*Paradigm Lost?* David Jablonsky, 1993. After every momentous event, there is usually a transition period in which participants in the events, whether individuals or nation states, attempt to chart their way into an unfamiliar future. In the United States in this century, there are three such transitions, each focused on America's role in the international arena. After World War I, the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security. In contrast to this, after World War II, the United States moved inexorably toward international leadership in response to the Soviet threat. The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two superpowers in a twilight war that lasted for over 40 years. Sometime in the penultimate decade of the 20th century, the United States and its allies won the cold war. Once again, in the current transition period, the primary questions revolve around the management of power and America's role in global politics. Once again, there are the issues of change and continuity. In terms of change, the cold war set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition. The integrative force that increasingly linked global economies in the cold war, for instance, also holds out the spectral potential of global depression or, at the very least, nations more susceptible to disintegrative actions as the Iraqi invasion of Kuwait demonstrated. In a similar manner, the advances in communications and transportation that have spread the results of medical and scientific discoveries around the world are countered by the malign transnational results of nuclear technology, the drug trade, terrorism, AIDS, and global warming.

*Narrative, Social Myth and Reality in Contemporary Scottish and Irish Women's Writing* Tudor Balinisteanu, 2009-10-02. This book offers an original interdisciplinary analysis of the relations between myth, identity, and social reality, involving elements of narratology, theory, linguistics, philosophy, anthropology, and social theory, harnessed to support an argument firmly located in the area of literary criticism. This analysis yields a fairly extensive reinterpretation of the concept of myth, which is applied to the examination of the relationship between narrative and social reality as represented in texts by contemporary Scottish and Irish women writers. The main theoretical sources are Mikhail Bakhtin's theories of heteroglossia, Jacques Derrida's theories of citationality, and Judith Butler's theories of subjectivity. The analysis framework developed in the book uses these theories to create a new way of understanding how literary texts change readers' worldviews by enticing them to accept alternative possibilities of cultural expression of identity and social order. The texts analysed in this book reconfigure naturalised stories that have become normative and constraining in conveying identities and visions of legitimate social orders. The book's focus on feminine identities places it alongside feminist analyses of reconstructions of fairy tales, myths, or canonical stories that

establish what counts as legitimate feminine identity Studied here for the first time together the writers whose texts form the interest of this book continue the revisionist work begun by other women writers who engage with the male generated literary philosophical and humanist tradition They share a view of narratives as tools for continually negotiating our identities social worlds and socialisation scenarios While the high level theoretical discourse of the first part of the book requires specialised knowledge the second part of the book offering close readings of the texts is both lively and accessible and should engage the interest of the general reader and academic alike This book is written for all those who are interested in the power words have to hold sway over our inner and outer social worlds

**Lost Worlds** Kevin Foster,2009-09-07 Think of Latin America and what do you see Escape Adventure Chaos Oblivion Lost Worlds explores how these stereotypes came into being and what they tell us about ourselves Examining a range of texts from Southey's epics to Naipaul's essays from Conan Doyle's gentlemen adventurers to Kerouac's restless hipsters this book reveals the role that Latin America has played in British US and Australian endeavours in the nineteenth and twentieth centuries Over the last 200 years Latin America has served the West as an imaginary realm where its highest hopes and deepest anxieties might be realised

**The Constructivist Metaphor** Nancy Nelson Spivey,2023-07-24 The Constructivist Metaphor presents a major reconsideration of constructivist theory through an applied examination of the ways in which people create meaning for texts Spivey first delineates major constructivist positions from the early 20th century including Frederic Bartlett's description of the discourse processes of individuals small groups and large communities Then she concentrates on reading and writing processes as they were variously perceived throughout the 1970s and 1980s These cultural and cognitive

avenues of investigation provide an essential starting point for her presentation of the late 20th century approaches to the generative organizational and selective nature of human communication The work illustrates an integrative conception of discourse placing cognitive activity in relation to the text while assuming a social orientation encompassing both composition and comprehension It describes constructivist concepts in terms of their similarities and differences It applies theoretical positions to case studies in reading and writing and presents conclusions useful to scholars working on issues of comprehension and communication

