Stars on the Earth Richard Leviton, 2006-08 Discover the wonderful secret the Earth holds for us that the stars of the galaxy live on our planet Holograms of high magnitude stars over holy mountains Physical travel to other planets through stargates on the Earth's surface Near instantaneous transportation across the planet through quick way portals

Outrageous science fiction or sober geomantic fact Earth Mysteries researcher Richard Leviton takes you on a wild tour of three geomantic features of our planet and reveals that what science fiction has dreamed the Earth in fact offers us Stars on the Earth combines scholarship clairvoyance and field experience with the latest discoveries of geology and astrophysics and the timeless insights of the world's myths to open the planetary door to the stars It's all part of the Earth's unsuspected but staggeringly rich endowment as a designer planet Our planet was precisely designed and implemented for us and it's equipped with a visionary geography that mirrors features of the galaxy and Heavens Why are so many of the Earth's mountains said to be holy producing visions and encounters with the gods They all have canopies of light called domes each transmitting the presence of a galactic star What is the geomantic origin of the Bermuda Triangle Two dysfunctional stargates If working properly they and the Earth's other two million stargates could transport us rapidly to other planets Is there a way to travel quickly across the planet without using cars airplanes boats or trains Yes and it's called a traversable wormhole and the Earth has thousands of them awaiting our discovery and use Come join the tour of a planet you've never seen before our own star infused Earth
