Lost River:

Recovering a Lost River Steven Hawley, 2012-03-06 In the Pacific Northwest the Snake River and its wilderness tributaries were as recently as a half century ago some of the world's greatest salmon rivers. Now due to four federal dams the salmon population has dropped close to extinction. Steven Hawley, journalist and self-proclaimed river rat, argues that the best hope for the Snake River lies in dam removal, a solution that pits the power companies and federal authorities against a collection of Indian tribes, farmers, fishermen, and river recreationists. The river's health, as he demonstrates, is closely connected to local economies, freshwater rights, and energy independence. Challenging the notion of hydropower as a cheap, green source of energy, Hawley depicts the efforts being made on behalf of salmon by a growing army of river warriors. Their message, persistent but disarmingly simple, is that all salmon need is water in their rivers and a clear way home. **Lost River**

Lost River Towns of Boone County Bridget B. Striker, 2010-09-27 When Boone County was officially founded in 1799, a local population was already growing by the day. The Ohio River offered settlers access to this new frontier west of the Alleghenies, and soon many vibrant communities were established along the banks of the Ohio. Today, once thriving towns like North Bend, Bellevue, and Touseytown, built to last through generations, have all but vanished. The unforgiving current of the Ohio River washed many away, while modern transportation construction dispatched the remaining towns. Fortunately, through the efforts of editor Bridget Striker and a skilled team of local historians and archivists at the Boone County Public Library, these sunken homesteads have been unearthed. Peer into a bygone way of life through this comprehensive collection of vintage photographs and engaging historical accounts. **Lost River Watershed Project**, 1976 **The Lost River**

Michel Danino, 2010-03-12 The Indian subcontinent was the scene of dramatic upheavals a few thousand years ago. The Northwest region entered an arid phase, and erosion coupled with tectonic events played havoc with river courses. One of them disappeared. Celebrated as Sarasvati in the Rig Veda and the Mahabharata, this river was rediscovered in the early nineteenth century through topographic explorations by British officials. Recently, geological and climatological studies have probed its evolution and disappearance, while satellite imagery has traced the river's buried courses, and isotope analyses have dated ancient waters still stored under the Thar Desert. In the same Northwest, the subcontinent's first urban society, the Indus civilization, flourished and declined. But it was not watered by the Indus alone; since Aurel Stein's expedition in the 1940s, hundreds of Harappan sites have been identified in the now dry Sarasvati's basin. The rich Harappan legacy in technologies, arts, and culture sowed the seeds of Indian civilization as we know it now. Drawing from recent research in a wide range of disciplines, this book discusses differing viewpoints and proposes a harmonious synthesis: a fascinating tale of exploration that brings to life the vital role the lost river of the Indian desert played before its waters gurgled to a stop.
