Richardson,2005 Reconstructing an actual conceptual and documented Wiltshire landscape The main argument of this thesis is that the landscape and locality of Clarendon Forest and Park some 6 km east of Salisbury Wiltshire England were strongly influenced by the presence or later absence of Clarendon Palace which fell into decay in the late fifteenth century The first sure evidence of a royal residence at Clarendon dates from the reign of Henry I 1100 1135 although the site may well have Saxon connections A primary aim of this work is to restore the wider conceptual landscape by considering the forest alongside the relict landscape of the park and it is argued throughout that because medieval forests are archaeologically elusive the best way to achieve this is through an intensive documentary methodology Attention is drawn throughout to the capacity of documents to illustrate how estates were managed over time The argument representing an unprecedented systematic study of manuscript sources for Clarendon Park and Forest held at central and regional record offices is supported by references to printed primary sources It has resulted in the compilation of a main computer database listing over 800 relevant documents held at the Public Record Office alone from which those that might prove most useful were selected and transcribed The transcriptions arranged by subject form several substantial and searchable electronic databases facilitating cross checking and comparison The written sources themselves have informed the structure of the work and help to illustrate that this unique landscape and locality was indeed profoundly influenced by the existence of a royal park and palace at its centre Nevertheless what has emerged strongly in the course of the study are the myriad ways in which the forest in turn shaped the lifecycle of the palace

The Medieval Cathedral of Trondheim Margrete Syrstad Andås,2007 Medieval cathedrals and the various practices connected to them form an important and complex part of the European cultural heritage The buildings themselves and their reception into the modern arts ensure their presence within today s cultural memories and sensibilities In the mid twelfth century a new archbishop s seat was erected in the Norwegian city of Trondheim or Nidaros at the far north of Europe This interdisciplinary volume written by scholars of history architecture and liturgy explores the medieval cathedral of Trondheim as a local construction in a European context As a see of the Western Church it was set in an international Latinate culture At the same time the construction of the building itself and the ritual practices in and around it were influenced by local political religious and cultural conditions The relationship between the physical construction of a cathedral and its function in medieval liturgical and other ritual practices is a topic of wide relevance for architectural and liturgical scholarship The so called Ordo Nidrosiensis the thirteenth century ordinal of the Province of Nidaros is an immense

help in interpreting the architectural construction and sacred space of Nidaros Cathedral and the Ordo is dealt with in many of the articles In accordance with general medieval practice the Nidaros ordinal may be described as international in contents but edited with regard to local considerations Spenser Studies ,1991 **Historical Abstracts** ,1991 *Tomb Destruction and Scholarship* Phillip Lindley,2007 *Bibliographie D'histoire de L'art* ,1992
