Public Procurement in the European Union and Its Impact Across Europe Caroline Yugin, 2009 **Public Procurement in the European Union** Alexander Rhode, 2019-10-19 Alexander Rhode investigates performance oriented measures of Contracting Authorities in public tenders conducted within the EU He finds that Contracting Authorities can improve their performance and attract more suppliers by publishing as precise as possible starting prices in the beginning of a tender First he reports that compared with private sector negotiations starting prices do not create entry barriers in public procurement Second he finds that increased numerical precision of starting prices is linearly correlated with better performance and a

higher number of bids In public procurement suppliers tend to attribute increased credibility to precise starting prices which reduces their perceived entry risks

Practical Guide on Remedies Commission of the European Communities, Discretion in EU Public Procurement Law Sanja Bogojevic, Xavier Grousot, Jörgen Hettne, 2019-05-30 The EU public procurement regime has recently undergone an overhaul and now allows Member States and their contracting authorities to pursue strategic goals via public procurement including environmental and social objectives The extent to which such interests may be accommodated in the procurement process is ultimately determined by the broader legal context in which the EU public procurement regime exists which raises pressing questions regarding the scope and limits of Member States discretion This volume scrutinises these new legal acts particularly Directive 2014/24/EU focusing on discretion and engaging with questions central to the public procurement regime against the EU legal backdrop including internal market law and environment law as well as law beyond the EU

EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law.

Public Procurement in the European Union, 1997

**EU Public Contract Law** Roberto Caranta, Gunilla Edelstam, Martin Trybus, 2013-12-13. This book analyses many aspects of the present EU regulatory framework for public contracts especially public procurement taking the ongoing reform process into account. First several chapters discuss the regime of the Public Sector Procurement Directive 2004/18/EC governing the procurement activities of the EU Member States: the coverage of the Directive, qualification and technical specifications, procurement procedures and award criteria. A specific chapter describes the EU principles applicable to contracts not covered or partially covered by the Directive which have been the subject of relevant developments in the case law of the European Court of Justice. Another chapter covers sustainable procurement. Second, three chapters are devoted to special procurement regimes: namely public private partnerships, defence and utilities. Third, the review and remedies regime for public procurement is covered in two chapters. Fourth, one chapter goes beyond public procurement and looks at the effect of EU law on the contract management of public contracts after their conclusion. Fifth, three chapters go beyond the regulation of the Member States and look at the EU law regime applicable to contracts of the EU institutions. Sixth, and finally, a concluding chapter provides a critique of the EU legal framework by an author from outside the EU.
