

FIGURE 1. A Committee of Safety marker which closely follows the pattern of the English Brown Bone markers. In 1779 the North Carolina Committee of Safety ordered to "employ immediately all the Gunsmiths in the Colony in the making of Muskets and Bayonets, of the size and manner recommended by Congress..." Surviving specimens are very rare and no North Carolina pieces are presently known. This marker was made in Philadelphia. The barrel is marked "PHILADELPHIA COUNTY" and at the breech has the C.F. monogram printed next to a Committee of Safety signature. The lock is marked "NICHOLSON" for John Nicholson. The bore is .60 caliber and the barrel length 48 inches.

While the approach of the bicentennial of the American Revolution, increased interest in arms of the period has created an intense need for detailed studies on period armaments. Quite naturally, arms made in America during the Revolution are period have drawn the most excitement and are in the most demand, yet at the same time they have become unobtainable at times in the United States because of inadequate documentation. The American arms of the Revolutionary years are not always common to well-documented pieces such as those followed in England and France during the period, and although the Committee of Safety drew up specifications for arms to be made under contract, these specifications were not always rigidly adhered to. Raw material scarcity, lack of machine, and other problems were responsible for this.

During the forty years preceding the Revolution, the military arm most loyalist to the nation was the so-called "Brown Bess" musket, the standard small-arm of the British Empire from the late 1720's until after the War of 1812. In England, and probably in the Colonies as well, this musket was referred to as the "long land pattern" musket, if it had the forty-two inch barrel, or the "short land pattern" musket, if it had the forty-two inch barrel. Today these pieces are commonly referred to as First and Second Model Brown Bess. The Second Model, forty-two inch barrel musket, began to be issued in quantity in the early 1760's, with certain superficial modifications to hardware. Eventually, the Second Model superseded the First Model.

When it became necessary to begin production of their preparation for war, they saw the Brown Bess for a pattern, the model had been in use in the militia and Regulars for many French, Dutch, and German.
