they reveal about the complexity of the institutions that were considered technological showplaces in their day They generally were the first to have gas plants for gas lighting dynamo rooms for later electric powered lights grand auditoriums natatoriums swimming pools fitness spas large farms canning plants and the other aspects of the self contained community The book does not neglect some of the less positive aspects of State hospitals There are images of terribly overcrowded wards from the 1940s and 1950s that became so overwhelming that the State hospital fell into disrepute The text also photographically documents the deinstitutionalization era the growth of community mental health concepts and centers and the new state hospital at the beginning of the twenty first century For the individual interested in general in seeing what asylums State hospitals and treatment over the past 150 years actually looked like and for those interested specifically in the Illinois public mental health system the book is a visual treat , Promoting Public Mental Health and Well-being Catherine J. Classics of Community Psychiatry Michael Rowe, 2011 The massive depopulation of state mental hospitals in the 1950s known as deinstitutionalization posed special challenges to mental health consumers in need of intensive psychiatric treatment No longer confined to long term inpatient psychiatric wards consumers were thrust into nursing homes assisted living centers and onto the streets Psychiatric

treatment was relocated to the community and the concept of recovery took on a new meaning Classics in Community Psychiatry is the first volume to examine the course of the community psychiatry movement over the past fifty years Starting with deinstitutionalization the editors chart the progress and setbacks of the movement by presenting carefully selected primary source material from the realms of academia politics and even literature For example a classic journal article explores the relationship between social class and mental health while excerpts from government documents describe mental health legislation A novel demonstrates social attitudes toward the mentally ill while a report from a federally funded task force discusses homelessness and severe mental illness Each selection pinpoints a specific issue and moment of time during the history of mental health services over the past five decades and is accompanied by insightful commentary from the volume editors The result is a unique innovatively conceived book that incorporates many different viewpoints to illustrate the evolution of community psychiatry as well as the need to devote more resources and planning to mental health services looking ahead Classic in Community Psychiatry will be a valuable resource for mental health professionals including psychiatrists psychologists social workers administrators and policymakers and for graduate and undergraduate students in community psychology and psychiatry
