Committee on Merchant Marine and Fisheries,1940      **Surfactants Applications Directory** D.R. Karsa,P.J. Donnelly,J.M. Goode,2012-12-06 Existing surfactants directories tend to focus on product identification by tradename producer or chemical type enabling the user only to identify product equivalents and surfactant suppliers Application information where available is usually scant or given as a footnote This new directory approaches the identification of surfactants primarily from the applications standpoint Hence the formulator or end user can readily assess the products available for use in a particular industry sector and select materials giving the required surface active properties For example a formulator of agrochemicals for crop protection can turn to the section which refers to surfactants for use in the agrochemical industry and then easily identify a wetter dispersant system for the production of water dispersible granules Information is presented in an alternative format in the second part of the directory which will help the user to identify swiftly products for a particular application by surface active properties It is difficult if not impossible to identify an industry which does not directly or indirectly utilise surfactants Therefore it has proved necessary to simplify industry classifications to encompass a variety of uses under broader sector titles The industry classifications adopted here have been used in many previous publications and papers and define as accurately as possible the major industries and applications serviced by the surfactant industry The editors have been particularly pleased with the support and response of the industry in the supply of data      *The Fleet* ,1915

**Removal of Restriction on Use of Laid-up Fleet** United States. Congress. House. Merchant Marine and Fisheries,1940      **Dead Tree Media** Michael Stamm,2018-10-16 A deep and timely account of how American newspapers were produced and distributed on paper Winner of the Best Book in Canadian Business History by the Canadian Business History Association Popular assessments of printed newspapers have become so grim that some have taken to calling them dead tree media as a way of invoking the medium s imminent demise There is a literal truth hidden in this dismissive expression printed newspapers really are material goods made from trees And throughout the twentieth century the overwhelming majority of trees cut down in the service of printing newspapers in the United States came from Canada In *Dead Tree Media* Michael Stamm reveals the international history of the commodity chains connecting Canadian trees and US readers Drawing on newly available corporate documents and research in archives across North America Stamm offers a sophisticated rethinking of the material history of the printed newspaper Tracing its industrial production from the forest to the newsstand he provides an account of the obscure and often hidden labor involved in this manufacturing process by showing how it was driven by not only publishers and journalists but also lumberjacks paper mill workers policymakers chemists and urban and regional planners Stamm describes the 1911 shift in tariff policy that gave US publishers duty free

access to Canadian newsprint providing a tremendous boost to Canadian paper manufacturers and a significant subsidy to American newspaper publishers He also explains how Canada attracted massive American foreign investment in paper mills around the same time that US publishers were able to gain greater access to Canada's vast spruce forests Focusing particularly on the Chicago Tribune Stamm provides a new history of the rise and fall of both the mass circulation printed newspaper and the particular kind of corporation in the newspaper business that had shaped many aspects of the cultural political and even physical landscape of North America For those seeking to understand the travails of the contemporary newspaper business *Dead Tree Media* is essential reading
