central cities Sociologist Alejandro Portes and the other contributors use rich in depth data to examine both qualitative and quantitative changes in these five countries Their research method allows them to make generalizations applicable to all five economies while retaining the concreteness of the similarities and differences that make each country unique This volume is an incentive to other collaborative efforts to chart the paths taken by the countries of Latin America and the Caribbean as they seek to accommodate to the new global political and economic context. The message of the volume is a convincing one Because of similarities in the trends affecting countries of the region and policy debates each country can benefit from the experiences of the others However the differences in political structure and in the nature of citizenship mean that social and economic policy debates must take into account the national context from the Foreword by Bryan Roberts University of Texas **Decentralization and Regional Development in Peru** Miriam Chion, 1989 Urban Development in the **Third World** Pradip K.
