Long-range Effects of Child and Adolescent Sexual Experiences Allie C. Kilpatrick, 2014-06-03 Making a unique contribution of placing the current sexual exploitation of children and adolescents firmly in its historical context this book looks at the family's and society's roles in child and adolescent sex abuse Unlike most previous studies this study allows a range of responses from negative to positive and avoids the methodological problems inherent in many other studies Most studies combine the age groups of children and adolescents whereas this study separates these different age groups and compares the nature and outcome of sexual experiences of children with those of adolescents Utilizing sophisticated analytical measures the author's findings repudiate many commonly held assumptions and serve to calm current hysteria regarding sexual abuse of minors Written to disseminate findings that could be helpful in realistically confronting the phenomenon of human sexuality the results presented in this book dispel many current myths about early sexuality including ethnic differences The author wanted to separate scientific inquiry from the perpetration of pervading mores or social norms and identify the real menaces to healthy adult functioning

Transforming Hate to Love Melvyn Rose,2003-09-02 The Peper Harow residential community was founded in 1970 and gained international repute for its pioneering work with disturbed adolescents For over 20 years this remarkable establishment provided a therapeutic environment for teenagers who had often suffered appalling abuse and yet for whom the state s only remedial provision until then had been in the punitive form of the approved schools In Transforming Hate to Love Melvyn Rose the community s founder assesses Peper Harow s success in managing disturbed behaviour and offers views on areas where the establishment could have responded more effectively to the needs of its residents His study is complemented by the testimony of ex residents helped by Peper Harow to overcome their fears and abandon their disruptive behaviour The overwhelmingly positive outcome indicates the need for a review of current social policy towards deviant youth and shows how society as a whole would benefit from a psychodynamic view of the causes of criminality and mental ill health among the young
