Dariush Zahedi assesses the Islamic Republic's potential for revolution through an in-depth theoretically informed comparative analysis of the present with 1979 pre-Revolutionary Iran. Zahedi discusses how the potential for a revolutionary coup is based on two things: the inherent defects and vulnerabilities in the regime and the coordinated actions of the social groups and individuals opposed to the regime. He also identifies two ideal typical forms of revolutionary change: the regime collapses on its own or the regime is overthrown. He concludes that the chances for overthrowing the present regime are moderate.

Intellectual Discourse and the Politics of Modernization Ali Mirsepassi, 2000-10-12 In this thought-provoking study Ali Mirsepassi explores the concept of modernity exposing the Eurocentric prejudices and hostility to non-Western culture that have characterized its development. Focusing on the Iranian experience of modernity he charts its political and intellectual history and develops a new interpretation of Islamic Fundamentalism through the detailed analysis of the ideas of key Islamic intellectuals. The author argues that the Iranian Revolution was not a simple clash between modernity and tradition but an attempt to accommodate modernity within a sense of authentic Islamic identity, culture and historical experience. He concludes by assessing the future of secularism and democracy in the Middle East in general and in Iran in particular. A significant contribution to the literature on modernity, social change and Islamic Studies, this book will be essential reading for scholars and students of social theory and change, Middle Eastern Studies, Cultural Studies and many related areas.

Including work from seminal figures such as Hatto and Gottschalk in the 1940s as well as the most important literature all the way through 1998, the articles reprinted here consider the concept, theory and causes of revolution, revolutionary state building and the outcomes of revolutions, case studies of great revolutions and much more.

From Revolution to War Patrick J. Conge, 2010-05-25 In the history of international relations few events command as much attention as revolution and war. Over the centuries revolutionary transformations have produced some of the most ruinous and bloody wars. Nevertheless the breakdown of peace in time of revolution is poorly understood. Patrick Conge offers a groundbreaking study of the relationship between war and revolution. How can we best understand the effect of revolutionary transformations on the politics of war and peace? Conge argues that it is only by bringing in first the organizational capacity of revolutionary regimes to extract resources and convert them into military strength and second the power of transformative ideas to transcend national boundaries and undermine the ability of opposing regimes to compromise that we are best able to understand the effect of revolution on the origins and persistence of war. By incorporating such key elements this book provides a new, more comprehensive explanation of the relationship between revolution, war and peace. Conditions that lead to and sustain wars in general are identified and placed in the light of revolutionary transformations. Once the argument is presented, historical case studies are used to test its plausibility. Conge demonstrates the importance of the effect of revolutionary organization and ideas on the outcome of conflicts. Political scientists, historians, sociologists and the general

reader interested in the politics of war and peace in revolutionary times are given new perspectives on the relationship between revolution and war as well as on the implications of political organization for military power and the process of consolidation of new regimes Patrick J Conge is Assistant Professor of Political Science University of Arkansas

Liberal Nationalism In Iran Sussan Siavoshi,2019-04-08 This book examines the rise and fall of the liberal nationalist movement in Iran It provides an analysis of the National Fronts successes and failures focusing on their interactions with both the other contenders including the government and international factors Durkheimian Sociology Jeffrey C. Alexander,1990-09-13 The classic works of Emile Durkheim are characterized by a structural approach to the understanding of collective behaviour and it is this element of his writings that has been most taken up by modern social science This volume however rejects the dominant structural approach and draws instead on Durkheim s later work in which he shifted to a symbolic theory of modern industrial societies that emphasized the importance of ritual and placed the tension between the sacred and the profane at the center of society In so doing the contributors offer both a radically different approach to Durkheimian sociology and a new way of linking the interpretation of culture and the interpretation of society In his introduction to the volume Jeffrey Alexander elaborates the new interpretation of Durkheim that informs the contributions His arguments form a background for the lively and provocative chapters that follow which provide broadly cultural interpretations of such topics as popular upheavals and social movements ranging from the French Revolution to the massive rebellions in Poland and Nicaragua in the 1980s political crisis from Watergate to the crisis of legitimation in contemporary capitalism and the creative and contingent element in symbolic behaviour including the symbolics of intimate friendship and the ritual and rhetoric of media events In addition to re examining Durkheimian sociology the essays also demolish the myth that attention to cultural values implies conservatism or the inability to analyze social change and challenge the common antithesis between normative theory and microsociology Its exploration of the links between Durkheimian sociology and the most important developments in contemporary sociology history anthropology and semiotics will ensure it a broad appeal across the social sciences *Politics of Confrontation* Babak Ganji,2006-04-28 Did the United States know more than it acknowledges about growing unrest under the Shah in mid 1970s Iran Have historians of American Iranian relations focused too narrowly on prevailing historical theory and personal recollection In a period of escalating tension between the United States and Iran what can the two nations history of conflict tell us about their diplomatic future Covering Carter s policy from the end of the Shah s reign to the revolution under Ayatollah Khomeini Babak Ganji explores the nature of their perpetually

antagonistic relations and the mistrust and misunderstanding that fuels it *Politics of Confrontation* is a penetrating critique of international relations theory within the historical framework of US Iranian relations as well as a thorough examination of American policy towards Iran It is the first in depth look at documents seized by revolutionary students from the American Embassy during the infamous hostage crisis and debunks the myth that US officials were unaware of the nature of opposition to the Shah or of Soviet influence on senior clerics These findings are an essential addition to the discourse of foreign policy theorists and invaluable for historians of the US Iran and the Cold War

State and Religion in the Arab World Khair El-Din Haseeb, 2017-12-22 This collection focuses on the controversial relationship between religion and the state within the Arab Spring context and the evolving debates on democratic transition In this book democracy is not questionable it is hailed by all those vocal on the political scene The array of opinions presented here varies from a call for a secular state based on Islamic philosophy to a call for setting democratic institutions before working on solving this religion state dichotomy Meanwhile some prefer to have an ambiguous stand on which side to back up the liberals or the Islamists despite a detailed criticism of the ossified ways of those calling for a religious state *Al Majd* The book starts with an analysis and a detailed account of how the sensitive issue of the relationship between state and religion developed in Arab thought and society and it goes on to employ less the religious discourse in presenting their positions thus focusing on actual cases of this struggle for power in different Arab countries such as Tunisia and Egypt The collection also provides insights and analysis of the ongoing debates and views on the role of religion in Libya and provides an analysis of the case of Morocco In addition to this there is a special chapter that deals with how Muslim communities living in the West adapt to secular state politics The collection ends with a thorough discussion by a number of Arab intellectuals and activists Muslims and Christians alike whereby core issues related to the debate on state and religion are presented This discussion in addition to reflecting the Islamist secular dichotomy demonstrates the richness of the ongoing debates that extend well beyond the discourse on this dichotomy This book is a compilation of articles published in *Contemporary Arab Affairs*
