New Directions In The Philosophy Of Technology:

New Directions in the Philosophy of Technology Joseph C. Pitt, 2013-03-09 In this collection we finally find the philosophy of technology a young and rapidly developing area of scholarly interest making contact with history of science and technology and mainstream epistemological and metaphysical issues The sophistication of these papers indicates the maturity of the field as it moves away from the advocacy of anti technology ideological posturing toward a deeper understanding of the options and restraints technological developments provide The papers presented here take us over a threshold into the real world of complicated social and technological interactions where science and art are shown to be integral to our understanding of technological change and technological innovations are seen as configuring our knowledge of the world and opening up new possibilities for human development With its rich historical base this volume will be of interest to all students concerned about the interactions among technology society and philosophy

Plato the Myth Maker Luc Brisson, 1998 We think of myth as a fictional story and Plato was the first to use the term *muthos* in that sense But Plato also used *muthos* to describe the practice of making and telling stories the oral transmission of all that a community keeps in its collective memory In the first part of *Plato the Myth Maker* Luc Brisson reconstructs Plato's multifaceted and not uncritical description of *muthos* in light of the latter's famous Atlantis story The second part of the book contrasts this sense of myth as Plato does with another form of speech that he believed was far superior the *logos* of philosophy Appearing for the first time in English *Plato the Myth Maker* is a solid and important contribution to the history of myth based on the privileged testimony of one of its most influential critics and supporters

Science, Technology and Society Wenceslao J. González, 2005 The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past It is a social turn which affects philosophy of science as well as philosophy of technology It includes a new vision of the aims processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant This turn highlights science and technology as social undertakings rather than intellectual contents According to this new vision there are several important changes as to what should be studied the objects of research how it should be studied the method and what the consequences for those studies are The new focus of attention can be seen in many changes and among them are several of special interest a from what science and technology are in themselves mainly epistemic contents to how science and technology are made largely social constructions b from the language and structure of basic science to the characteristics of applied science and the applications of science c from technology as a feature through which human beings control their natural surroundings a step beyond technics due to the contribution of science to technology as a social practice and an instrument of power and d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values

cultural political economic of science and technology Wenceslao J Gonzalez is professor of logic and philosophy of science at the University of A Coruña Spain He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University He has been a visiting researcher at the Universities of St Andrews Münster and London London School of Economics as well as Visiting fellow at the Center for Philosophy of Science University of Pittsburgh He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologna and Canterbury New Zealand He has edited 20 volumes and published 70 papers He is the editor of the monographic issues on Philosophy and Methodology of Economics 1998 and Lakatos's Philosophy Today 2001 His writings include Economic Prediction and Human Activity An Analysis of Prediction in Economics from Action Theory 1994 On the Theoretical Basis of Prediction in Economics 1996 Rationality in Economics and Scientific Predictions A Critical Reconstruction of Bounded Rationality and its Role in Economic Predictions 1997 Lakatos's Approach on Prediction and Novel Facts 2001 Rationality in Experimental Economics An Analysis of R Selten's Approach 2003 From Erklären/Verstehen to Prediction Understanding The Methodological Framework in Economics 2003 and The Many Faces of Popper's Methodological Approach to Prediction 2004 The Ethics of Ordinary Technology Michel Puech, 2016-04-28 Technology is even more than our world our form of life our civilization Technology interacts with the world to change it Philosophers need to seriously address the fluidity of a smartphone interface the efficiency of a Dyson vacuum cleaner or the familiar noise of an antique vacuum cleaner Beyond their phenomenological description the emotional experience acquires moral significance and in some cases even supplies ethical resources for the self If we leave this dimension of modern experience unaddressed we may miss something of value in contemporary life Combining European humanism Anglophone pragmatism and Asian traditions Michel Puech pleads for an ethical turn in the way we understand and address technological issues in modern day society Puech argues that the question of power is what needs to be reconsidered today In doing so he provides a three tier distinction of power power to modify the outer world our first intention method in any case technology power over other humans our enduring obsession politics and domination power over oneself ethics and wisdom Essays in Post-Critical Philosophy of Technology Mihály Héder, Eszter Nádasi, 2019-02-15 Technology in all its forms has had and continues to have an indisputable impact on society and culture Philosophy of technology seeks to understand this impact and the meaning of technology for society and culture Although its origins can be traced back to the Greeks it wasn't until the late 19th century to the beginning of the 20th century that it gained ground as a philosophical discipline Now more than ever it is considered an essential philosophical enterprise The Budapest Workshop on Philosophy of Technology was a lively and successful event that sought to discuss reflect on and apply this branch of philosophical inquiry to both historical and contemporary examples Importantly the contributors' methodological approaches were influenced by although not limited to Michael Polanyi's term post critical Moving beyond

