Social Technologies for Inclusive Development: Multilevel Policy and Practices Kleinsy Bonilla, Susana Arrechea, Luis Guillermo Velásquez Pérez, Efraín Bámaca-López, 2025-05-15

Social technologies fostering inclusion represent a contemporary research paradigm that has resurfaced. Broader discussions aim to expand the scope of science technology and innovation beyond purely economic considerations into the social domain. Hernán Thomas suggests that innovative solutions encompass a broad spectrum of approaches for conceiving, constructing, implementing, and overseeing technological interventions tailored to address pressing social and environmental challenges. These solutions strive to stimulate the emergence of socially inclusive and sustainable economic dynamics in various areas including nutrition, housing, energy, clean water access, transportation, and communication. This multifaceted approach reflects a commitment to harnessing technology's potential for the betterment of society at large. This Research Topic focuses on showcasing experiences, strategies, and policies in science technology and innovation primarily in the context of Latin America. Such experiences, strategies, and policies aim to reduce social disparities and stimulate development. This article collection welcomes multifaceted approaches including comparative analysis, policy evaluations, community case studies, and more. Additionally, it engages with theoretical discussions on the influence of scientific and technological paradigms on public management, examining how these paradigms shape policy design, implementation, and technology integration. Furthermore, this Research Topic aims to explore recent technological advancements particularly in the realms of digital transformation and data-driven decision making as tools to forge new avenues for social inclusivity. By delving into these innovations, the collection aims to facilitate knowledge on innovative solutions, improve governance practices, and foster greater citizen involvement. Overall, this research initiative aims to contribute to the burgeoning literature on social technologies for social inclusion. It will critically assess the strengths and limitations of multilevel interventions, offering paradigmatic case studies and pinpointing unexplored opportunities within this field, thereby advancing our understanding and enhancing discourse in this critical area of study.
