France and Women, 1789-1914 James McMillan, Professor James F Mcmillan, 2002-01-08 France and Women 1789 1914 is the first book to offer an authoritative account of women s history throughout the nineteenth century James McMillan author of the seminal work Housewife or Harlot offers a major reinterpretation of the French past in relation to gender throughout these tumultuous decades of revolution and war This book provides a challenging discussion of the factors which made French political culture so profoundly sexist and in particular it shows that many of the myths about progress and emancipation associated with modernisation and the coming of mass politics do not stand up to close scrutiny It also reveals the conservative nature of the republican left and of the ingrained belief throughout french society that women should remain within the domestic sphere James McMillan considers the role played by French men and women in the politics culture and society of their country throughout the 1800s

The Discovery of France Graham Robb, 2008-10-17 A witty engaging narrative style Robb s approach is particularly engrossing New York Times Book Review A narrative of exploration full of strange landscapes and even stranger inhabitants that explains the enduring fascination of France While Gustave Eiffel was changing the skyline of Paris large parts of France were still terra incognita Even in the age of railways and newspapers France was a land of ancient tribal divisions prehistoric communication networks and pre Christian beliefs French itself was a minority language Graham Robb describes that unknown world in arresting narrative detail He recounts the epic journeys of mapmakers scientists soldiers administrators and intrepid tourists of itinerant workers pilgrims and herdsmen with their millions of migratory domestic animals We learn how France was explored charted and colonized and how the imperial influence of Paris was gradually extended throughout a kingdom of isolated towns and villages The Discovery of France explains how the modern nation came to be and how poorly understood that nation still is today Above all it shows how much of France past and present remains to be discovered A New York Times Notable Book Publishers Weekly Best Book Slate

Best Book and Booklist Editor's Choice **Migration and the International Labor Market 1850-1939** Tim Hatton, Jeffrey Williamson, 2005-08-12 Migration and the International Labor Market 1850-1939 focuses on the economic aspects of international migration during the era of mass migrations Célestine Gillian Tindall, 2014-11-18 Late on a summer afternoon in the very heart of rural France in a small centuries old house newly abandoned to its ghosts Gillian Tindall came upon a cache of letters dating from the 1860s Neatly folded and carefully tucked away all were addressed to the village innkeeper's daughter Celestine All but one were proposals of marriage Celestine Chaumette 1844-1933 was to reject each of these suitors to wed another yet she preserved the letters keeping them throughout her long life Something about the letters about the woman who had so clearly cherished them fired the historian's curiosity and the novelist's imagination With a house in Chassignolles Celestine's village Ms Tindall would spend years searching in dusty archives and farmhouse attics probing the memories and myths of the men and women from the village and the surrounding countryside The treasure she unearthed reaches far beyond the mystery of Celestine to tell of a vanished way of life of a century of revolutionary change and of the strange persistence despite all of the past The result is both moving and profound It is as M R D Foot wrote in the London Spectator a touching picture of a world we have lost and social history at its best **Regeneration Through Empire** Margaret Cook Andersen, 2015 Following France's defeat in the Franco-Prussian War in 1870-71 French patriots feared that their country was in danger of becoming a second rate power in Europe Decreasing birth rates had largely slowed French population growth and the country's population was not keeping pace with that of its European neighbors To regain its standing in the European world France set its sights on building a vast colonial empire while simultaneously developing a policy of pronatalism to reverse these demographic trends Though representing distinct political movements colonial supporters and pronatalist organizations were born of the same crisis and reflected similar anxieties concerning France's trajectory and position in the world Regeneration through Empire explores the intersection between colonial lobbyists and pronatalists in France's Third Republic Margaret Cook Andersen argues that as the pronatalist movement became more organized at the end of the nineteenth century pronatalists increasingly understood their demographic crisis in terms that transcended the boundaries of the metropole and began to position the French empire specifically its colonial holdings in North Africa and Madagascar as a key component in the nation's regeneration Drawing on an array of primary sources from French archives Regeneration through Empire is the first book to analyze the relationship between depopulation and imperialism *French Literature, Thought and Culture in the Nineteenth Century* Brian Rigby, 1992-11-10 This volume adopts a varied approach to the study of the material world in the French literature thought and visual arts of the 19th century Contributors look not only at the Romantic and Realist transcendence of the Neo-classical heritage of abstraction and idealism but also adopt modern critical perspectives to analyse central themes such as urbanisation fetishism and the representation of the female body **Challenging Authority** Michael P. Hanagan, Leslie Page Moch, Wayne Ph Te

