Public Private Divide:

Common Values and the Public-Private Divide Dawn Oliver, 1999-08 This text is a study of the public private law divide in the common law tradition Its starting point is that substantive duties of legality fairness and rationality are imposed by the common law on bodies discharging public functions but not always on bodies discharging private functions

Citizenship: Feminist Perspectives Ruth Lister, 2017-03-14 The second edition of this classic text substantially revises and extends the original so as to take account of theoretical and policy developments and to enhance its international scope Drawing on a range of disciplines and literatures the book provides an unusually broad account of citizenship It recasts traditional thinking about the concept so as to pinpoint important theoretical issues and their political and policy implications for women in their diversity Themes of inclusion and exclusion at national and international level rights and participation inequality and difference are thus all brought to the fore in the development of a woman friendly gender inclusive theory and praxis of citizenship

Outsourcing War Amy E. Eckert, 2016-02-19 Recent decades have seen an increasing reliance on private military contractors PMCs to provide logistical services training maintenance and combat troops In *Outsourcing War* Amy E Eckert examines the ethical implications involved in the widespread use of PMCs and in particular questions whether they can fit within customary ways of understanding the ethical prosecution of warfare Her concern is with the *ius in bello* right conduct in war strand of just war theory Just war theorizing is generally built on the assumption that states and states alone wield a monopoly on the legitimate use of force Who holds responsibility for the actions of PMCs What ethical standards might they be required to observe How might deviations from such standards be punished The privatization of warfare poses significant challenges because of its reliance on a statist view of the world Eckert argues that the tradition of just war theory which predates the international system of states can evolve to apply to this changing world order With an eye toward the practical problems of military command Eckert delves into particular cases where PMCs have played an active role in armed conflict and derives from those cases the modifications necessary to apply just principles to new agents in the landscape of war

The Spaces of Mental Capacity Law Beverley Clough, 2021-10-21 This book explores the conceptual spaces and socio legal context which mental capacity laws inhabit It will be seen that these norms are created and reproduced through the binaries that pervade mental capacity laws in liberal legal jurisdictions such as capacity incapacity autonomy paternalism empowerment protection carer cared for disabled non disabled public private Whilst on one level the book demonstrates the pervasive reach of laws

questioning individuals mental capacity within and beyond the medical context which it is most commonly associated with at a deeper and perhaps more important level it challenges the underlying norms and assumptions underpinning the very idea of mental capacity and reflects outwards on the transformative potential of these realisations for other areas of law In doing so whilst the book offers lessons for mental capacity law scholarship in terms of reform efforts at both domestic and international levels it also offers ways to develop our understandings of a range of linked legal policy and theoretical concepts In so doing it offers new critical vantage points for both legal critique and conceptual change beyond mental capacity law The book will be of interest to researchers in mental capacity law disability law and socio legal studies as well as critical geographers and disability studies scholars Religious Freedom, Religious Discrimination and the Workplace Lucy Vickers, 2016-11-03 This book considers the extent to which religious interests are protected at work with particular reference to the protection against religious discrimination provided by the Equality Act 2010 It establishes a principled basis for determining the proper scope of religious freedom at work and considers the interaction of freedom of religion with the right not to be discriminated against on grounds of religion and belief The book locates the debates surrounding religion and belief equality within a philosophical and theoretical framework in which the importance of freedom of religion and its role within the workplace are fully debated This second edition is fully revised and updated in the light of recent case law from the UK and the European Court of Human Rights which deals with religious discrimination and freedom of religion

Transnational Law Miguel Maduro, Kaarlo Tuori, Suvi Sankari, 2014-05-01 In this era of globalisation different legal systems and structures no longer operate within their own jurisdictions The effects of decisions policies and political developments are having an increasingly wide reaching impact Nowhere is this more keenly felt than in the sphere of European Union law This collection of essays contributes to the co operative search for interpretative and normative grids needed in charting the contemporary legal landscape Written by leading lawyers and legal philosophers they examine the effects of law s de nationalisation by placing European law in the context of transnational law and demonstrate how it forces us to rethink our basic legal concepts and propose an approach to transnational law beyond the dichotomy of national and international law Research Handbook on Not-For-Profit Law Matthew Harding, 2018-12-28 This Research Handbook provides a comprehensive overview of scholarship on not for profit law The chapters written by world leading experts explore key ideas and debates in relation to theories of the not for profit sector the composition and scope of that sector not for profit organisations and the constitution the legal conception of charity the tax treatment of not for profit organisations and the regulation of not for profits The book serves to represent not for profit law as a field of academic inquiry and to point the way to future research in that field Keeping up Her Geography Tanya Ann Kennedy, 2006-11-01 Recently literary critics and some historians have argued that to use the language of separate spheres is to mistake fiction for reality However the tendency in this criticism is to ignore the work of feminist political theorists who argue that a range of ideologies of the

