Public School Monopoly:

The Public School Monopoly Robert B. Everhart, 1982 **THE PUBLIC SCHOOL MONOPOLY : A CRIT. ANALYSIS OF EDUCATION AND THE STATE IN AMERICAN SOCIETY** , 1984 School Choices John Merrifield, 2002-09-01 The school choice movement has gained political momentum in recent years with programs having been established in Milwaukee Florida Texas and elsewhere But today s programs are nothing like the free market in education proposed four decades ago by the early proponents of school choice Economist John Merrifield shows that the school choice movement has become mired in false alternatives petty distinctions and diminished vision Yet he argues that programs providing real educational choices must not be allowed to fail like so many government programs a freely competitive market for education must remain the ultimate goal School Choices True and False charts a course for the achievement of this goal The School Choice Wars John Merrifield, 2001-03-07 What does the term school choice mean to you Opponents of parental choice have muddled its definition misleading parents and educators and drawing public debate away from the core issues In a book geared for anyone who wants to better understand this hotly contested topic Merrifield clarifies the proposals in existence today defining the key concepts related to choice Arguing for a competitive education industry he discusses policy and political strategy mistakes while suggesting corrections This informative book covers government regulation issues typical fallacies diversity issues private voucher initiatives and experiments and empirical evidence about competition **The School-to-Prison Pipeline** Peter Thalheim, 2022-05-02 The school to prison pipeline is not what it is popularly advertised to be by the major media whereby the installation of safety officers and security personnel in schools to protect the learning environment for all the students leads to mostly young men of color getting a record for disruptive behavior and being channeled into prison as the logical result of attending K 12 public schools Rather the school to prison pipeline is a conduit opened and maintained by the statists those who promote the state before the citizen to keep as many students as possible in the public school monopoly so that the two leading teacher unions the National Education Association and the American Federation of Teachers maintain as many dues paying members as possible and to increase the number of dues payers regardless of its impact on our children The promoters of the school to prison pipeline deny African American Hispanic Asian white and other students of color from high needs socioeconomic backgrounds a choice of where to go to school If these parents or guardians want their children to go to a public charter or to use a voucher to select another private option that is where the inquiry should end the simple choice by their parents and guardians Instead the state wins by keeping more people in the state run pipeline The public unions win by keeping more unionized school staff and keeping the dues gravy train coming in to support unions who in turn use their political strength to help elect candidates who favor unionized public schools versus school choice for our children and young people How do the children win if their education options are artificially restricted The students lose by being blocked in sometimes failing public schools with no viable choice

to go elsewhere And the poorer you are the fewer choices you generally have This denial of school choice would particularly impact black students as blacks have disproportionately less money than the average American The Case for School Choice , **Making Government Work** Tex Lezar,1994-11-01 The ideas and new vision contained in this volume lay a firm foundation for local leaders to build on as they employ their new mandate **Quality of education, 1983** United States. Congress. Senate. Committee on Labor and Human Resources,1983 **School Choice: Separating Fact from Fiction** Patrick J. Wolf,2020-05-21 School choice is a hot topic in the United States Private school vouchers public charter schools open enrollment and homeschooling all regularly appear on the policy agenda as ways to improve the educational experience and outcomes for students parents and the broader society Pundits often make claims about the various ways in which parents select schools and thus customize their child s education What claims about school choice are grounded in actual evidence This book presents systematic reviews of the social science research regarding critical aspects of parental school choice How do parents choose schools and what do they seek What effects do their choices have on the racial integration of schools and the performance of the schools that serve non choosing students What features of public charter schools are related to higher student test scores What effects does school choice have on important non cognitive outcomes including parent satisfaction student character traits and how far students go in school What do we know about homeschooling as a school choice This book originally published as a special issue of the Journal of School Choice provides evidence based answers to those vital questions *Equality of Educational Opportunity and Knowledgeable Human Capital* Erwin V. Johanningmeier,2009-10-01 This work explores how the generally accepted definition or measure of equality of educational opportunity at the beginning of the twenty first century differs from what it was in the immediate postwar era While there have been differing definitions or measures of equality of educational opportunity there has been a continual call from education critics and education reformers for more and better mathematics science and foreign language in the nation s schools This work maintains that public education acquired significance as a vital part of a national agenda in conjunction with three developments First the prosperity of the United States after World War II contributed to a consumer dominated culture and the phenomenon of the citizenconsumer The nation had to expand educational opportunities in response to the increased birth rate in the postwar years and in response to the increased qualifications that the workplace required for entry and employment Significantly the nation had the resources to send its children and youth to school for longer and longer periods of time Better educated citizens soon took better jobs and they spent paychecks buying everything from new technologies to new and bigger houses and new and bigger cars Increased household income allowed young members of the family to attend and even complete high school and increased the chance of affording the cost of attending college Second by the end of World War II the globalization of the international community was underway and the United States position and role in the international community were clearly challenged by the Soviet Union As the United States found itself in the Cold

