirujanos oncológicos patólogos radioterapeutas ginecólogos oncólogos médicos y cirujanos plásticos.
