Nature Reality And The Sacred The Nexus Of Science And Religion:

Nature, Reality, and the Sacred Langdon Gilkey, 1993 *Nature, Reality, and the Sacred* Langdon Gilkey, 1993 Two partial apprehensions of nature vied for dominance in the past century religious void of any influence from science and scientific unable to admit any reality beyond the empirical Both views have led to the exploitation of nature and the scientific may prove even more devastating The fault Gilkey argues lies not in the scientific knowledge of nature but in the assumed philosophy of science that accompanies most scientific and technological practice Scientific knowing needs to be critiqued and brought into relationship with other complementary ways of knowing *Nature, reality, and the sacred* Langdon Gilkey, 1989 Companion to Primary Care Mental Health Gabriel Ivbijaro, 2022-03-01 Companion to Primary Care Mental Health is the result of a major collaboration of an international group of general practitioners psychiatrists policy makers mental health professionals and mental health advocates This extraordinary guide provides the best available evidence for the management of patients with mental health conditions in primary care It draws on the wisdom of a range of experts from primary and secondary care who have translated information from the literature and their own clinical experience to apply it across the globe to everyday family practice With the emphasis on practical application it presents family doctors and their teams with the evidence based knowledge necessary to support the development of fully integrated systems to promote good mental health using tables and figures to illustrate complex matters This includes the need to harness the wider determinants of health and mental health and to tackle stigma through advocacy spirituality and ethical practice The role of public health and the management of the many interfaces associated with providing good mental health are also covered It includes tools for assessment including classification and risk assessment and the general principles required to enable a biopsychosocial approach to care The book also considers the individual mental health conditions that family doctors and their teams are likely to encounter As comorbidity and the management of complexity are very common in primary care mental health these are also explored in the final chapters of the book Human Significance in Theology and the Natural Sciences Christopher L. Fisher, 2010-02-03 The Medieval Worldview that Regarded Human Beings as at the Center of God's plans for His universe has long been regarded as obsolete its synthesis of Christian theology and Greek philosophy having collapsed under the weight of Copernicus Galileo and Darwin The popular stereotype is that Science both in the Copernican revolution that dethroned the earth centered view of the cosmos and in subsequent developments in evolutionary theory and general relativity has marginalized and trivialized human existence revealing humanity's place in the cosmos to be accidental peripheral and ultimately meaningless However an investigation into both modern Christian theology and contemporary twenty first century Science reveals just the opposite providing solid evidence in the interdisciplinary dialogue concerning the significance of humanity within the universe In this important study Christopher Fisher analyzes several modern theologians including Wolfhart Pannenberg Karl Rahner and John Zizioulas to reveal how contemporary ecumenical theology

is deeply and intrinsically committed to a high view of human cosmic significance as a consequence of Christianity's indelible Trinitarian and incarnational faith Fisher then demonstrates how research in contemporary natural Science confirms this finding in its own way as recent primate intelligence studies artificial intelligence research and even the quest for extra terrestrial intelligence reveal the wonder of human uniqueness A contemporary version of the teleological argument also resurfaces in consideration of cosmic evolutionary perspectives on human existence Even ecological concerns take on a new poignancy with the realization that among material creatures only human beings are capable of addressing the world's situation This interdisciplinary study uncovers the surprising coherence and convergence of Christian Theology and Natural Science on the subject of human existence and significance here at the beginning of the twenty first century and it highlights the very unique role of humanity in global and cosmic history Through an incisive study of several leading twentieth century theologians Chris Fisher explores the ecumenical consensus for a strong reading of human cosmic significance While acknowledging problems surrounding earlier forms of anthropocentrism he argues that Christian theology remains wedded to a high understanding of the place of human beings in the economy of creation and salvation This is a valuable contribution to an important debate in contemporary theology David Fergusson University of Edinburgh This is a fascinating work on the interface between theology and science The author's remarkable breadth of knowledge clarity of thought and lucid writing style enable him to help the reader to understand the coherence between science and faith This scholarly work is an irenic and well informed presentation of the Christian faith and will become one of the primary textbooks in theology philosophy of religion and philosophy of science Laurence W Wood Asbury Theological Seminary Earth-Honoring Faith Larry L. Rasmussen, 2015 Larry L Rasmussen offers a dramatic new way of thinking about human society ethics and the health of our planet Rejecting the modern ethical assumption that morality applies to human society alone Earth honoring Faith argues that we must derive a system of ethics and morality that accounts for the wellbeing of all creation on Earth **Theology for a Scientific Age** Arthur Robert Peacocke, 1993 This second expanded edition of Arthur Peacocke's seminal work now includes the author's Gifford Lectures as well as a new part three in which he deals roundly with the central corpus of Christian belief for a scientific age Distinctively theological commitments are being rethought in light of scientific apprehensions of nature Ted Peters Zygon **A Liberation Theology of the Brain** Carmelo Santos-Rolón, 2025-06-10 Drawing on experiences from the lab the local congregation the immigrant rights movement the university classroom the global church and brain science this book invites readers to discover the transformative possibilities that arise when we recognize that the insights of science and theology can complement and transform each other Brain science and theology can be powerful partners in God's work of liberating all of us from the internalized structures of oppression that colonize imaginations imprison emotions subjugate bodies and fracture societies Trained as a scientist a pastor and a theologian Carmelo Santos Rolón brings together insights from various fields in neuroscience and the cognitive sciences such as the