the rigidity of past approaches the selected essays were driven by two lines of inquiry what has been the historical role of technology in social and scientific change And how can a post critical approach enhance and extend our understanding of philosophy of technology This edited volume begins by exploring the role of technology in social and scientific developments from a historical perspective before moving towards a discussion of philosophy of technology from a Post Critical epistemic stance Free from the constraints of previous methodologies the third part of this work engages with the term Post Critical in its broadest sense The contributors to this section consider the phenomenology of the body and the influence of technology on our lives Finally the four concluding chapters of this book apply this philosophical approach to a wide range of contemporary problems from Decision Support Systems to Crisis Communication *Heraclitus Redux: Technological Infrastructures and Scientific Change* Joseph C. Pitt,2019-10-25 Scientific change is often a function of technological innovation new instruments show us new things we could not see before and we then need new theories to explain them One of the results of this process is that what counts as scientific evidence changes and how we do our science changes Hitherto the technologies which make contemporary science possible have been ignored This book aims to correct that omission and to spell out the consequences of taking the technologies behind the doing of science seriously New Directions in Educational Technology and Administration Fred Paas,Srikanta Patnaik,Taosheng Wang,2025-07-14 New Directions in Educational Technology and Administration emphasize the integration of cutting edge tools like artificial intelligence big data and augmented reality to enhance teaching and learning experiences This volume focus on creating more personalized accessible and equitable education systems that cater to diverse learners At the same time administrative innovations prioritize data driven decision making and streamlined operations to foster efficient institutional management This volume also explores the most recent innovations and significant developments in the domain of Educational Technology and Administration offering a thorough overview of the current landscape It encompasses various dimensions including Learning Analytics and Curriculum Design Online and Distance Learning Leadership in Modern Education By merging theoretical knowledge with practical applications this book empowers educators researchers practitioners and students to navigate and excel with the New Directions in Educational Technology and Administration with a focus on responsible technology for assessment and feedback the book address challenges like digital equity and ethical implementation By embracing these new directions the education sector is poised to redefine learning environments and empower future generations Inside the Politics of Technology Hans Harbers,2005 Though the old saying claims that man is the measure of all things the authors of Inside the Politics of Technology argue that the distinction implied between autonomous humans and neutral instruments of technology is an illusion On the contrary the technologies humans create simultaneously shape humans themselves By means of case studies of technologies as diverse as video cameras electric cars pregnancy tests and genetic screenings this volume considers the implications of this co production of technology and society for our philosophical and political ideas Are only

