**The Saturday Review of Politics, Literature, Science and Art**, 1866 [The Cambridge History of English Literature](#), 1932 *The Cambridge History of English Literature Volume Xv* Alfred Rayney, Waller, Adolphus William,

Ward, 1953 **The Old Testament Between Theology and History** Niels Peter Lemche, 2008-01-01 From its inception at the time of the Enlightenment until the mid twentieth century the historical critical method constituted the dominant paradigm in Old Testament studies In this magisterial overview Niels Peter Lemche surveys the development of the historical critical method and the way it changed the scholarly perception of the Old Testament In part 1 he describes the rise and influence of historical critical approaches while in part 2 he traces their decline and fall Then in part 3 he discusses the identity of the authors of the Old Testament based on the content of the literature they wrote demonstrating that the collapse of history does not preclude critical study Part 4 investigates the theological consequences of this collapse and surveys Old Testament and biblical theology in its various manifestations in the twentieth century An appendix includes a history of Palestine from the Stone Age to modern times constructed without recourse to the Old Testament

**Reading Old Books** Peter Mack, 2021-11-23 A wide ranging exploration of the creative power of literary tradition from Chaucer to the present In literary and cultural studies tradition is a word everyone uses but few address critically In *Reading Old Books* Peter Mack offers a wide ranging exploration of the creative power of literary tradition from the middle ages to the twenty first century revealing in new ways how it helps writers and readers make new works and meanings *Reading Old Books* argues that the

best way to understand tradition is by examining the moments when a writer takes up an old text and writes something new out of a dialogue with that text and the promptings of the present situation The book examines Petrarch as a user instigator and victim of tradition It shows how Chaucer became the first great English writer by translating and adapting a minor poem by Boccaccio It investigates how Ariosto Tasso and Spenser made new epic meanings by playing with assumptions episodes and phrases translated from their predecessors It analyzes how the Victorian novelist Elizabeth Gaskell drew on tradition to address the new problem of urban deprivation in *Mary Barton* And finally it looks at how the Kenyan writer Ngũgĩ Thiong'o in his 2004 novel *Wizard of the Crow* reflects on biblical English literary and African traditions Drawing on key theorists critics historians and sociologists and stressing the international character of literary tradition *Reading Old Books* illuminates the not entirely free choices readers and writers make to create meaning in collaboration and competition with their models

Priests of History Sarah Irving-Stonebraker, 2024-09-24 How can Christians engage meaningfully with history In an age underpinned by the idea that life is about self invention and fulfilment contemporary Western culture holds that the past has little to teach us We live in what this book terms the Ahistoric Age in which we are profoundly disconnected from history In the attempt to appear relevant the church often embraces this ahistoric worldview by jettisoning the historic ideas and practices of Christian formation But this has unintended consequences leaving Christians unmoored from history and losing the ability to grapple with its ethical complexities In *Priests of History* Sarah Irving Stonebraker draws upon her expertise and her experience as an atheist who has become a Christian to examine what history is and why it matters If Christians can learn how to be priests of history tending and keeping our past history can help us strengthen and revive our spiritual and intellectual formation and equip us to communicate the gospel in a confused and rootless world *New Approaches in*

*Teaching History* Frederic Krome, 2024-02-14 Science fiction literature and film are an underappreciated source for the teaching of history Finding material that can excite a student's curiosity can be a key towards greater student engagement especially among students who are taking history as a requirement rather than from interest The discovery that they can read or watch science fiction as part of their classwork often comes as a pleasant surprise Beyond its popularity however utilizing science fiction for class assignments has certain pedagogical advantages it introduces students to new vistas in historical thought helps them learn how literature and film can be applied as a primary source and can encourage participation in projects that are enjoyable Each chapter provides case studies focusing on a different subject in the modern history curriculum and in addition to providing an analysis of specific texts and or cinematic sources gives suggestions on assignments for the students