neuroscience of religious experience the neuroscience of emotions the cognitive science of religion and the neuroscience of decision making with data from liberation postcolonial decolonial and Lutheran ecumenical theologies to analyze the spiritual experience of holistic liberation The result is a theological framework informed by science that allows us to appreciate how the Spirit of God is at work in with and under neurons bodies and communities in all their beautiful messiness and complexity In the tradition of liberation theologies which insist that action and reflection belong together and must inform each other this book aims at a theology with dirty hands and worn out shoes It is meant for a people who are not just intellectually curious about who God is and how religion affects our brains but who are eager to join in God s work of bringing healing and hope to a wounded world Theology and neuro science together allow us to witness how the Spirit of God is at work deep inside the nooks and crannies of our brains in the chemistry of our nervous systems in the emotions that orient our actions and in the communities that shape our identities Through tangible means such as words and rituals symbols and narratives sacraments and community God liberates us for lives of meaning and purpose at the service of the beautiful future that God is bringing into being

Who Guards the Guardians? Peter Raine,2003 This book attempts to link ecology philosophy and theology through an exploration of a new model of intercultural dialogue Case studies provide practical and theoretical applications which lead to a deeper understanding of not only environmental guardianships but also the fundamental relationship between human beings and nature s being

Dusty Earthlings John Mustol,2018-01-01 The Lord God formed a man from the dust of the ground Genesis 2 7 Made of dust we humans are thoroughly physical beings We are dusty earthlings As such we are also ecological beings or rather eco physical beings firmly embedded in and dependent upon God s earthly ecosystems which support and provide for us and constitute our earthly home Today we are living in ways that are damaging our home As Christian dusty earthlings we are called to oversee God s earthly creation and to follow Jesus Christ God incarnated as a dusty earthling How do we do this in the face of the array of ecological problems we face today How can we obey the ecological principles and limits that govern all of life on God s good earth Mustol argues that the virtues of humility voluntary self limitation and the principles of kenosis and justice will help as we seek to follow Jesus as dusty earthlings in today s world

Theologies of Creation Thomas Jay Oord,2014-10-02 Humans have long wondered about the origin of the universe And such questions are especially alive today as physicists offer metaphysical theories to account for the emergence of creation Theists have attributed the universe s origin to divine activity and many have said God created something from absolute nothingness The venerable doctrine of creatio ex nihilo especially emphasizes God s initial creating activity Some contributors to this book explore new reasons creatio ex nihilo should continue to be embraced today But other contributors question the viability of creation from nothing and offer alternative initial creation options in its place These new alternatives explore a variety of options in light of recent scientific work new biblical scholarship and both new and old theological traditions

Human Cloning Ronald Cole-Turner,1997-01-01 Is human cloning equal to playing God Is the

technology despite being scientifically exciting a moral option in our world In this volume Ronald Cole Turner gathers twelve nontechnical and highly accessible essays that explore this controversial subject

Biodiversity Conservation Ethics in Major Religions H. S. A. Yahya, 2010-10 Covering three broader issues biodiversity conservation religious doctrine and environment the book Biodiversity Conservation Ethics in Major Religions is the result of a unique approach It attempts to initiate scientific discourse through the fabric of religions Spread across 15 chapters the book covers the essence of 10 religions on biodiversity encompassing a wide range of issues related to conservation The book promises to be a useful resource for biodiversity students researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology

God and Passion in Kierkegaard's Climacus Johannes Corrodi Katzenstein, 2007 Johannes Corrodi Katzenstein offers a contribution to the current debate on Kierkegaard mostly concerning the rationality of religious belief and the presumed religious neutrality autonomy of philosophical and scientific thought More specifically his book is an attempt to relate Kierkegaard's theory of the stages of life aesthetic ethical religious to issues that have been of utmost concern to Anglo American analytical philosophy such as the nature of truth rational knowledge objectivity etc From this angle Kierkegaard turns out to be not the irrationalist he has often been made into but rather the outspoken witness of a passion that guides all thinking i e the passion to think what cannot be thought An attempt is made to show that for Kierkegaard anticipating some of the arguments of contemporary postsecular philosophy the ideal of pure or autonomous reason inevitably has its basis in a pre rational often tacit commitment to an origin whose primary home is in religious faith Rather than precluding dialogue awareness of these deeper forces and starting points of our various philosophical and scientific outlooks is a critical requirement for mutual understanding between secularist and religious perspectives and traditions competing for cultural and political dominance

Spiritual Insights From The New Science: Complex Systems And Life Raima Larter, 2021-05-05 Spiritual Insights from the New Science is a guide to the deep spiritual wisdom drawn from one of the newest areas of science the study of complex systems The author a former research scientist with over three decades of experience in the field of complexity science tells her story of being attracted as a young student to the study of self organizing systems where she encountered the strange and beautiful topics of chaos fractals and other concepts that comprise complexity science Using the events of her life she describes lessons drawn from this science that provide insights into not only her own life but all our lives These insights show us how to weather the often disruptive events we all experience when growing and changing The book goes on to explore through the unfolding story of the author's life as a practicing scientist other key concepts from the science of complex systems cycles and rhythms attractors and bifurcations chaos fractals self organization and emergence Examples drawn from religious rituals dance philosophical teachings mysticism native American spirituality and other sources are used to illustrate how these scientific insights apply to all aspects of life especially the spiritual Spiritual Insights from the New Science shows the links between this new science and

our human spirituality and presents in engaging accessible language the argument that the study of nature can lead to a better understanding of the deepest meaning of our lives **The Lure of the Edge** Brenda Denzler, 2001 Publisher Fact Sheet A guided tour through the complex world of the UFO abduction movement T. F. Torrance Alister E. McGrath, 2006-03-23 T F Torrance is widely regarded as the most significant British academic theologian of the twentieth century He is especially noted for his ground breaking contribution to the study of the relationship of Christian theology and the natural sciences He is unquestionably one of the most prolific of theological writers and is the most senior member of the nearest thing to a theological dynasty that Great Britain has ever produced Here Alister McGrath himself one of this country's leading theologians traces the development of Torrance's theological thought and provides a comprehensive account of his life and career Particular attention is paid to the important role played by Torrance in the English language reception of the theology of Karl Barth and to his pioneering engagement with the relation between theology and science While making extensive reference to Torrance's published works McGrath also draws on important unpublished writings and private papers The book contains many unpublished photographs together with a complete bibliography of Torrance's works *A New Handbook of Christian Theologians* Donald W. Musser, 1996-09-01 In recent years the flow of Christian theology has been channeled in diverse streams represented by such trends and movements as black theology liberation theology feminist theology and womanist theology To survey this abundance and diversity of current Christian theology this book examines the theologies of representative theologians Particularly to help students navigate the sea of information the editors have identified various routes for reading and have traced several threads or issues common to many of the essays thus demarcating such recurrent concerns as the ways in which the theologians consider the sources and goals for theology their variant assumptions and conclusions about the nature of God their divergent approaches to understanding the person and purpose of the Christ and their distinct expectations for the destiny of history and faith *Evil after Postmodernism* Jennifer Geddes, 2013-01-11 These six essays form a stimulating and lucid investigation of the meaning of evil in the light of postmodern thought and of the cultural and social changes of the modern age They consider subjects such as the war in Bosnia AIDS and the Holocaust *Theology in Transposition* Myk Habets, 2013-11-01 T F Torrance was one of the most significant English language theologians of the 20th century known extensively for his curatorship of the English translation of Barth's Church Dogmatics but also for his own prodigious theological scholarship The complexity and astonishing breadth of Torrance's output however have made assessment and appropriation markedly difficult This volume seeks to rectify that lack of assessment through careful exposition of the vital centers and interconnections within Torrance's theology alongside constructive appraisal and critique of his contributions to contemporary theology