public and private consistently work to mask gender inequalities In *Keeping Up Her Geography* Tanya Ann Kenedy argues that these inequalities are shaped by multiple but interconnected spatial constructions of the public and private in US culture Moreover the early twentieth century when key spatial concepts the nation the urban the regional and the domestic were being redefined is a pivotal era for understanding how the public private binary remains tenaciously central to the defining of gender *Keeping Up Her Geography* shows that this is the case in a range of literary and cultural contexts in feminist speeches at the World's Columbian Exposition in middle class women's urban reform texts in southern writer Ellen Glasgow's novels and in the autobiographical narratives of Zora Neale Hurston and Agnes Smedley

Gender Politics in Transitional Justice Catherine O'Rourke, 2013-08-22 What role do transitional justice processes play in determining the gender outcomes of transitions from conflict and authoritarianism What is the impact of transitional justice processes on the human rights of women in states emerging from political violence *Gender Politics in Transitional Justice* argues that human rights outcomes for women are determined in the space between international law and local gender politics The book draws on feminist political science to reveal the key gender dynamics that shape the strategies of local women's movements in their engagement with transitional justice and the ultimate success of those strategies termed the local fit Also drawing on feminist doctrinal scholarship in international law the international frame examines the role of international law in defining harms against women in transitional justice and in determining the from and to of transitions from conflict and authoritarianism This book locates evolving state practice in gender and transitional justice over the past two decades within the context of the enhanced protection of women's human rights under international law Relying on original empirical and legal research in Chile Northern Ireland and Colombia the book speaks more broadly to the study of gender politics and international law in transitional justice

Domestic Contradictions Priya

Kandaswamy,2021-07-06 In *Domestic Contradictions* Priya Kandaswamy analyzes how race class gender and sexuality shaped welfare practices in the United States alongside the conflicting demands that this system imposed upon Black women She turns to an often neglected moment in welfare history the advent of the Freedmen s Bureau during Reconstruction and highlights important parallels with welfare reform in the late twentieth century Kandaswamy demonstrates continuity between the figures of the vagrant and welfare queen in these time periods both of which targeted Black women These constructs upheld gendered constructions of domesticity while defining Black women s citizenship in terms of an obligation to work rather than a right to public resources Pushing back against this history Kandaswamy illustrates how the Black female body came to represent a series of interconnected dangers to white citizenship heteropatriarchy and capitalist ideals of productivity and how a desire to curb these threats drove state policy In challenging dominant feminist historiographies Kandaswamy builds on Black feminist and queer of color critiques to situate the gendered afterlife of slavery as central to the historical development of the welfare state

The Emergence of EU Contract Law Lucinda Miller, 2011-09-22 The emergence of a pan European contract law is one of the most significant legal developments in Europe today The Emergence of EU Contract Law Exploring

Europeanization examines the origins of the discipline and its subsequent evolution. It brings the discussion up to date with full analysis of the debate on the Common Frame of Reference and the future that this ambiguous instrument may have in the contemporary European legal framework. One of the central themes of the book is exploration of the multi level open architecture of the EU legal order and the implications of that architecture for the EU's private law programme. The analysis demonstrates that the key to understanding European contract law in the 21st century lies in adopting a perspective and mechanisms suitable for a legal order populated by multiple sources of private law. Legal pluralism is offered as a theoretical construct with the capacity to shape the future of European private law, shifting the analytical spotlight beyond the traditional centralized legislative means of regulation. In so doing, softer mechanisms are introduced for the governance of contract law mechanisms that enable coordination between the different sites at which contract law operates. This reorientation in thinking about European contract law indeed about Europeanization itself enables the inevitable diversity and pluralism that is a feature of multi level Europe to be captured within a framework that maximizes the opportunities for mutual learning and exchange across private law sites.
