Physician Recruitment Suzanne McNeely Lewitt, 1982 *33 Ideas for Physician Recruitment*, 1991 *A Marketing Approach to Physician Recruitment* James O. Hacker, Don C. Dodson, M. Thane Forthman, 1995

A Marketing Approach to Physician Recruitment is a how to manual designed to assist hospitals in the physician recruitment process or to enhance already existing recruitment programs. Given the ever changing status on health care reform hospital administrators and physicians are faced with the challenge of meeting the growing needs of patients as well as their own internal priorities. In order to survive the medical profession as a whole must make the commitment to identify the needs of the community it serves while integrating the activities and roles of departments, boards and staff. In the past physician recruitment has tended to itself. As part of a competitive system neither the individual provider nor the medical group can afford to ignore its physician profile. This book is aware of the needs of today's hospitals and presents a program to facilitate the process of recruiting physicians. The authors provide the reader with a step by step physician recruiting process. They include additional materials to support the recruiting process. The book is comprised of four sections. The process section provides organization for the recruitment program by assisting readers with creating a written plan. The resources section facilitates that plan's effectiveness by providing information for developing pro forms, community support letters, tracking forms, incentive packages and legal documents. The reference section lists organizations, contact names, addresses and phone numbers needed for recruiting. *A Marketing Approach to Physician Recruitment* is the only book of its kind. Hospitals can use it to develop a practical and proven process for recruiting physicians. It is an effective tool for meeting the needs of patients and physicians alike.

Health Care in Rural America United States. Congress. Office of Technology Assessment,1990 Immigrants in Regional Labour Markets of Host Nations Syed Ather Hussain Akbari,2013-02-20 This book is the first to present a detailed analysis of economic integration of immigrants in smaller areas of their host nations It uses Atlantic Canada as a case in point and uses unpublished data based on several databases of Statistics Canada and Citizenship and Immigration Canada It identifies best policy practices that can also be used in other countries to address demographic challenges similar to those facing Canada for example population ageing and youth out migration from smaller regions to larger regions through immigration Economic integration of immigrants in Atlantic Canada is faster and better than it is nationally An overarching result is that an analysis of regional data can lead to very different policy conclusions than the analysis of national data which means that it can be risky to devise immigration policy based only on national data A clear message is that economic benefits from immigration can be enhanced by facilitating a broader geographic distribution of immigrants rather than maintaining their concentration in a few larger urban regions A must read for immigration and population policy makers immigrant settlement agencies and academic researchers
