Ayuntamientos, fiscalidad y transporte: la tributación de los vehículos de movilidad personal Fernández Caballero, Zuley, Sánchez Huete, Miguel Ángel, Fernández Amor, José Antonio, 2024-03-14 En los últimos años se han producido cambios fundamentales en la movilidad de nuestras ciudades que están transformando el paradigma de los desplazamientos cortos dentro de ellas El vehículo a motor entendido en su sentido tradicional ya no es el protagonista y ha dado paso a un uso compartido de la vía donde motocicletas bicicletas bicicletas con pedaleo asistido vehículos de movilidad personal VMP y peatones cobran cada día más importancia No hay duda de que los VMP se han convertido en una opción legítima para mucha gente Pero para su encaje definitivo habrá que validar la seguridad que ofrecen y reordenar las ciudades si se pretende realmente conseguir resultados en términos de seguridad vial y sostenibilidad En este contexto un elemento importante de ciudades españolas y del mundo se encuentran con una regulación de estos nuevos vehículos que muchas veces está por detrás de su expansión y desarrollo y se enfrentan a otras dificultades como su estacionamiento compitiendo por la utilización del dominio público con otros usuarios su aptitud como vehículos para circular o incluso cuando se trata de empresas explotadoras de su uso su incorporación pacífica en la red de transporte discrecional previamente existente en la que un actor fundamental es el taxi Asimismo debemos destacar que los Ayuntamientos incurren en gastos por la gestión de la circulación por los espacios públicos por garantizar la seguridad vial y el fomento de una movilidad sostenible Por lo que requieren de ingresos suficientes que les permitan satisfacer dichos gastos Dentro de estos ingresos las entidades locales pueden establecer y exigir tributos de acuerdo con la Constitución y las leyes En efecto se establecen distintas figuras tributarias pertenecientes a los municipios que gravan a otros vehículos principalmente vehículos de tracción mecánica Sin embargo no existe ninguna disposición que se refiera específicamente a la fiscalidad de los VMP y se aprecian lagunas o espacios dentro del ordenamiento jurídico que requieren para colmarlos la utilización de normas similares y la aplicación de técnicas de integración jurídica También a nivel tributario la controversia que se genera pivota entre fomentar este tipo de movilidad sostenible y escasamente contaminante con el hecho de que se ocupe y use la vía y espacios públicos A tal dicotomía hemos de añadir una tercera variable y que resulta de la explotación económica de los vehículos de movilidad personal Este nuevo

punto de vista permite dimensionar en toda su complejidad un fenómeno creciente en nuestras ciudades que no se cierra a la promoción del uso de tales vehículos. Este estudio examina precisamente la idoneidad de los instrumentos jurídico tributarios del ámbito local para obtener ingresos con los que cubrir los costes que implica la ordenación de la circulación urbana afectada por la inclusión de estas nuevas formas de transporte. El libro incorpora los principales resultados alcanzados con el desarrollo del proyecto Tributación en el ayuntamiento de Barcelona sobre empresas explotadoras de vehículos de movilidad personal financiado por el Ilustre Colegio de Abogados de Barcelona que obtuvo el premio Ferrer Eguizabal a mejor proyecto en Derecho Financiero y Tributario 2020. Aunque el proyecto que da origen a esta obra estuvo pensado inicialmente para ser de aplicación en el Ayuntamiento de Barcelona, las líneas de regulación y las propuestas de ley ferenda que aparecen recogidas en ella giran en torno a la tributación de nuevas formas de movilidad caracterizada por los VMP en todo el ámbito local.
