Public Policy And Private Higher Education:

Private Higher Education and Public Policy in Africa Isaac Nnamdi Obasi, 2008 *Public Policy and Private Higher Education* David W. Breneman, Chester E. Finn (Jr.), Susan C. Nelson, 1978 **What is Good Public Policy for Private Higher Education?** Steven Muller, Southern Regional Education Board, 1975 *A National Policy for Private Higher Education* National Council of Independent Colleges and Universities, 1974 **Private Higher Education** Philip G. Altbach, 2005 Highlighting trends and realities of private higher education around the world this book is organized into two sections The first deals with international trends and issues while the second much longer section focuses on countries and regions Education *Privatizing the Public University* Christopher C. Morphey, Peter D. Eckel, 2009-07 With public colleges and universities facing substantial budget cuts and increased calls for accountability more institutions now rely on private revenue streams for support As market driven policies and behaviors become more commonplace some cautious critics sound the alarm while others watching the bottom line cheer But which perspective gets it right Does the privatization of public higher education threaten its very mission or support it In this collection of essays economists policy makers political scientists sociologists and organizational researchers discuss the impact of privatization from their respective disciplinary perspectives and assess its implications for the future of higher education Privatization may bring additional funds and services that are free from government regulations and oversight but does it also allow private interests to have undue influence over public higher education Should public universities have to compete in the economic marketplace as vigorously as they do in the marketplace of ideas What are the implications when institutions of higher learning function like businesses With privatization now a reality for most public colleges and universities an objective examination of the issue from these diverse academic perspectives will be welcomed by those struggling with its challenges *Emerging Dynamics in the Provision of Private Higher Education in Africa* Wondwosen Tamrat, Damtew Teferra, 2024-05-29 This edited book examines the private higher education PHE sector in African countries Reports suggest that private institutions across the continent outnumber their public counterparts yet there has been little scholarly investigation into this emerging phenomenon The book therefore seeks to document map and analyse key trends and contemporary themes in the PHE sector as well as chart historical developments policy and regulatory frameworks As a whole it provides the reader with in depth knowledge rich perspectives and robust analyses from leading authorities in the field Contributions from all sub regions combine thematic issues with shaping discourse on the topic and the discussions are undertaken in the context of global perspectives The book will be of interest to academics researchers postgraduate students policy makers analysts and development partners interested in African higher education and PHE in particular Private Education Daniel C. Levy, 1986 Emphasizing the relationship between private choices and public education as they affect the division of labor between public and private non profit schools colleges and universities contributors to this book focus on the relationship between private and public

education in a comparative context Rethinking the Public-Private Mix in Higher Education Pedro Teixeira, Sunwoong Kim, Pablo Landoni, Zulfiqar Gilani, 2017-04-13 In recent decades we have seen the emergence of private higher education as a global reality. Although there are specific reasons for its appearance in each system, there is also a significant degree of commonality in the context and purposes surrounding the rise of private higher education as an important factor in many systems. The analysis of private higher education has tended to be focused at the national level, often highlighting national peculiarities and variations. In this volume, the authors move forward by proposing a unifying and coherent but flexible theoretical framework that may be applied in different countries and diverse systems. Hence, the overall goal of this book is to provide a framework for a better understanding of the public-private mix of higher education and a set of policy guidelines in dealing with the expansion of private higher education from a comparative perspective. This analytical framework will be applied to four case studies: Pakistan, Portugal, South Korea, and Uruguay. These cases illustrate the diversity of contexts in the development of private higher education, though they also highlight important commonalities. Based on that analysis, we present some general recommendations to build a more effective policy framework that takes advantage of the private sector in order to fulfill better the missions of the higher education system.

A World of Private Higher Education Daniel C. Levy, 2024-05-13 A World of Private Higher Education is the definitive treatment of a sector accounting for a third of the world's 200 million higher education enrolment yet remaining largely unknown even to scholars of higher education and widely mischaracterized when it is considered by stakeholders or the general public. Beyond the eye-popping numbers, several inter-related thematic findings regarding the Private and the Public underscore the subject matter's importance. First, private-public differences are significant; it matters that so many students are in a sector that not long ago was only marginal in much of the world. Second, private higher education (PHE) itself is increasingly diverse with significant and private-public differences. Third, the overlaying of the first two realities yields increasing diversity in private-public higher education distinctions. Especially for its pioneering mapping of PHE globally, regionally, and nationally, the book draws on the pioneering dataset of the pioneering scholarly program for research on PHE: Program for Research on Private Higher Education. Unprecedented in geographical scope, the dataset is unprecedented in longitudinal coverage, too, dating back to 2000. Empirical methods allow for extensive analysis, and theoretical analysis draws on key private-public concepts embedded in literatures on privatization, nonprofit studies, and policy models. For the major challenge of penetrating inside the increasingly diverse private sector of higher education, Levy revises his heralded and widely employed PHE typology.

