seen as a readable concentration of basic and meaningful insights that often defy a noticeable amount of conventional wisdom on the ground of careful and authoritative scholarly research Understanding Ethiopia's Tigray War Martin Plaut, Sarah Vaughan, 2023-02-16 The war in Ethiopia's northern region of Tigray began in November 2020. It inflicted more casualties than any other contemporary conflict in the world. It has also been among the least understood. The fighting and accompanying blockade led to an estimated 600,000 deaths, more than the number who died in the 1984-5 famine. International journalists were banned as the region was sealed off from the outside world by Ethiopian and Eritrean governments prosecuting a strategy designed to crush Tigray at almost any cost. Hatred of Tigrayans was stoked by senior advisers to Ethiopia's Prime Minister Abiy Ahmed; they have called Tigrayans weeds who must be uprooted, their place in history extinguished. Their language was reminiscent of that which preceded the genocide in Rwanda. The war was also orchestrated by Eritrea's President Isaias Afwerki, who came to wield increasing influence over Ethiopian affairs. It drew in Somali troops as well as Eritrean forces. Peace agreements signed in November 2022 ended the worst of the violence but without resolving the war's underlying drivers, which continue to feed a tense and uncertain situation. This book provides the first clear explanation of the factors that led to the conflict, unravelling their roots in Ethiopia's long and complex history. It describes the battles that were fought at such terrible cost and the immense suffering, particularly of women who were brutally abused. How the West Was Won and Lost Rocky M. Mirza, PhD, 2016-04-14 Western powers are addicted to stealing and warmongering, and their days at the top of civilization are numbered. To prove this point, Rocky M. Mirza, PhD, traces the rise of the Western powers from the Greek and Roman empires through the Portuguese, Spanish, British, French, German, Italian, and American empires. He argues that the West has promoted private property over communal property, which has created huge inequalities of wealth, encouraged the production and consumption of goods instead of preserving our planet, exploited Third World workers to satisfy obese citizens addicted to super-size portions. From the time Portugal found a sea route to India and Spain rediscovered the New World, the West has sought to steal and kill. At first Muslims in the Middle East and powerful countries in Asia thwarted Western ambitions, but the Industrial Revolution of the eighteenth century changed the landscape. Instead of building mutually beneficial relationships, Western empires, from the Portuguese to the Americans, have sought to solely look out for their own interests. Find out how the balance is shifting in *How the West Was Won and Lost*. The Lost City of Solomon and Sheba Robin Brown-Lowe, 2003-04-03 In the heart of south central Africa, there are remains of monuments, ruined cities, temples, forts, irrigation terraces reminiscent of the classic civilizations of the Egyptians and Phoenicians. Yet despite having first been investigated by the Royal Geographical Society a century ago, the Zimbabwe stone courts culture remains all but unknown to the world at large. This book reveals how the truth about the Zimbabwe culture has been radically influenced, indeed suppressed throughout history, by white and black political interests struggling to redefine Zimbabwe's identity. *Lost Boy No More* Abraham Nhial, DiAnn Mills, 2004 *Lost Boys Of Sudan*

American Mojo: Lost and Found Peter D. Kiernan, 2015-06-09 In *American Mojo Lost and Found* Peter D. Kiernan award winning author of New York Times bestseller *Becoming China's Bitch* focuses on America's greatest challenge and opportunity restoring the middle class to its full promise and potential. Our educated, skilled and motivated middle class was the cornerstone of America's postwar economic might but the country's dynamic core has struggled and changed dramatically through the last three decades. Kiernan's extensively researched story told through individual histories shows how the middle class flourished under unique circumstances following World War II and details how our middle class has been rocked and shaped by events abroad as much as at home. By excluding too many Americans the middle class we reverently recall was fractured from the beginning. What emerges through his storytelling is a picture of middle class decline and opportunity that is fuller, more moving and profound and ultimately more useful in terms of charting a path forward than other examinations. His unique global perspective is a vital ingredient in charting the way ahead. This new frontier thesis shows that middle class greatness is again within our grasp if we take some powerful medicine and seize the global opportunity. America possesses the skills and talent the world needs. Americans must embrace what brought our middle class to prominence in the first place: our American Mojo. Before it is too late and other countries steal the march. All that is at stake is the soul of our nation.

The Paradise Lost John Milton, 1869

Lost Crops of Africa Board on Science and Technology for International Development, Office of International Affairs, Policy and Global Affairs, National Research Council, 1996-02-28

Scenes of starvation have drawn the world's attention to Africa's agricultural and environmental crisis. Some observers question whether this continent can ever hope to feed its growing population. Yet there is an overlooked food resource in sub-Saharan Africa that has vast potential: native food plants. When experts were asked to nominate African food plants for inclusion in a new book, a list of 30 species grew quickly to hundreds. All in all, Africa has more than 2,000 native grains and fruits, many lost species due to rediscovery and exploitation. This volume focuses on native cereals, including African rice, reserved until recently as a luxury food for religious rituals. Finger millet, neglected internationally although it is a staple for millions, Fonio, acha, probably the oldest African cereal and sometimes called hungry rice. Pearl millet, a widely used grain that still holds great untapped potential. Sorghum, with prospects for making the twenty-first century the century of sorghum. Tef, in many ways ideal but only now enjoying budding commercial production. Other cultivated and wild grains. This readable and engaging book dispels myths often based on Western bias about the nutritional value, flavor and yield of these African grains. Designed as a tool for economic development, the volume is organized with increasing levels of detail to meet the needs of both lay and professional readers. The authors present the available information on where and how each grain is grown, harvested and processed, and they list its benefits and limitations as a food source. The authors describe next steps for increasing the use of each grain, outline research needs and address issues in building commercial production. Sidebars cover such interesting points as the potential use of gene mapping and other high-tech agricultural techniques on these grains. This

fact filled volume will be of great interest to agricultural experts entrepreneurs researchers and individuals concerned about restoring food production environmental health and economic opportunity in sub Saharan Africa Selection Newbridge Garden Book Club