humans endowed with social political and moral agency or does our technology share those qualities And if so how should we understand or practice a politics of technology New Directions in Educational Technology Eileen Scanlon,Tim O'Shea,2012-12-06 This book is based on the workshop that kickstarted the NATO Science Committee Special Programme on Advanced Educational Technology We invited the leaders in the field to attend this inaugural meeting and were delighted by the quality of the attendance the papers delivered at the workshop and this book Many of the authors have subsequently run other meetings funded by the Special Programme and have or are in the process of editing books which focus on particular topics This book covers all the major themes in the area ranging from fundamental theoretical work to empirical studies of state of the art technological innovations Tim O Shea chaired the NATO Survey Group which planned the Programme and the subsequent Panel which disbursed funds in the first two years of the Programme He would like to thank the other group and panel members namely Professor N Balacheff Professor D Bjomer Professor H Bouma Professor P C Duchastel Professor A Dias de Figueiredo Dr D Jonassen and Professor T Liao He would like to offer his special thanks to Dr L V da Cunha the NATO Programme Director for his unfailing support and patience Eileen Scanlon was the Director of the Workshop which is the basis of this book She offers heartfelt thanks to the contributors and to the following who provided practical help with the meeting or the production of this book Mrs Pauline Adams Dr Mike Baker Mrs Kathy Evans Mrs Patricia Roe Mr Dave Perry and Ms Fiona Spensley Philosophy of Technology after the Empirical Turn Maarten Franssen,Pieter E. Vermaas,Peter Kroes,Anthonie W.M. Meijers,2016-06-23 This volume features 16 essays on the philosophy of technology that discuss its identity its position in philosophy in general and the role of empirical studies in philosophical analyses of engineering ethics and engineering practices This volume is published about fifteen years after Peter Kroes and Anthonie Meijers published a collection of papers under the title The empirical turn in the philosophy of technology in which they called for a reorientation toward the practice of engineering and sketched the likely benefits for philosophy of technology of pursuing its major questions in an empirically informed way The essays in this volume fall apart in two different kinds One kind follows up on The empirical turn discussion about what the philosophy of technology is all about It continues the search for the identity of the philosophy of technology by asking what comes after the empirical turn The other kind of essays follows the call for an empirical turn in the philosophy of technology by showing how it may be realized with regard to particular topics Together these essays offer the reader an overview of the state of the art of an empirically informed philosophy of technology and of various views on the empirical turn as a stepping stone into the future of the philosophy of technology *Beyond Cutting Edge?* Paul C. Heidebrecht,2014-03-10 A quick scan of any newsstand is enough to confirm the widespread preoccupation with technological change As a myriad of articles and advertisements demonstrate not only are we preoccupied with technology but we are bombarded with numerous reminders that the cutting edge is in constant motion Most often the underlying assumption of Christians is that we have no choice but to find ways to cope with the latest and greatest Indeed it

is often assumed that the church has no choice but to find ways to cope with its new technological context This book does not make the same assumptions Building on the work of Mennonite theologian John Howard Yoder it argues that the practices of the church make it possible for Christians to conscientiously engage technology This happens when we recognize that marks of the church such as patience vulnerability and servanthood can put technological ideals such as speed control and efficiency in their proper place In the course of grappling with three examples of morally formative technologies automobiles genetically modified food and the Internet this book goes beyond Yoder's thought by emphasizing that the church also plays a crucial role in our moral formation *New Directions in Technology for Writing Instruction* Gonca Yangın-Ekşi, Sedat Akayoglu, Leonora Anyango, 2023-01-01 This book responds to the changes and needs of English Language Learning by offering insight into online writing pedagogical platforms and atmospheres Language learning enriched with technology web tools and applications have become a necessary ingredient in language education internationally This volume provides an in depth understanding of writing practices that are responsive to the challenges for teaching and learning writing in local and global contexts of education It also provides succinct knowledge at the intersection of technology with teaching learning and research The chapters herein creatively take advantage of the affordances of digital platforms and further critiques their limitations The book also delineates knowledge on concepts theories and innovative approaches to digital writing in the field of teaching and learning English The chapters focus on reviews and provide guidance on the practical use of Web 2.0 and multimedia tools as well as presenting research on technology integration in writing classes *Epistemology and the Social*, 2015-06-29 Epistemology had to come to terms with the social on two different occasions The first was represented by the dispute about the epistemological status of the social sciences and in this case the already well established epistemology of the natural sciences seemed to have the right to dictate the conditions for a discipline to be a science But the social sciences could successfully vindicate the legitimacy of their specific criteria for scientificity More recently the impact of social factors on the construction of our knowledge including scientific knowledge has reversed in a certain sense the old position and promoted social inquiry to the role of a criterion for evaluating the purport of cognitive including scientific statements But this has undermined the traditional characteristics of objectivity and rigor that seem constitutive of science Moreover in order to establish the real extent to which social conditionings have an impact on scientific knowledge one must credit sociology with a sound ground of reliability and this is not possible without a preliminary epistemological assessment These are some of the topics discussed in this book both theoretically and with reference to concrete cases *Encyclopedia of Technology and Innovation Management* V. K. Narayanan, Gina Colarelli O'Connor, 2010-03-08 Get complete up to date and authoritative coverage of technology and innovation A broadly encompassing encyclopedia on the emerging topic of technology innovation and management TIM this volume covers a wide array of issues TIM is a relatively new field and is highly interdisciplinary incorporating strategy and entrepreneurship economics marketing organizational behavior

