*The PDS - A symbol of eastern German identity?* Adrian Webb, 2009-03-26 Die Linke, the Left, is now Germany's third largest political party and the fourth largest political grouping in the Bundestag, Germany's parliament. Die Linke, however, is the result of a fusion in June 2007 between the left wing of the German Social Democratic Party (SPD) and the Partei des demokratischen Sozialismus (PDS), the successor to East Germany's former, effectively Communist, ruling party, the SED. In practice, the PDS contributed 60,000 of the new party's 72,000 members, making Die Linke an essentially eastern German party. Moreover, the PDS had been unique in enjoying a level of electoral success denied to other Communist successor parties, which had not turned themselves into mainstream social democratic parties within the new liberal democratic order. This book, employing the period 2001-03 for its detailed analysis, suggests that this uniqueness is best understood as either an expression of eastern German national sentiment or as deriving from a reinterpretation of Marxism attuned to the interests of a democratic twenty-first century society, and the book explores

these alternative understandings in turn. Noting both the historic distinctiveness of German capitalism and the contradictions within German communism it concludes that the PDS now fused in Die Linke remains nourished by the particularism of eastern Germany.

**Longman Companion to Germany since 1945** Adrian Webb, 2014-09-09 This new Companion provides a wealth of information on the history of Germany since the Second World War including much material which is not readily available. Throughout equal attention is devoted to East and West Germany and covers political, social, cultural and economic developments. The author provides information on, for example, political parties and office holders, living standards, crime and the environment, Germany's relationship with the European Union and East Germany up to 1990. Attention is also devoted to topical issues such as opposition and dissent in the East, terrorism, neo-nazism and racial violence. An essential reference book for anyone studying or teaching postwar Germany in history or politics departments.

The book embraces all major aspects of British history, government and society, reflecting the massive social, political and economic changes that have transformed the face of Britain since the end of the Second World War. Fully revised and updated, this new edition covers the advent of Tony Blair, the electoral victory of New Labour in 1997 and the major constitutional changes currently underway in Britain. This book will be invaluable to anyone interested in the history and politics of post-war Britain, from students and teachers to party activists and lovers of reader-friendly reference books.

White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war
