Artists as Inventors, Inventors as Artists Dieter Daniels, 2008 Using both historical and contemporary examples this publication traces the complex relationships between art technology and science focusing on technological and artistic media from the nineteenth century to the present day The interplay of technological invention and artistic innovation requires a variety of methods ranging from the fine arts and cultural studies to the history of science and media archaeology Among the key themes which the contributions examine from a variety of perspectives are the status of technology as a shared feature of or boundary object between art and science the conflicts among ethical aesthetic and economic values in the system of art versus that of technology the paradox that inventions are regarded as achievements of individual geniuses but can actually only be made and successfully applied if they have been sanctioned by the sociohistorical zeitgeist BOOK JACKET *The American Bar* ,2006 **California Minority Business Enterprises Directory** ,1979 The ...
