Revolution Resistance And Reform In Village China:

Revolution, Resistance, and Reform in Village China Edward Friedman, Paul G. Pickowicz, Mark Selden, 2005-01-01

Drawing on nearly 30 years of field and documentary research in rural North China this book explores the contested relationship between village and state since the 1960 s The authors bring the countryside to life through personal and poignant accounts of villagers across three generations of social upheaval

The Transformation of Rural China Jonathan Unger, 2016-09-16 During the past quarter century Jonathan Unger has interviewed farmers and rural officials from various parts of China in order to track the extraordinary changes that have swept the countryside from the Maoist era through the Deng era to the present day A leading specialist on rural China Professor Unger presents a vivid picture of life in rural areas during the Maoist revolution and then after the post Mao disbandment of the collectives This is a story of unexpected continuities amidst enormous change Unger describes how rural administrations retain Mao era characteristics despite the major shifts that have occurred in the economic and social hierarchies of villages as collectivization and class struggle gave way to the slogan to get rich is glorious A chapter explores the private entrepreneurship that has blossomed in the prosperous parts of the countryside Another focuses on the tensions and exploitation that have arisen as vast numbers of migrant laborers from poor districts have poured into richer ones Another based on five months of travel by jeep into impoverished villages in the interior describes the dilemmas of under development still faced by many tens of millions of farmers and the ways in which government policies have inadvertently hurt their livelihoods

China's Revolutions and Intergenerational Relations Martin Whyte, 2020-08-06 China s Revolutions and Intergenerational Relations counters the widely accepted notion that traditional family patterns are weakened by forces such as economic development and social revolutions China has experienced wrenching changes on both the economic and the political fronts yet from the evidence presented here the tradition of filial respect and support for aging parents remains alive and well Using collaborative surveys carried out in 1994 in the middle sized industrial city of Baoding and comparative data from urban Taiwan the authors examine issues shaping the relationships between adult Chinese children and their elderly parents The continued vitality of intergenerational support and filial obligations in these samples is not simply an instance of strong Confucian tradition trumping powerful forces of change Instead and somewhat paradoxically the continued strength of filial obligations can be attributed largely to the institutions of Chinese socialism forged in the era of Mao Zedong With socialist institutions now under assault in the People s Republic of China the future of intergenerational relations in the twenty first century is once again uncertain

The Emergence of Organizations and Markets John F. Padgett, Walter W. Powell, 2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty Where do new alternatives new organizational forms and new types of people come from Combining biochemical insights about the origin of life with innovative and historically oriented social network

analyses John Padgett and Walter Powell develop a theory about the emergence of organizational market and biographical novelty from the coevolution of multiple social networks They demonstrate that novelty arises from spillovers across intertwined networks in different domains In the short run actors make relations but in the long run relations make actors This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies Padgett and Powell build on the biochemical concept of autocatalysis the chemical definition of life and then extend this autocatalytic reasoning to social processes of production and communication Padgett and Powell along with other colleagues analyze a very wide range of cases of emergence They look at the emergence of organizational novelty in early capitalism and state formation they examine the transformation of communism and they analyze with detailed network data contemporary science based capitalism the biotechnology industry regional high tech clusters and the open source community

temperature of Cold War geopolitics in Mao's China **Disenfranchised** Joel Andreas, 2019 In the decades following World War II factories in many countries not only provided secure employment and a range of economic entitlements but also recognized workers as legitimate stakeholders enabling them to claim rights to participate in decision making and hold factory leaders accountable In recent decades as employment has become more precarious these attributes of industrial citizenship have been eroded and workers have increasingly been reduced to hired hands As Joel Andreas shows in *Disenfranchised* no country has experienced these changes as dramatically as China Drawing on a decade of field research including interviews with both factory workers and managers Andreas traces the changing political status of workers inside Chinese factories from 1949 to the present carefully analyzing how much power they have actually had to shape their working conditions

City Versus Countryside in Mao's China Jeremy Brown, 2012-06-18 The gap between those living in the city and those in the countryside remains one of China's most intractable problems As this powerful work of grassroots history argues the origins of China's rural urban divide can be traced back to the Mao Zedong era While Mao pledged to remove the gap between the city worker and the peasant his revolutionary policies misfired and ended up provoking still greater discrepancies between town and country usually to the disadvantage of villagers Through archival sources personal diaries untapped government dossiers and interviews with people from cities and villages in northern China the book recounts their personal experiences showing how they retaliated against the daily restrictions imposed on them while traversing between the city and the countryside Vivid and harrowing accounts of forced and illicit migration the staggering inequity of the Great Leap Famine and political exile during the Cultural Revolution reveal how Chinese people fought back against policies that pitted city dwellers against villagers

The San Francisco System and Its Legacies Kimie Hara, 2014-11-20. In September 1951, Japan signed a peace treaty with forty-eight countries in San Francisco. In April 1952, the treaty came into effect. The San Francisco Peace Treaty is an international agreement that in significant ways shaped the post-World War II international order in the Asia-Pacific. With its associated security arrangements, it laid the foundation for the regional structure of Cold War confrontation. The San Francisco System fully reflected the strategic interests and policy priorities of the peace conference's host nation, the United States. The treaty fell far short of settling outstanding issues in the wake of the Pacific War or facilitating a clean start for the post-war period. Rather, critical aspects of the settlement were left equivocal and continue to have significant and worrisome implications for regional international relations. This book examines the key developments of the contentious political and security issues in the Asia-Pacific that share a common foundation in the post-war disposition of Japan, particularly the San Francisco Peace Treaty. These include both tangible and intangible issues such as disputes over territories and history problems. Taking the San Francisco System as its conceptual grounding, the authors examine how these issues developed and have remained contentious long after the San Francisco arrangements. To provide bases for producing solutions, the chapters offer comprehensive accounts that explain and deepen our understanding of these complex regional issues and the San Francisco System as a whole. By closely and systematically examining the legacy and various ramifications of the San Francisco System, this fascinating book adds to our understanding of current and growing tensions in the region. As such, it will be of great interest to students and scholars of Asian studies, history, international relations, and politics.