New Directions in Rhizomatic Learning Myint Swe Khine, 2023-06-05 Drawing on the theories and philosophies of Deleuze and Guattari this edited collection explores the concept of rhizomatic learning and consolidates recent explorations in theory building and multidisciplinary research to identify new directions in the field Knowledge transfer is no longer a fixed process Rhizomatic learning posits that learning is a continuous dynamic process making connections using multiple paths without beginnings and ending in a nomadic style The chapters in this book examine these notions and how they intersect with a contemporary and future global society Tracking the development of the field from poststructuralist thinking to nomadic pedagogy this book goes beyond philosophy to examine rhizomatic learning within the real world of education It highlights innovative methods frameworks and controversies as well as creative and unique approaches to both the theory and practice of rhizomatic learning Bringing together international contributors to provide new insights into pedagogy for 21st century learning this book will be of interest to academics researchers and postgraduate students in education and adjacent fields

Visions of Electric Media Ivy Roberts, 2025-10-01 Visions of Electric Media is an historical examination into the early history of television as it was understood during the Victorian and Machine ages How did the television that we use today develop into a functional technology What did Victorians expect it to become How did the vision of television change once viewers could actually see pictures on a screen We will journey through the history of television from the first indications of live communications in technology and culture in the late nineteenth century to the development of electronic televisual systems in the early twentieth century Along the way we will investigate the philosophy folklore engineering practices and satires that went into making television a useful medium

Contributions to Social Ontology Clive Lawson, John Spiro Latsis, Nuno Martins, 2013-01-11 Recent years have seen a dramatic re emergence of interest in ontology From philosophy and social sciences to artificial intelligence and computer science ontology is gaining interdisciplinary influence as a popular tool for applied research Contributions to Social Ontology focuses specifically on these developments within the social sciences The contributions reveal that this revived interest in social ontology involves far more than an unquestioning acceptance or application of the concepts and methods of academic philosophers Instead as

ontology permeates so many new areas social ontology itself is evolving in new and fascinating ways This book engages with these new developments pushing it forward with cutting edge new material from leading authors in this area from Roy Bhaskar to Margaret Archer It also explicitly analyzes the relationship between the new ontological projects and the more traditional approaches This book will be of great interest to students and researchers alike across the social sciences and particularly in philosophy economics and sociology

Theology and Technology, Volume 1 Carl Mitcham, Jim Grote, Levi Checketts, 2022-07-21 Originally published nearly forty years ago as a spiritual successor to Carl Mitcham and Robert Mackey's *Philosophy and Technology* the essays collected in the two volumes of *Theology and Technology* span an array of theological attitudes and perspectives providing sufficient material for careful reflection and engagement The first volume offers five general attitudes toward technology based off of H Richard Niebuhr's five ideal types in *Christ and Culture* The second volume includes biblical historical and modern theological engagements with the place of technology in the Christian life This ecumenical collection ranges from authors who enthusiastically support technological development to those cynical of technique and engages the Christian tradition from the church fathers to recent theologians like Bernard Lonergan and Jacques Ellul Taken together these essays some reproductions of earlier work and others original for this project provide any student of theology a fitting entrance into considering the place of technology in the realm of the sacred

Social and Professional Applications of Actor-Network Theory for Technology Development Tatnall, Arthur, 2012-10-31 The latest advances in technology development have been particularly useful to actor network theory as a structure for much of its research With a socio technical approach to the understanding of information systems and applications the actor network theory aims to bring support for social influence on technological innovations *Social and Professional Applications of Actor Network Theory for Technology Development* presents a platform for the approaches and implementations on the actor network theory and its relationship with technology development This book provides researchers and practitioners with a better understanding of the usefulness of the social and technical connection
