though it was also used by infantry in open battle and as a siege weapon In this important study an expert on Eastern military technology tells the story of this extraordinary piece of military hardware how it was made and how various cultures developed differing tactics for using it He explains why the composite bow achieved such stunning successes and how it endured as a weapon of choice for thousands of years **Southeast Asian Warfare, 1300-1900** Michael

Charney,2018-12-24 This study of warfare in Southeast Asia between the fourteenth and nineteenth centuries examines the chief aspects of warfare in the region It begins with an examination of the cultural features that made warfare in the region unique followed by a discussion of the main weapons used and the two major sites of fighting sieges and naval contests Three chapters examine the role played by animals such as elephants and horses The final two chapters examine the shift from mercenary armies and masses of levies to smaller standing armies The study closes with an examination of the tumultuous nineteenth century in which European naval power won the coast and rivers while Southeast Asians held the advantage further inland The Heirs of Archimedes Brett D. Steele,Tamera Dorland,2005 Essays analyze the connections between science and technology and military power in the late medieval Renaissance and Enlightenment periods The integration of scientific knowledge and military power began long before the Manhattan Project In the third century BC Archimedes was renowned for his research in mechanics and mathematics as well as for his design and coordination of defensive siegecraft for Syracuse during the Second Punic War This collection of essays examines the emergence during the early modern era of mathematicians chemists and natural philosophers who along with military engineers navigators and artillery officers followed in the footsteps of Archimedes and synthesized scientific theory and military practice It is the first collaborative scholarly assessment of these early military scientific relationships which have been long neglected by scholars both in the history of science and technology and in military history From a historical perspective this volume investigates the deep connections between two central manifestations of Western power examining the military context of the Scientific Revolution and the scientific context of the Military Revolution Unlike the classic narratives of the Scientific Revolution that focus on the theories of and conflicts between Aristotelian and Platonic worldviews this volume highlights the emergence of the Archimedean ideal in which a symbiosis exists between the supply of mechanistic science and the demand for military capability From a security studies perspective this work presents an in depth study of the central components of military power as well as their dynamic interactions in the political acquisitional operational and tactical domains The essays in this volume reveal the intellectual and cultural struggles to enhance the capabilities of these components an exercise in transforming military power that remains relevant for today s armed forces The volume sets the stage by examining the innovation of gunpowder weaponry in both the Christian and the Islamic states of the late medieval and Renaissance eras It then explores such topics as the cultural resistance to scientific techniques and the relationship between early modern science and naval power particularly the intersecting developments in mathematics and oceanic navigation Other essays

address the efforts of early practitioners and theorists of chemistry to increase the power and consistency of gunpowder The final essays analyze the application of advanced scientific knowledge and Enlightenment ideals to the military engineering and artillery organizations of the eighteenth century The volume concludes by noting the global spread of the Archimedean ideal during the nineteenth century as an essential means for resisting Western imperialism **Osprey Men-At-Arms**

Genghis Khan John Man, 2024-06-04 A thrilling account of the brilliant ruthless founder of the Mongol Empire The Guardian Genghis Khan is one of history's immortals alive in memory as a scourge hero military genius and demigod To Muslims Russians and westerners he is a murderer of millions a brutal oppressor Yet in his homeland of Mongolia he is the revered father of the nation and the Chinese honor him as the founder of a dynasty In his so called Mausoleum in Inner Mongolia worshippers seek the blessing of his spirit In a supreme paradox the world's most ruthless conqueror has become a force for peace and reconciliation As a teenager Genghis was a fugitive hiding from enemies on a remote mountainside Yet he went on to found the world's greatest land empire and change the course of world history Brilliant and original as well as ruthless he ruled an empire twice the size of Rome's until his death in 1227 placed all at risk To secure his conquests and then extend them his heirs kept his death a secret and secrecy has surrounded him ever since His undiscovered grave with its imagined treasures remains the subject of intrigue and speculation This is more than just a gripping account of Genghis rise and conquests John Man uses firsthand experiences in China and Mongolia to reveal the khan's enduring influence He has traveled the length of the empire and he spotlights the tension between Mongols and Chinese who both claim Genghis spirit He is the first writer to explore the hidden valley where Genghis is believed to have died and one of the few westerners to climb the mountain where he was likely buried This stunning narrative paints a vivid picture of the man himself the places where he lived and fought and the passions that surround him still For in legend ritual and intense controversy Genghis lives on An engrossing book Booklist A rattling good read The Independent
