**Chemical Nomenclature** K.J. Thurlow,2012-12-06 Chemical nomenclature can be a complicated subject As a result most works on the subject are rather dry textbooks and primarily consist of sets of instructions on how to name chemicals This practical book proves that chemical nomenclature can be interesting not just a necessary evil Written in a lively and engaging style by experts in their particular fields this new book provides a general discussion on why good clear nomenclature is needed It introduces the reader to the various forms of nomenclature without reading like a textbook Both systematic and trivial nomenclature systems are used widely and interchangeably in chemistry and this new book covers both areas For example systematic nomenclature in both the CAS and IUPAC styles is introduced These systems have many similarities but important differences which the chemist should be aware of Specialized naming systems are needed for polymers and natural products and these areas are covered in separate chapters The naming of elements is a very topical subject at the moment and so this is included to ensure a comprehensive coverage Covering a wide range of topics in the area of nomenclature and acting as an introduction to a varied field this book will be of interest to industrial chemists as well as students at senior undergraduate and postgraduate level

Economic Microbiology: Primary Products of Metabolism A.H. Rose,2012-12-02 Economic Microbiology Volume 2 Primary Products of Metabolism is part of a multi volume series that aims to provide authoritative accounts of the many facets of exploitation and control of microbial activity It discusses the production of industrially important chemicals by microbiological processes specifically the production of primary products of metabolism This volume includes accounts of the production of organic acids nucleotides and amino acids which form large and stable sectors of the microbiological industries It also provides information on polysaccharide fermentations which are currently undergoing extensive development Further there are discussions of the production of lipids and polyhydroxy alcohols which have yet to be introduced on a commercial scale but could well become economically viable in the near future Finally there is also an account of the production of acetone and butanol by bacteria This fermentation process featured significantly in the career of Chaim Weizmann the first President of the State of Israel and it is still operated in some countries

Gebelein, Charles E. Carraher, 2012-12-06 The vast array of libraries in the world bear mute witness to the truth of the 3000 year old observation of King Solomon who stated of making many books there is no end and much study is a weariness of the flesh Yet books are an essential written record of our lives and the progress of science and humanity Here is another book to add to this huge collection but hopefully not just another collection of pages but rather a book with a specific purpose to aid in alleviating the weariness of the flesh that could arise from much studying of other journals and books in order to obtain the basic information contained herein This book is about polymeric materials and biological activity as the title notes Polymeric materials in the broad view taken here would include not only synthetic polymers e g polyethylene polyvinyl chloride polyesters polyamides etc but also the natural macromolecules e g proteins nucleic acids polysaccharides which compose natural tissues in humans animals and plants In the broad sense used here biological activity is any type of such action whether it be in medication pest control plant growth regulation and so on In short this book attempts to consider briefly the use of any type of polymeric material system with essentially any kind of biological activity **CRC Handbook of Chemistry and Physics** David R.