**The Making of the English Literary Canon** Trevor Thornton Ross, 1998 It is widely accepted among literary scholars that canon formation began in the eighteenth century when scholarly editions and critical treatments of older works designed to educate readers about the national literary heritage appeared for the first time In *The Making of the English Literary Canon* Trevor Ross challenges this assumption arguing that canon formation was going on

well before the eighteenth century but was based on a very different set of literary and cultural values. Covering a period that extends from the Middle Ages to the institutionalisation of literature in the eighteenth century, Ross's comprehensive history traces the evolution of cultural attitudes toward literature in English society, highlighting the diverse interests and assumptions that defined and shaped the literary canon. An indigenous canon of letters, Ross argues, had been both the hope and aim of English authors since the Middle Ages. Early authors believed that promoting the idea of a national literature would help publicise their work and favour literary production in the vernacular. Ross places these early gestures toward canon making in the context of the highly rhetorical habits of thought that dominated medieval and Renaissance culture, habits that were gradually displaced by an emergent rationalist understanding of literary value. He shows that beginning in the late seventeenth century, canon makers became less concerned with how English literature was produced than with how it was read and received. By showing that canon formation has served different functions in the past, *The Making of the English Literary Canon* is relevant not only to current debates over the canon but also as an important corrective to prevailing views of early modern English literature and of how it was first evaluated, promoted, and preserved.

*The Cambridge History of English Literature* Sir Adolphus William Ward, Alfred Rayney Waller, 1915

**Literature, History, Choice** Hillel Weiss, 2013-11-01 Starting with a discussion on the elements of the genre of alternative counterfactual history and on its place between the poles of historical determinism and relativism, this book develops a literary theory of the

historical alternativeness principle and applies it to the reading of *The City with All That is Therein* is one of the most important and less studied books of the greatest Israeli writer Nobel Prize winner S Y Agnon 1887-1970. The investigation reveals that this principle is by no means inherent solely in modernism and postmodernism but lies at the very basis of the reading process particularly at the levels of plot and character origination and historical and historiographical conceptions that underlie the author's imagination. The book is intended for all who are interested in modern literature and theory.

**Old Books and New Histories** Leslie Howsam, 2006-09-16. Studies in the culture and history of the book are a burgeoning academic specialty. Intriguing, rigorous and vital, they are nevertheless rooted within three major academic disciplines: history, literary studies and bibliography that focus respectively upon the book as a cultural transaction, a literary text and a material artefact. *Old Books and New Histories* serves as a guide to this rich but sometimes confusing territory, explaining how different scholarly approaches to what may appear to be the same entity can lead to divergent questions and contradictory answers. Rather than introduce the events and turning points in the history of book culture or debates among its theorists, Leslie Howsam uses an array of books and articles to offer an orientation to the field in terms of disciplinary boundaries and interdisciplinary tensions. Howsam's analysis maps studies of book and print culture onto the disciplinary structure of the North American and European academic world. *Old Books and New Histories* is also an engaged statement of the historical perspective of the book. In the final analysis, the lesson of studies in book and print culture is that texts change, books are mutable and readers ultimately make of books what they need.

**Loving Literature** Deidre Lynch, 2015. Of the many charges laid against contemporary literary scholars, one of the most common and perhaps the most wounding is that they simply don't love books. And while the most obvious response is that no, actually, the profession of literary studies does acknowledge and address personal attachments to literature that answer risks obscuring a more fundamental question: Why should they? That question led Deidre Shauna Lynch into the historical and cultural investigation of *Loving Literature*. How did it come to be that professional literary scholars are expected not just to study but to love literature and to inculcate that love in generations of students? What Lynch discovers is that books and the attachments we form to them have long played a role in the formation of private life; that the love of literature, in other words, is neither incidental to nor inextricable from the history of literature. Yet at the same time, there is nothing self-evident or ahistorical about our love of literature; our views of books as objects of affection have clear roots in late eighteenth-century and nineteenth-century publishing, reading habits and domestic history.