Brake,1998 As long as there have been formal governments there has been political contention an interaction between ruler and subjects involving claims and counterclaims compliance or resistance cooperation resignation condescension and resentment Where political studies tend to focus on either those who rule or those who are ruled the essays in this volume call our attention to the interaction between these forces at the very heart of contentious politics Written by prominent scholars of political and social history these essays introduce us to a variety of political actors peasants and workers tax resisters and religious visionaries bandits and revolutionaries From Brazil to Beijing from the late Middle Ages to the present all were or are challenging authority The authors take a distinctly historical approach to their subject writing both of specific circumstances and of larger processes While tracing their origins to the social history and structural sociology approaches of the sixties and seventies the contributors have also profited from subsequent critiques of these approaches Taken together their essays demonstrate that the relationship between mobilization for collective action and identity formation is a perennial problem for protest groups a problem that the historical study of contentious politics with its focus on political interaction can do much to explain

The Future of Economics Alexander J. Field,2020-03-10 Originally published under the title *The Future of Economic History* this book attempts to chart a new course for the intellectual discipline known as economic history and determine its contributions to the study of economics The authors suggest new and potentially fruitful areas and approaches for research and at the same time analyze the weaknesses in past efforts to chart a course for the future

The Future of Economic History Alexander J. Field,2012-12-06 This collection represents a modest attempt to chart a new course for the intellectual discipline known as economic history The book is not about productivity growth in the 1990s lest the title give rise to any confusion As a group these essays suggest new and potentially fruitful areas or approaches for research and at the same time address weaknesses in past efforts One important audience will be graduate students attempting to decide whether to write a dissertation in economic history or trying to select or refine dissertation topics in the area and determine how to approach them Some of the essays will most certainly be appropriate additions to the or semester courses in economic history that remain a fixture in quarter graduate economics training programs A second audience should be established scholars who are now or have in the past done research in economic history and are interested in the perspectives of a relatively younger group of scholars The term younger is used here advisedly to describe a group of scholars born between 1943 and 1954 Nevertheless the authors of these essays can on at least one dimension be distinguished from the pathbreaking new economic historians who established their academic reputations in the early 1960s Indeed the contributors to this volume include students of such pioneers as Richard Easterlin Albert Fishlow William Parker and Jeffrey Williamson

Practiced Citizenship Nimisha Barton,Richard S. Hopkins,2019-01-01 Over fifty years ago sociologist T H Marshall first opened the modern debate about the evolution of full citizenship in modern nation states arguing that it proceeded in three stages from civil rights to political rights and finally to social rights The shortcomings of

this model were clear to feminist scholars As political theorist Carol Pateman argued the modern social contract undergirding nation states was from the start premised on an implicit sexual contract According to Pateman the birth of modern democracy necessarily resulted in the political erasure of women Since the 1990s feminist historians have realized that Marshall s typology failed to describe adequately developments that affected women in France An examination of the role of women and gender in welfare state development suggested that social rights rooted in republican notions of womanhood came early and fast for women in France even while political and economic rights would continue to lag behind While their considerable access to social citizenship privileges shaped their prospects the absence of women s formal rights still dominates the conversation Practiced Citizenship offers a significant rereading of that narrative Through an analysis of how citizenship was lived practiced and deployed by women in France in the modern period Practiced Citizenship demonstrates how gender normativity and the resulting constraints placed on women nevertheless created opportunities for a renegotiation of the social and sexual contract

