Liability for Pure Economic Loss in Europe, 200? **Comparative Law in Eastern and Central Europe** Aleksander W. Bauknecht, Branisław Sitek, Jakub J. Szczerbowski, 2014-07-24 Comparative law is a research methodology which has been increasingly fashionable in recent decades as comparisons between common law and civil law have dominated the law studies landscape There are many methods of comparative law in use including comparison of legal rules comparison of cases and comparison of legal theories Each of these methods has strong proponents and opponents Dogmatic comparisons of rules are criticized for not giving the whole picture of law in action but praised for being the first and the only truly legal step in comparative research Case based comparisons are praised for enabling us to compare the true understanding of rules by courts yet the critics of this method point out that only the higher courts decisions are subject to comparison and most cases do not reach this stage Finally comparisons of legal theories are praised for enabling us to know the spirit of the laws yet opponents would argue that many countries sharing the same theory would draw opposite conclusions from it This book is a result of the attempted and successful introduction of comparative law into the region of Eastern and Central Europe The subject has induced interest beyond expectations This volume opens with a chapter on the unification of law both from the perspective of institutional unification by such supra state organizations spontaneous and institutionalized unifications between two or more legal systems and the methods of choosing the right rules in the unification process Chapters two and three follow the classical division of private and public law as proposed by the brilliant Roman lawyer Ulpian Overall the chapters in this book offer an interesting and engaging commentary on the

This traditional branch of law not only tackles questions which concern every lawyer whatever his legal expertise but also concerns each person's most fundamental rights on a worldwide scale. Following a general introduction that probes the distinction between tort and crime and the relationship between tort and contract, the monograph describes how the concepts of fault and unlawfulness and of duty of care and negligence are dealt with in both the legislature and the courts. The book then proceeds to cover specific cases of liability such as professional liability, liability of public bodies, abuse of rights, injury to reputation and privacy, vicarious liability, liability of parents and teachers, liability for handicapped persons, product liability, environmental liability, and liability connected with road and traffic accidents. Principles of causation, grounds of justification, limitations on recovery, assessment of damages and compensation, and the role of private insurance and social security are all closely considered. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for lawyers in Greece. Academics and researchers will also welcome this very useful guide and will appreciate its value not only as a contribution to comparative law but also as a stimulus to harmonization of the rules on tort.

French Civil Liability in Comparative Perspective Jean-Sébastien Borghetti, Simon Whittaker, 2019-12-26. The French law of torts or of extra contractual liability is widely seen as exceptional. For long it was based on a mere five articles of the Civil Code of 1804, but on this foundation the courts and legal scholars have constructed liabilities for fault and strict liability of an extraordinary breadth and significance. While the rest of the general law of obligations, including contract in the Civil Code, was reformed in 2016 by executive ordinance, this area was left aside, being the subject in 2017 of a proposal by the French Government for the legislative reform of the law of civil liability, a new legislative category to include both contractual and extra contractual liability. This work considers important aspects of this developing area of French law in a series of essays by French lawyers and comparative lawyers working in French law and other civil law systems. In doing so, it provides insight into the doctrinal thinking and judgments of French lawyers as well as the possible directions in which this area of the law may be developed in the future.

Managing Environmental Risks through Insurance Katarzyna Malinowska, Dorota Maśniak, 2024-04-08. This book identifies the role of insurance in a comprehensive system for managing environmental risks at the local, regional, and global level. National and international legal instruments regulating environmental protection, especially aspects like pollution, are not precisely reflected in insurance concepts intended to cover environmental risks. As such, there is a need to identify environmental risks and to propose a taxonomy of environmental risks for various types of insurance coverage. The authors refer to the issues of liability in environmental protection, the scope of insurance coverage, and comment on specific issues the importance of which has been noticed by the legislator or insurance practice. The book examines these issues horizontally and vertically from various standpoints, focusing on insurance as a means of managing environmental risks. In this regard, it mainly concentrates on 1. identifying and analyzing environmental risks and methods for managing them via private and public instruments and 2.

insuring these risks The book is intended for all those interested in the field of insurance and environmental risk regimes including lawyers academics and legal professionals *Street on Torts* Christian Witting, 2018 *Street on Torts* provides a scholarly and incisive treatment of the law of torts with a focus upon key concepts and clear explanations
