Meenaghan, Robert O. Washington, Robert M. Ryan, 1982 The Columbia University School of Social Work Ronald A. Feldman, Sheila B. Kamerman, 2001 Few aspects of American military history have been as vigorously

debated as Harry Truman's decision to use atomic bombs against Japan. In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons, surveys the major debates related to that decision, and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II. Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945. He then provides a historical overview of the events in question, beginning with the decision and program to build the atomic bomb. Detailing the sequence of events leading to Japan's surrender, he revisits the decisive battles of the Pacific War and the motivations of American and Japanese leaders. Finally, Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents, scholarly books, and articles.

The Organic City Patricia Mooney Melvin, 2014-07-15 During the late nineteenth century, rapid social and economic changes negated the prevailing conception of the city as a uniform whole. Confronted with this disparity between the old urban definition and the new city of the late nineteenth century, social thinkers searched for a new concept that would correspond more closely to the divided urban community around them. Borrowing an analogy from natural history, these thinkers conceived of the city as an organism composed of interdependent neighborhoods and sought to translate this concept into ways of dealing with the dislocations and problems in urban life. In this new study of American urban history, Patricia Melvin traces the growth of the idea of the organic city and the developing emphasis on the neighborhood as the basic urban unit. An early expression of the idea was the settlement house movement, but the most effective application of the idea, Melvin shows, was the social unit organization scheme worked out by Wilbur C. Phillips. As a social planner and organizer, Phillips first tried his approach in New York, then in Milwaukee, and finally in Cincinnati. Although initially successful in dealing with specific issues, Phillips's efforts eventually foundered on friction among ethnic groups and on the opposition of city politicians. Finally, in the 1920s, the whole concept of the organic city was supplanted by a new view of the city based not upon a cooperative but upon a competitive model. **The Organic City** contributes new understanding to an important period of American urban history. Moreover, it shows clearly how important is the role of concepts in shaping the perception of social realities and the attempts to deal with them.

References, 1978 *Theory and Practice of Community Social Work* Samuel H. Taylor, Robert W. Roberts, 1985 *Social Work and Social Development* James Midgley, Amy Conley, 2010-05-19 Social workers have been involved in social development for many years, but it is only recently that these ideas have been explicitly applied to social work practice. The result is that a new and distinctive approach to social work practice, known as developmental social work, has emerged. Developmental social work emphasizes the role of social investment in professional practice. These investments meet the material needs of social workers' clients and facilitate their full integration into the social and economic life of the community. Developmental social workers believe that client strengths and capabilities need to be augmented with public resources and

services if those served by the profession are to live productive and fulfilling lives Although developmental social work is inspired by international innovations particularly in the developing countries it highly relevant to practice in the United States and other Western nations In the first book to lay out a clear framework for developmental social work practice chapters will focus on the traditional fields of social work practice showing how social investment strategies can be adopted by social workers in their daily practice with populations including families and children people with mental illness homeless youth people with disabilities the elderly and those in the correctional system By facilitating clients full social and economic participation through a variety of strategies such as microenterprise or asset building programs practitioners can help bring about meaningful changes in clients lives and throughout their communities The editors and contributors offer a highly original exposition of developmental social work theory and practice providing a definitive guide to an emerging and exciting new approach to practice Strategies of Community Organization Fred M.
