**Recent Advances in Attempts to Improve Medication Adherence - from basic research to clinical practice, volume II** Przemyslaw Kardas, Tamas Agh, Ines Potočnjak, Cristina Mihaela Ghiciuc, Maria Teresa Herdeiro, 2024-12-04 This exciting Research Topic is the second volume of Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies

**Evidence-Based Advance and Management of Drug Treatment of Infectious Diseases** Yonggang Zhang, Hong Fan, Min Yang, 2021-12-06 Infectious diseases are caused by microorganisms that release toxins or invade body tissues The most common pathogenic organisms are bacteria viruses fungi protozoa and helminths Systemic infections usually cause fevers chills sweats malaise and occasionally headache muscle and joint pain or changes in mental status and even septic shock MODS Infectious diseases have always threatened populations and caused great loss of life in history but since the last century with the discovery of antibiotics historical trends have been reversed It is reported that between 1990 and 2017 age standardized disability adjusted life year DALY rates decreased by 41.3% 38.8 43.5 for infectious diseases However in 2017 lower respiratory infections are still ranked as the third cause of DALYs Drug therapy is the one of most critical management strategies for infectious diseases Efficacy and safety of drug therapy should always be considered especially in elders neonates and immunosuppressed patients Off label drug therapy has been performed for complex infectious diseases especially for new emerging infectious diseases However

off label drug therapy can be extremely complex some are prone to rational use while others are more susceptible to the issues of irrational use With the increasing rate of publication of data in this area new evidence for the efficacy and safety of different treatment approaches is constantly developing Thus rigorous analysis of such data is imperative which will guide future clinical practice and guidelines *Mandell, Douglas, and Bennett's Principles and Practice of Infectious Diseases E-Book* John E.
