## **Lost Millennium:**

*The Lost Millennium* Florin Diacu, 2010-07-23 Have you ever wondered how we really know what year it is Part detective story part conspiracy theory part scientific history The Lost Millennium explores the astonishing possibility that our calendar is out by a thousand years A chance conversation at a conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you ll ever encounter To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad It all depends rather on the dating of ancient events about which there is real controversy At once accessible and profound The Lost Millennium examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew Fomenko cites evidence from ancient astronomy linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall The field has also inspired its share of now discredited cranks such as Immanuel Velikovsky a media celebrity of the 1950s His notorious book *Worlds in Collision* argued that biblical events are incorrectly dated Beautifully written and peopled with fascinating characters from past and present The Lost Millennium is essential reading for anyone who believes they re living in the year 2005

*Maps of the Ancient Sea Kings* Charles H. Hapgood, 1966 Hapgood utilizes ancient maps as concrete evidence of an advanced worldwide civilization existing many thousands of years before ancient Egypt Hapgood concluded that these ancient mapmakers were in some ways much more advanced in mapmaking than any people prior to the 18th century Hapgood believes that they mapped all the continents This would mean that the Americas were mapped thousands of years before Columbus Antarctica would have been mapped when its coasts were free of ice Hapgood supposes that there is evidence that these people must have lived when the Ice Age had not yet ended in the Northern Hemisphere and when Alaska was still connected with Siberia by the Pleistocene Ice Age land bridge

[A Big History of Globalization](#) Julia Zinkina, David Christian, Leonid Grinin, Ilya Ilyin, Alexey Andreev, Ivan Aleshkovski, Sergey Shulgin, Andrey Korotayev, 2019-04-12 This book presents the history of globalization as a network based story in the context of Big History Departing from the traditional historic discourse in which communities cities and states serve as the main units of analysis the authors instead trace the historical emergence growth interconnection and merging of various types of networks that have gradually encompassed the globe They also focus on the development of certain ideas processes institutions and phenomena that spread through those networks to become truly global The book specifies five macro periods in the history of globalization and comprehensively covers the first four from roughly the 9th 7th millennia BC to World War I For each period it identifies the most important network related developments that facilitated or even spurred on such transitions and had

the greatest impacts on the history of globalization By analyzing the world system s transition to new levels of complexity and connectivity the book provides valuable insights into the course of Big History and the evolution of human societies

Philipp E. Nothhaft, 2011-10-06 The beginnings of scientific chronology are usually associated with the work of the great Renaissance philologist Joseph Scaliger 1540 1609 but this perspective is challenged by the existence of a vivid pre modern computistical tradition in which technical chronological questions especially regarding the life of Jesus played an essential role Christian scholars such as Roger Bacon made innovative breakthroughs in the field of historical dating by applying astronomical calculations critical exegesis and the study of the Jewish calendar to chronological problems Drawing on a wide selection of sources that range from late antiquity to 1600 this book uses the history of the date of Christ's Passion to shed new light on the medieval contribution to science and scholarship

praise from the critics was nominated for a Governor General's Award and won the Giller Prize. It was named one of 2000's best books, became a national bestseller in hardcover for months and would be published in the US and UK. It is seen, however, as being at odds with literary fashion for concerning itself with good and evil and the human freedom to choose between them, an approach that puts Richards as Maclean's magazine says firmly in the tradition of Tolstoy and Dostoevsky. Author Wayne Johnston recounts hearing Richards read in 1983 and being struck by his unqualified love for every one of his characters, even though it was not then fashionable to love your characters. Pottersfield Portfolio editor Tony Tremblay calls Richards the most misunderstood Canadian writer of the century and a great moralist, comparing him to Morley Callaghan, Kafka and Melville. As a boy, Sydney Henderson thinks he has killed Connie Devlin when he pushes him from a roof for stealing his sandwich. He vows to God he will never again harm another if Connie survives. Connie walks away laughing and Sydney embarks upon a life of self-immolating goodness. In spite of having educated himself with such classics as Tolstoy and Marcus Aurelius, he is not taken seriously enough to enter university because of his background of dire poverty and abuse, which leads everyone to expect the worst of him. His saintly generosity of spirit is treated with suspicion and contempt, especially when he manages to win the love of beautiful Elly. Unwilling to harm another in thought or deed or to defend himself against false accusations, he is exploited and tormented by others in this rural community and finally implicated in the death of a 19-year-old boy. Lyle Henderson knows his father is innocent but is angry that the family has been ridiculed for years and that his mother and sister suffer for it. He feels betrayed by his father's passivity in the face of one blow after another and unable to accept his belief in long-term salvation. Unlike his father, he cannot believe that evil will be punished in the end. While his father turns the other cheek, Lyle decides the right way is in fighting and embarks on a morally empty life of stealing, drinking and violence. A compassionate, powerful story of humanity confronting inhumanity, it is a culmination of Richards' last seven books, beginning with *Road to the Stilt House*. It takes place in New Brunswick's Miramichi Valley, like all of his novels so far, which has led some urban critics to misjudge his work as regional. A criticism leveled at Thomas Hardy, Joseph Conrad and Emily Brontë in their own day, like his literary heroes, Richards aims to evoke universal human struggles through his depiction of the events of a small rural place where one person's actions impact inevitably on others in a tragic web of interconnectedness. The setting is extremely important in Richards' work because the characters come from the soil, but as British Columbia author Jack Hodgins once told Richards, every character you talk about is a character I've met here in Campbell River.
