2007 report Trends in public spending on transportation and water infrastructure 1956 to 2004 Preface *Public Spending Policies in Latin America and the Caribbean* Daniel Riera-Crichton,Guillermo Vuletin,2024-08-30 In low and middle income economies public spending policies diverge significantly from those of industrialized nations due to structural differences Low and middle income economies often make long term commitments based on short term economic conditions leading to mismatches between spending maturity and economic cycles These mismatches can exacerbate fiscal imbalances and hinder economic growth by forcing compositional changes in public spending Public Spending Policies in Latin America and the Caribbean When Cyclicalities Meets Rigidities describes significant cyclical behavior variations in low and middle income markets Contrary to Keynesian principles public spending in these economies tends to be procyclical during economic booms driven by increased borrowing and political pressures to address social deficits but policy makers are unable or unwilling to retrench during economic busts This approach not only amplifies macroeconomic volatility but also plants the seeds for fiscal distress which is typically addressed by diminishing the quantity and quality of public investment with serious consequences for long term growth Labor market informality further complicates matters rendering automatic stabilizers like unemployment insurance impractical Instead governments rely on public employment and social transfer programs which are downwardly rigid and can contribute to the expansion of government size over time Addressing these anomalies requires policy interventions beyond traditional recommendations Implementing fiscal rules to restrain overspending during economic upturns enhancing the efficiency of public goods provision and establishing mechanisms to adjust social programs during economic fluctuations are suggested approaches In addition measures to protect public investment and mitigate biases against pension benefits could aid in fostering long term economic sustainability and welfare improvement Public Spending Policies in Latin America and the Caribbean will be of interest to policy makers researchers and anyone with an interest in developing mechanisms for helping low and middle income economies weather economic storms Trends in Public Spending on Transportation and Water Infrastructure, 1956 to 2004 Nathan Musick,2007 *A Social-psychological Interpretation of Public Expenditures* Harold Walter Guest,1926 **The Efficiency of Government Expenditure** Ms.Keiko Honjo,Mr.Sanjeev Gupta,Marijn Verhoeven,1997-11-01 This paper assesses the efficiency of government expenditure on education and health in 38 countries in Africa in 1984 95 both in relation to each other and compared with countries in Asia and the Western Hemisphere The results show that on average countries in Africa are less efficient than countries in Asia and the Western Hemisphere however education and health spending in Africa became more efficient during that period The assessment further suggests that improvements in educational attainment and health output in African countries require more than just higher budgetary allocations **Education at a Glance 2008 OECD Indicators** OECD,2008-09-08 A rich comparable and up to date array of indicators on the performance of education systems in OECD countries *Panama Poverty Assessment* ,2000-01-01 French edition Human Development Network Series As the new millennium approaches

Education will determine who has the keys to the treasures the world can furnish This is particularly important for the poor who have to rely on their human capital as the main if not the only means of escaping poverty In this way new challenges and opportunities arise for education Immense progress has been achieved in education in the last 50 years However immense challenges still remain This report lays out the vision for education and the ambitious international goals to which the Bank subscribes It notes the progress so far and the gaps that remain It describes the rich group of partners associated with the educational endeavor and how the Bank's role has evolved It conveys the Bank's global priorities and programs to help countries progress toward the international education goals and improve the quality of teaching and learning It illustrates the processes and operating principles that will help Bank staff contribute more effectively to better educational outcomes in each client country and to monitor success in implementing this strategy Also available in English Stock no 14560 and Spanish Stock no 14633

Institutional arrangements to make public spending responsive to the poor—(where) have they worked? Mogues, Tewodaj, Erman, Alvina, 2016-04-06 There has been some recognition in the development community that building technical capacity of public service providers and increasing resources is not enough to bring about development outcomes Researchers and practitioners are increasingly appreciating that accounting for the stated needs of communities supports the process of pro poor public resource allocation We examine four institutional arrangements that explicitly endeavor to make public spending responsive to the needs of the poor by moving decision making procedures closer to the population participatory budgeting community driven development CDD programs decentralization and delegated targeting of transfers Using the existing literature we compare experiences across the four arrangements and countries Regarding responsiveness to needs of the poor evidence is cautiously optimistic for participatory budgeting CDD and decentralization As for delegating the targeting of transfers to subnational authorities and communities evidence suggests that the effect may be regressive However there are important mediating effects of public spending responsiveness under the various institutional arrangements Local elite capture is a key factor dampening pro poor spending where either exogenous circumstances such as prevailing inequality or inadequate program design enable capture to materialize Politics is an important determinant of the success of these arrangements

Making services work for poor people World Bank,

Subsidies in World Fisheries Matteo Milazzo, 1998-01-01 In the past six years the world's fishery sector has reached a turning point with global fish production reaching a plateau of approximately 100 million tons annually While aquaculture output continued to grow yields from capture fisheries were uneven and showed increasing signs of stagnation because of widespread overfishing and overcapitalization ineffective management deteriorating resource health declining or flat global harvests and inefficient economic and trade policies This paper examines the role of subsidies in fisheries

Beyond the Arab Awakening Breisinger, Clemens, Ecker, Olivier, Al-Riffai, Perrihan, Yu, Bingxin, 2012 This report aims to inform and stimulate the debate on key policy priorities for poverty reduction and food security in light of the Arab Awakening Its

findings are based on an innovative combination of datasets and rigorous economic analysis Results suggest that poverty and income inequality in the Arab world are likely higher than official numbers have long suggested Given that poverty indicators seem to be misleading for many countries in the region the report introduces a new welfare measure reflecting food insecurity risks at both national and household levels to classify Arab countries into five risk groups Regression analyses further show that unlike in the rest of the world manufacturing and service sector led growth rather than agriculture led growth is most pro poor in Arab countries In addition high levels of public spending in the Arab world do not do as much to stimulate growth as in other world regions particularly in the case of education Three key policy recommendations emerge from this report 1 improve data and capacity as the basis for evidence based decisionmaking 2 foster growth that enhances food security at national and household levels and 3 significantly enhance the efficiency and retool the allocation of public spending More generally the report argues that the region urgently needs national dialogues about societies joint vision and economic development strategies Successful design and implementation of these strategies will require visionary leadership sound laws and institutions politicians who are accountable and listen to the voices of the people and civil society that is patient and accepts the tenets of democracy The Arab world is awake it is time to move forward

Public Expenditures, Growth, and Poverty Fan, Shenggen, 2008-05-11 Public Expenditures Growth and Poverty assesses the efficacy of poverty reduction programs in Latin America Africa and Asia by synthesizing studies conducted by the International Food Policy Research Institute over the past ten years Overall the studies find that investments in agricultural research infrastructure and human capital are beneficial in the long term while food aid and poverty reduction programs have little utility beyond immediately abating hunger and generating short run income effects The book develops a conceptual framework for analyzing public expenditures and their short and long run impact on poverty through various channels It surveys spending trends and analyzes the effect of growing public investment on urban and rural poverty through case studies of India China Thailand and Uganda And it highlights the advantages of directing spending toward public works programs that engage impoverished peoples rather than using the limited aid money on food subsidies and other passive donations Featuring discussions about the roles of various social safety net programs and a chapter devoted solely to the vexing poverty in sub Saharan Africa Public Expenditures Growth and Poverty will aid policy makers and encourage further more analytic study of worldwide poverty reduction programs
