“Sir, I used to speaker in front of public, so I do not need to attend Public Speaking class” Arman said one of the prospects when got follow up by my staff.

Not mistaken with the achievement of Mr. Arman, because as large people who used to speak publicly have the assumption that they have been able to do public Speaking well and accurately.

Actually what does that mean, the criteria that someone has done public speaking well and appropriately, note this 3M:

### **1 Attractive [ *Menarik* ]**

The first step to enter your public speaking category are good and proper. Public Speaking—you must attract the attention of the audience to hear what you are saying.

Notice the body language of your audience, whether there is a smile on their face or they are busy themselves because your public speaking is boring. Check out the characteristics of a bored audience in my article hard-coded your audience bored.

Practical low cost solutions to retrofitting existing buildings are discussed as well as the methods used to assess the suitability of an existing building and assembling a project to improve access for disabled people. Specific products and designs are illustrated and discussed with full working technical drawings and full specification details. These will reduce considerably the research time needed to produce a cost effective solution that will improve access for disabled people. A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area.

Kurz vor seinem Tod verfügte er, dass seine Stücke nicht neu aufgeführt werden dürfen.
