learn about criminology in context **Quick Fixes** Benjamin Y. Fong, 2023-07-11 Drugs are ubiquitous in the past and present of capitalist society What can they tell us about our society and economy Americans are in the midst of a world historic drug binge Opiates amphetamines benzodiazepines marijuana antidepressants antipsychotics across the board consumption has shot up in the 21st century At the same time the United States is home to the largest prison system in the world justified in part by a now zombified war on drugs How did we get here Quick Fixes is a look at American society through the lens of its pharmacological crutches Though particularly acute in recent decades the contradiction between America's passionate love and intense hatred for drugs has been one of its defining characteristics for over a century Through nine chapters each devoted to the modern history of a drug or class of drugs Fong examines Americans' fraught relationship with psychoactive substances As society changes it produces different forms of stress isolation and alienation These changes in turn shape the sorts of drugs society chooses By laying out the histories functions and experiences of our chemical comforts the hope is to help answer that ever perplexing question what does it mean to be an American **Higher Wisdom** Roger Walsh, Charles S. Grob, 2005-09-01 Psychedelics have been a part often a central and sacred part of most societies throughout history and for half a century psychedelics have rumbled through the Western world seeding a subculture titillating the media fascinating youth terrifying parents enraging politicians and intriguing researchers Not surprisingly these curious chemicals fascinated some of the foremost thinkers of the twentieth century fourteen of whom were interviewed for this book Because no further human research can be done these researchers constitute an irreplaceable resource Higher Wisdom offers their fascinating anecdotes invaluable knowledge and hard won wisdom the culmination of fifty years of research and reflection on one of the most intriguing and challenging topics of our time **The New Social Contract** Joseph Dillan Davey, 1995-08-30 According to the Justice Department's National Crime Survey the crime rate in the United States is lower today than it was when Nixon was in the White House In spite of this political leaders demand nationwide prison construction as a response to the war on drugs and to accommodate the results of the new three strikes law At the same time the gap between rich and poor is wider than ever and the needs of the non disruptive poor are being ignored by the economic and political elites to the point of unprecedented homelessness The author predicts this widening gap will prompt the return of 1960s style civil turmoil which will lead to the end of the war on drugs and the emptying of hundreds of thousands of cells so the protesting poor can be plausibly threatened with incarceration **Drugs, Crime and Public Health** Alex Stevens, 2010-10-04 Drugs Crime and Public Health provides an accessible but critical discussion of recent policy on illicit drugs Using a comparative approach centred on the UK but with insights and complementary data gathered from the USA and other countries it argues that problematic drug use can only be understood in the social context in which it takes place *Encyclopedia of Prisons and Correctional Facilities* Mary Bosworth, 2004-12-15 Click Additional Materials for downloadable samples The two volume Encyclopedia of Prisons and Correctional Facilities aims to provide a

critical overview of penal institutions within a historical and contemporary framework The United States has the highest incarceration rate in the world a fact that has caused lawmakers advocates and legal professionals to rethink punishment policies as well as develop new policies on prisoner education and rehabilitation Issues of race gender and class are fully integrated throughout in order to demonstrate the complexity of the implementation and intended results of incarceration The Encyclopedia contains biographies articles describing important legal statutes and detailed and authoritative descriptions of the major prisons in the United States Comparative data and examples are employed to analyze the American system within an international context The Encyclopedia s 400 entries are all written by recognized authorities The appendix contains a comprehensive listing of every federal prison in the U S complete with facility details and service information Key Themes Juvenile Justice Labor Prison Architecture Prison Populations Prison Reform Privatization Race Gender Class Security and Classification Sentencing Policy and Laws Staff Theories of Punishment Treatment Programs Editorial Board Stephanie Bush Baskette National Council on Crime and Delinquency NCCD Jeanne Flavin Fordham University Esther Heffernan Edgewood College Jim Thomas Northern Illinois University

Towards More Effective Global Drug Policies Caroline Chatwin, 2018-05-25 This book examines the topical issue of global drug policy and outlines five steps that could be taken to improve its effectiveness A public criminology approach is applied to explore not only what could be done but also why it matters and how it could be achieved It argues that more effective global drug policies require an acknowledgement of the failure of a war on drugs approach and the harms it has caused Instead strategies that reduce drug related harm should be prioritised An innovative and diverse range of approaches should be developed that are underpinned by evaluation and dissemination of results Finally the horizons of the drug policy debate should be broadened In line with the central aims of public criminology this book provides an accessible contribution to global drug policy debates that links theory and practice and which will have appeal to a wide range of audiences

Schaeffer,2003 This best selling text vividly shows how political and economic changes affect people s lives in different settings around the world Globalization the author argues is not completely new Instead the current wave of globalization builds on international institutions created just after World War II and was given new impetus by policies introduced in the 1970s and 80s The new edition has five new chapters as well as updates and changes throughout Visit our website for sample chapters Place Matters Peter Dreier,John Mollenkopf,Todd Swanstrom,2014-08-15

are so fearful and why we fear the wrong things now updated for the age of Trump In the age of Trump our society is defined by fear Indeed three out of four Americans say they feel more fearful today than they did only a couple decades ago But are we living in exceptionally perilous times In his bestselling book *The Culture of Fear* sociologist Barry Glassner demonstrates that it is our perception of danger that has increased not the actual level of risk Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining advocacy groups that raise money by exaggerating the prevalence of particular diseases TV shows that create a new scare every week to garner ratings Glassner spells out the prices we pay for social panics the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears All the while we are distracted from the true threats from climate change to worsening inequality In this updated edition of a modern classic Glassner examines the current panics over vaccination and political correctness and reveals why Donald Trump's fearmongering is so dangerously effective