**Paradigm Lost?** David Jablonsky, 1995-03-24 This book examines major historical post war transition periods with particular emphasis on the differences and similarities of the American experience after both world wars of this century and with the post Cold War transition currently underway Jablonsky provides a strategic vision that incorporates a multilateral great power approach to the international relations of our era After every momentous event there is usually a transition period in which participants in the events whether individuals or nation states attempt to chart their way into an unfamiliar future For the United States in this century there are three such transitions each focused on America's role in the international arena After World War I the American people specifically rejected the global role for the United States implicit in Woodrow Wilson's strategic vision of collective security In contrast to this return to normalcy after World War II the United States moved inexorably toward international leadership in response to the Soviet threat The result was an acceptance of George Kennan's strategic vision of containing the Soviet Union on the Eurasian landmass and the subsequent bipolar confrontation of the two super powers in a twilight war that lasted for more than 40 years Sometime in the penultimate decade of this century the United States and its allies won the Cold War Once again the United States faces a transitional period and the primary questions revolve around the management of power and America's role in global politics In this regard the Cold War set in train a blend of integrative and disintegrative forces and trends that are adding to the complex tensions of the current transition The realist paradigm still pertains in this situation where nation states are still the primary international actors In such a world American government elites must convince an electorate increasingly conscious of the domestic threats to national security of the need to continue to exercise global leadership in the management of power The answer as Jablonsky demonstrates is a strategic vision that incorporates a multilateral great power approach to international relations

The Lost and Forgotten Gospel of the Kingdom, Second Edition Steven Service, 2015-12-31 Most traditions within Christianity would agree that the gospel is the story of the life death burial and resurrection of Jesus Problematically this common contemporary definition does not fit logically with the biblical texts that reference the term Consider Mark 1:14 Galatians 3:8 Hebrews 3:16 4:2 Luke 3:18 9:6 If Jesus did not speak overtly regarding His intent to die sacrificially until the very end of His earthly ministry what gospel did He preach at the start of His ministry What gospel first came to Abraham and was also preached in the days of Moses What gospel was known by John the Baptist before he baptized Jesus What gospel was preached by Jesus' disciples prior to knowing that their Rabbi would go to the cross

This study not only elucidates the factors that contributed to the loss of the biblical definition of the term gospel but also restores its meaning and offers a first century perspective of Hebraic Spirituality *The Handbook of Historical Linguistics, Volume II* Richard D. Wynne Edwin Baxter, 1903 Opportunity Lost Marcus D. Pohlmann, 2008 In *Opportunity Lost* Marcus D Pohlmann examines the troubling issue of why Memphis city school students are underperforming at alarming rates His provocative interdisciplinary analysis combining both history and social science examines the events before and after desegregation compares a city school to an affluent suburban school to pinpoint imbalances and offers critical assessments of various educational reforms In addition to his analysis of the problems Pohlmann lays out educational reforms that run the gamut from early intervention and parental involvement to increasing teacher compensation improving time utilization and more Pohlmann s illuminating and original study has wide application for a problem that bedevils inner city children everywhere and prevents the promise of equality from reaching all of our nation s citizens Book cover **Pastime Lost** David Block, 2019-04-01 Long before baseball became America s national pastime English citizens of all ages genders and classes of society were playing a game called baseball It had the same basic elements as modern American baseball such as pitching and striking the ball running bases and fielding but was played with

a soft ball on a smaller playing field and instead of a bat the ball was typically struck by the palm of the hand There is no doubt however that this simpler English version of baseball was the original form of the pastime and was the immediate forerunner of its better known American offspring Strictly a social game English baseball was played for nearly two hundred years before fading away at the beginning of the twentieth century Despite its longevity and its important role in baseball s evolution however today it has been completely forgotten In *Pastime Lost* David Block unearths baseball s buried history and brings it back to life illustrating how English baseball was embraced by all sectors of English society and exploring some of the personalities such as Jane Austen and King George III who played the game in their childhoods While rigorously documenting his sources Block also brings a light touch to his story inviting us to follow him on some of the adventures that led to his most important discoveries Purchase the audio edition