Property Ownership and Private Higher Education in China Spring Su, 2011-05-13 Recent decades have witnessed the proliferation in China of huge numbers of private universities and colleges in response to a wide-ranging spectrum of socio-economic and political demands under the country's flourishing market economy and its wholesale pursuit of decentralization. This book explores the issue of property ownership, an area which is regarded as an essential element in the attraction into

the sector of local private institutions and foreign partnerships as well as in facilitating the future development of the country's existing institutions. The focus throughout this book is primarily on the legal, economic, managerial and financial aspects of the relevant issues as well as other related topics such as consumer protections and fund raising activities. A feasibility analysis and discussion is also provided on for-profit universities and their potential market niches in China in recognition of the fact that the current regulations which allow private universities to maintain a non-profit status whilst actually enjoying profit returns clearly provides some legitimacy to the phenomenon of for-profit in disguise. It is argued in this book that such quasi-profit regulations may further exacerbate profiteering behavior whilst it is also noted that in the short term there is a clear need to provide adequate protections within the apparent hybrid version of an ownership system, a system characterized by a mix of capitalism and socialism through the adoption of a definitive legal framework within which economic actors can coordinate their efforts through a mutually understood framework of action. Finally, it is clear that in the transition from the rule of the people to the rule of law, legislation, practices and compliance do not always go hand in hand in China; thus the healthy development of the educational sector will undoubtedly require some time as well as the introduction of complementary mechanisms for such legislation to be fully enforced in practice. This book concludes **Higher**

Education, Public Good and Markets Jandhyala B. G. Tilak, 2017-10-16. This book critically examines some of the major trends in the development of higher education. It demonstrates how, in the context of liberalisation, globalisation and marketisation, the crisis in higher education has assumed different dimensions in all advanced and emerging societies. The author shows how the state tends to slowly withdraw from the responsibility of higher education, including in the arena of policy making, or simply adopts a policy of laissez-faire or non-involvement which helps in the rapid unbridled growth of the private sector in higher education. The notion of higher education as a public good is under serious contestation in current times. The book argues for the need to resurrect the compelling nature of higher education along with its several implications for public policy and planning while providing a broad portrayal of global developments, comparative perspectives and key lessons. The volume will be of interest to scholars and researchers of education, political science, public policy and administration, governance, development studies, economics and those working in the higher education sectors, think tanks, policymakers as well as NGOs. **Public Policy Making in the Western Balkans** Margo Thomas, Vesna

Bojicic-Dzelilovic, 2014-10-28. Developing and transition economies face myriad challenges in their attempts to achieve and maintain political stability and foster the economic growth essential for national security, the social well-being of current citizens and sustainable environments for future generations. Governments in the Western Balkans have striven to achieve all of the above and this volume assesses the nature of their experiences as well as the level of their success in doing so. Featuring detailed case studies of public policy reforms in the region as well as comparative analysis on a range of indicators, the book analyzes the role of key players in setting the political agenda as well as implementing policy reforms. It also distils

the lessons that can be learned from the Western Balkan experience recommending strategies for enhancing the policy making process In addition it examines the developmental role played by the full spectrum of policy actors including the private sector NGOs special interest groupings international financial institutions donor nations and the EU Each case study has been prepared by academics with deep knowledge and experience of the western Balkans and addresses a core set of questions identifying the policy issue and its broader context defining the roles of specific individuals in formulating policy and reform and assessing the influence of networks and coalitions in the policy making process With so little detailed literature on public policy making in a group of nations strategically positioned between Europe Russia and the near East the detailed insights provided by this volume will be widely welcomed Our book provides case studies of specific public policy reform episodes in selected Western Balkan post conflict and transition countries The focus of these case studies extends beyond the technical aspects and entails substantive examination of the policy actors constituencies and politics that ultimately shape the policy that emerges from the policy making process This analysis draws lessons for strengthening the quality of policies the transparency consistency and governance of the policy making process and ultimately for contributing to economic and social development of the region