War its national security required an ideological a military and a technological strategy Each of these strategies ultimately depended on higher or post secondary education and that had lasting implications for the nation s elementary and secondary schools The nation s engagement in the Cold War required well educated professionals to secure intelligence and to develop effective propaganda That engagement also required scientists mathematicians engineers to develop and to maintain the technology the nation required for its defense and subsequently for the space race with the Soviet Union Third and perhaps most importantly it was becoming increasingly clear in the Cold War Era that the nation would have to address its long history of denying civil rights to some of its citizens especially but not exclusively African Americans As the Supreme Court s 1954 Brown decision signified public education was the initial venue where the struggle for racial equality took place

Critical Issues in Education Jack L. Nelson,Stuart B. Palonsky,Mary Rose McCarthy,2020-08-12 Critical Issues in Education examines three questions that are at the core of the education debate in the United States What interests should schools serve What knowledge should schools teach How do we develop the human environment of schools When answering these queries the authors advocate the use of critical thinking which includes dialogue and dialectic reasoning Dynamic and interactive dialogue requires listening and assessment while dialectic stimulates the development of a creative response that encompasses both sides of an issue When applied these approaches engender an informative and stimulating discussion In order to explore the depth of current educational issues the Ninth Edition considers 15 topics providing supporting evidence and reasoning for two divergent views These issues include violence in schools the role of technology gender equity multiculturalism inclusion and disability and school choice Both civic and professional discussions regarding improvements will have consequences for students teachers and society As a result educational views and the social landscape in which they reside deserve critical study *The Political Economy of Education* Martin Carnoy,2024-02-15 A textbook providing academically rigorous yet clear explanations of the economics and politics driving today s educational systems and how economists analyze them This essential text for upper level undergraduate and graduate students in economics public policy and education covers all major topics and is packed with international examples *Oversight on Private Schools* United States. Congress. House. Committee on Education and Labor. Subcommittee on Elementary, Secondary, and Vocational Education,1981 **School Governance in Global Contexts** Nicholas Sun Keung PANG,Philip Wing Keung CHAN,2021-12-28 The edited volume provides multiple lens to view school governance practices exploring its modernization

ethical review future trend as well as the reciprocal influence of educational policy Drawing on a wide spread experience in the field of education governance from leading scholars emerging scholars doctoral research students and school principals this book includes insights from 11 countries and economies across four continents Asia Europe North America and Oceanic Most of them are high achievers in the OECD s PISA 2018 worldwide ranking in mathematics science and reading The book not only lifts to the forefront school governance educational thinking but also acknowledges their complex evolution especially under the current impact of COVID 19 Pandemic This book will be of interest to academics professionals and policymakers in education and school governance and any scholars who engage in historical studies of education and debates about educational governance

Lost Rights James Bovard, 2016-01-05 From Justice Department officials seizing people s homes based on mere rumors to the IRS and its master plan to prohibit the nation s self employed from working for themselves to the perpetrators of the Waco siege government officials are tearing the Bill of Rights to pieces Today s citizen is now more likely than ever to violate some unknown law or regulation and be placed at the mercy of an administrator or politician hungering for publicity Unfortunately the only way many government agencies can measure their public service is by the number of citizens they harass hinder restrain or jail James Bovard s *Lost Rights* provides a highly entertaining analysis of the bloated excess of government and the plight of contemporary Americans beaten into submission by a horrible parody of the Founding Fathers dream

The Economics of Equity in K-12 Education Goldy Brown III, Christos A. Makridis, 2023-02-07 Despite decades of increased state and federal funding for education student outcomes have largely deteriorated according to the 2022 NAEP exam results reading and math capabilities hit a thirty year low The emerging workforce is less prepared to handle the increasingly complex demands of the future which is likely to accelerate income inequality and stifle our nation s economic and social competitiveness Presenting the latest research on the economics of K 12 education this book makes recommendations about specific educational programming that have shown potential in increasing student outcomes for all learners focusing on human capital and practical recommendations for state and local policy makers and educational leaders

Bridges Burning William K. Jr. Tell, William Tell, Jr., 2006-04 After decades of Politically Correct attitudes big government fixes culture wars and muddled foreign policy the U S finds itself on the brink of what may become an historic decline from preeminence In addition recent trends and events such as globalism and the war on terror have created an environment for the U S which is increasingly more dangerous America was founded on the principles of democracy and freedom In the last half of the 20th century America forgot these important principles and allowed elements potentially dangerous to freedom and democracy to prevail What can citizens do to change this trend As the nation s social and political institutions are in peril of failure citizens must rise up and demand change Several areas are identified for reform including education the media and the political process Ready or not America s challenges of the 21st

century must be addressed with an eye to both the future's perils as well as the Founders principles Further information and topical updates may be accessed at <http://bridgesburning.com>