Schism and Solidarity in Social Movements Christopher K. Ansell, 2001-10-01 Like many organizations and social movements the Third Republic French labour movement exhibited a marked tendency to schism into competing sectarian organizations During the roughly 50 year period from the fall of the Paris Commune to the creation of the powerful French Communist Party the French labour movement shifted from schism to broad based solidarity and back to schism In this 2001 book Ansell analyses the dynamic interplay between political mobilization organization building and ideological articulation that produced these shifts between schism and solidarity The aim is not only to shed light on the evolution of the Third Republic French labour movement but also to develop a more generic understanding of schism and solidarity in organizations and social movements To develop this broader understanding the book builds on insights drawn from sociological analyses of Protestant sects and anthropological studies of segmentary societies as well as from organization and social movement theory

Migration, Mobility and Modernization David J. Siddle, 2000-01-01 For almost a hundred years the academic study of migration concentrated on evolving standardised models of migration behaviour based on data from censuses or the registration of births marriages and deaths More recently it has been realised that such models fail to take into account the decision making behind migration and that better understanding will come from study of the behaviour of individuals as well as aggregate numbers In this book the imaginative use of alternative sources DS for example apprentice books guild and craft records legal and court documents diaries and biographies DS gives fresh insights into the processes of movement to reveal much more complex circulatory behaviour than the standard models derived from census and registration sources alone have suggested The first chapter confronts the issue of rural mobility in post famine Ireland and is followed by a study centred on Alpine rural families which built impressive networks across pre industrial Western Europe Two chapters focus on the particular characteristics of worker groups mining families of south Lancashire during the

period of rapid increase in coal production in the eighteenth century and the organised mobility of skilled labour in nineteenth century central Europe Next an imaginative and rigorous deployment of the techniques of family reconstruction and record linkage embracing a variety of sources vital event registers wills port books apprentice records teases out the migration histories of those who settled in eighteenth century Liverpool There are two chapters on female migrant behaviour drawing attention in the case of eighteenth century Rheims to the opportunities and restrictions on the life of migrant women at different points in their lifecycles and showing how poor women struggled to survive in nineteenth century Dublin The final chapter uses family histories assembled by numerous genealogists and family historians to challenge the orthodox view of direct stepwise migration from a smaller to a larger town in the urban hierarchy

France, 1800-1914 Roger Magraw, 2014-07-22 Nineteenth century France was a society of apparent paradoxes It is famous for periodic and bloody revolutionary upheavals for class conflict and for religious disputes yet it was marked by relative demographic stability gradual urbanisation and modest economic change class conflict and ongoing religious and cultural tensions Incorporating much recent research Roger Magraw draws both upon still valuable insights derived from the new social history of the 1960s and upon more recent approaches suggested by gender history cultural anthropology and the linguistic turn

Migration, Regionalization, Citizenship Katja Sarkowsky, Rainer-Olaf Schultze, Sabine Schwarze, 2014-12-04 From the perspectives of the political sciences as well as literature and language studies this volume looks comparatively at Canadian and European constellations of cultural and linguistic diversity By so doing it takes Canada as exemplary for the effects of transnationalization regionalization and cultural and linguistic diversification on notions of citizenship and processes of identity formation

Games Without Frontiers John Williams, 2017-09-29 What is the historical appeal of football How diverse are its players supporters and institutions throughout the world What are its various traditions and how are these affected by pressures to modernize In what ways does the game help to reinforce or overcome social differences and prejudices How can we understand football's subcultures especially football hooligan ones The 1994 World Cup Finals in the United States have again demonstrated the conflicts which exist around football over its international future The multi media age beckons new audiences for top level matches but worries remain that the historical and cultural appeal of football itself may be the real loser The global game has a breadth of skills playing techniques supporting styles and ruling bodies These are all subject to local and national traditions of team play and fan display Modern commercial influences and international cultural links through players and fan styles are accommodated within the game to an increasing extent Yet football's ability to differentiate remains at local regional national and even continental levels In some cases the game's traditions ensure that these differences are becoming as oppositional today as is modern football hooliganism But the overall picture is one of a game without frontiers rich in historical and cultural detail pluralistic in its traditions and identities This volume brings together essays by leading academics and researchers writing on world football Their studies draw on interdisciplinary

researches in England Scotland France Italy Germany Austria Argentina and Australia The book will be of interest to students of sports science cultural studies and social science and to all those who simply enjoy football as the world's greatest sporting passion
