**Punishment, Danger and Stigma** Nigel Walker, 1980-01-01 To find more information about Rowman and Littlefield titles please visit [www.rowmanlittlefield.com](http://www.rowmanlittlefield.com)      **The Moral Benefit of Punishment** Frances E. Gill, 2003-01-01 In this provocative work Frances E. Gill argues that self-determination is a universal goal of correctional counseling. Gill leads the reader through a rigorous philosophical justification of the paternalism of state punishment in service of this goal. Drawing on the thought of Maurice Merleau-Ponty, Mitchell Aboulafia, and Lawrence Kohlberg, Gill shows that the internalization of moral values which an offender could achieve through psychotherapy is necessary for true self-determination. After surveying the predominant contemporary schools of psychotherapy, she shows that in spite of the differences among existing theoretical orientations, practitioners of correctional counseling consistently strive to facilitate their clients' self-determination. Gill's intelligent treatise will be a valuable reference for scholars of moral and political philosophy, clinical and correctional psychology, and criminal justice, as well as for practicing correctional counselors.

It features a number of distinguished contributors addressing the topic of criminal justice. Part I considers The Moral and Metaphysical Sources of the Criminal Law, with contributions by Michael S. Moore, Lawrence Rosen, and Martin Shapiro. The four chapters in Part II all relate more or less directly to the issue of retribution, with papers by Hugo Adam Bedau, Michael Davis, Jeffrie G. Murphy, and R. B. Brandt. In the following part, Dennis F. Thompson, Christopher D. Stone, and Susan Wolf deal with the special problem of criminal responsibility in government, one of great importance in modern society. The fourth and final part, echoing the topic of NOMOS XXIV, Ethics, Economics, and the Law, addresses the economic theory of crime. The section includes contributions by Alvin K. Klevorick, Richard A. Posner, Jules L. Coleman, and Stephen J. Schulhofer. A valuable bibliography on criminal justice by Andrew C. Blum concludes this volume of NOMOS.

**Criminal Justice Theory** Roger Hopkins Burke, 2013-03-01 Criminal Justice Theory examines the theoretical foundations of criminal justice in the modern era, whilst also considering legal philosophy and ethics, explaining criminal behaviour, and discussing policing, the court process, and penology in the context of contemporary socio-economic debates. Throughout the book, a realist theoretical thread acts as a guide, interlinking concepts of social progress, conflict, and cerebral models of criminal justice, whilst also recognizing our collusion in the creation of an increasingly pervasive culture of socio-control which now characterizes contemporary society. The complex theoretical issues tackled in this book are addressed in an accessible style, making this a relevant and comprehensive introduction to criminal justice theory for students on a wide range of undergraduate criminal justice modules. It is also a helpful guide for those commencing postgraduate studies in the disciplines of criminal justice, criminology, and law.

The Criminalization of European Cartel Enforcement Peter Whelan, 2014-08-07 Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a

custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the complexity of the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction *Handbook of Crime Correlates* Lee Ellis, David P.

which is critically examined with particular attention to its use by the European Court of Justice in recent leading cases This book explores the constitutional principles underlying it both those determining the substantive values it embodies and those determining its scope and extent Other chapters consider the phenomenon of preventative criminalisation at EU level and the protection of subsidiarity and proportionality in EU criminal law The balance between effective EU action proper control of competence and adequate protection of individual rights is of growing importance as EU criminal law expands but as this book suggests has not yet been fully articulated or entrenched by the institutions of the EU
