Opera for Everyone Megan Steigerwald Ille, 2024-04-15 *Opera for Everyone* The Industry's Experiments with American Opera in the Digital Age draws on seven years of multi-sited ethnography to examine the acclaimed experimental productions of Los Angeles-based opera company The Industry. Steigerwald Ille understands The Industry's productions as part of an emerging wave of U.S. operas that integrate new media and interactive performance through means such as site-specificity and simulcast video and then traces the company's path from Crescent City 2012 the company's first production to Sweet Land 2020 the company's final production before switching to a new production model. Steigerwald Ille argues that by moving opera outside of the opera house The Industry's productions expose the economic and aesthetic structures key to the circulation of operatic performance at the same time that they deploy opera as a tool for digital listening community engagement popular entertainment and commentary on systemic racism and settler colonialism. Through ethnographic work with The Industry's creators and performers and close examination of the company's first decade of work this book reveals how The Industry paradoxically provides both a roadmap and boundary line for experimental and traditional companies trying to find new ways to approach operatic performance in the twenty-first century United States. *Unequal Cities* Richard McGahey, 2023-01-10 Cities are central to prosperity they are hubs of innovation and growth. However the economic vitality of wealthy cities is marred by persistent and pervasive inequality and deeply entrenched anti-urban policies and politics limit the options to address it. Structural racism suburban subsidies regional government fragmentation the hostility of state legislatures and federal policy all contribute to an unequal status quo that underfunds cities while preventing them from pursuing fairer outcomes. Economist Richard McGahey explores how cities can foster equitable economic growth despite the obstacles in their way. Drawing on economic and historical analysis as well as his extensive experience in government and philanthropy he examines the failures of public policy and conventional economic wisdom that have led to the neglect of American cities and highlights opportunities for reform. *Unequal Cities* features detailed case studies of New York Detroit and Los Angeles tracing how their attempts to achieve greater equity foundered because of the fiscal and political constraints imposed on them. McGahey identifies key lessons about the political coalitions that can overcome anti-urban biases arguing that alliances among unions environmentalists and communities of color can help cities thrive. But he warns that cities cannot solve inequality on their own political action at state and federal levels is necessary to achieve systemic change. Shedding light on the forces that produced today's dysfunction and disparities *Unequal Cities* provides timely policy prescriptions to promote both growth and equity. , **A Search for Common Ground** Frederick M.
