Ethnographers and Native Women Storytellers Susan Berry Brill de Ramírez, 2015-11-19 This book focuses on the collaborative work between Native women storytellers and their female ethnographers and or editors but the book is also about what it is that is constitutive of scientific rigor factual accuracy cultural authenticity and storytelling signification and meaning Regardless of discipline academic ethnographers who conducted their field work research during the twentieth century were trained in the accepted scientific methods and theories of the time that prescribed observation objectivity and evaluative distance In contradistinction to such prescribed methods regarding the ethnographic work conducted among Native Americans it turns out that the intersubjectively relational work of women both ethnographers and the Indigenous storytellers with whom they worked has produced far more reliably factual historically accurate and tribally specific Indigenous autobiographies than the more scientifically objective approaches of most of the male ethnographers This volume provides a close lens to the work of a number of women ethnographers and Native American women storytellers to elucidate the effectiveness of their relational methods Through a combined rhetorical and literary analysis of these ethnographies we are able to differentiate the products of the women's working relationships By shifting our focus away from the surface level textual reading that largely approaches the texts as factually informative documents literary analysis provides access into the deeper levels of the storytelling that lies beneath the surface of the edited texts Non Native scholars and editors such as Franc Johnson Newcomb Ruth Underhill Nancy Lurie Julie Cruikshank and No l Bennett and Native storytellers and writers such as Grandma Klah Mar a Chona Mountain Wolf Woman Mrs Angela Sidney Mrs Kitty Smith Mrs Annie Ned and Tiana

Bighorse help us to understand that there are ways by which voices and worlds are more and less disclosed for posterity The results vary based upon the range of factors surrounding their production but consistent across each case is the fact that informational accuracy is contingent upon the the degree of mutual respect and collaboration in the women s working relationships And it is in their pioneering intersubjective methodologies that the work of these women deserves far greater attention and approbation
