Reclaiming The Truth Contribution To A Critique Of Cultural Relativism:

Reclaiming Truth Christopher Norris, 1996 Truth Christopher Norris reminds us is very much out of fashion at the moment whether at the hands of politicians media pundits or purveyors of postmodern wisdom in cultural and literary studies Across a range of disciplines the idea has taken hold that truth talk is either redundant or the product of epistemic might Questions of truth and falsehood are always internal to some specific language game history is just another kind of fiction philosophy is only a kind of writing law is a wholly rhetorical practice In *Reclaiming Truth* Norris critiques these fashionable trends of thought and mounts a specific challenge to cultural relativist doctrines in epistemology philosophy of science ethics and political theory Norris presents his case in a series of closely argued chapters that take issue with the relativist position He attempts to rehabilitate the value of truth in philosophy of science by restoring a lost distinction between concept and metaphor and argues that theoretical discourse so far from being an inconsequential activity has very real consequences particularly in ethics and politics This debate has become skewed he suggests through the widespread and typically postmodern idea that truth claims must always go along with a presumptive or authoritarian bid to silence opposing views On the contrary there is nothing as dogmatic or as silencing as a relativism that acknowledges no shared truth conditions for valid or responsible discourse Norris also offers a timely reassessment of several thinkers Althusser and Derrida among them whose reception history has been distorted by the vagaries of short term intellectual fashion *Reclaiming Truth* will be welcomed by readers concerned with the uses and abuses of theory at a time when such questions are in urgent need of sustained and serious debate

Virtual Reality Melanie Chan, 2015-07-30 The idea of virtual realities has a long and complex historical trajectory spanning from Plato's concept of the cave and the simulacrum to artistic styles such as Trompe L'oeil and more recently developments in 3D film television and gaming However this book will pay particular attention to the time between the 1980s to the 1990s when virtual reality and cyberspace were represented particularly in fiction as a wondrous technology that enabled transcendence from the limitations of physical embodiment The purpose of this critical historical analysis of representations of virtual reality is to examine how they might deny repress or overlook embodied experience Specifically the author will contend that embodiment is a fundamental aspect of immersion in virtual reality rather than something which is to be transcended In this way the book aims to challenge distorted ideas about transcendence and productively contribute to debates about embodiment and technology

Cosmopolitanism and Solidarity David A. Hollinger, 2006-03-06 Who are we is the question at the core of these fascinating essays from one of the nation's leading intellectual historians With old identities increasingly destabilized throughout the world the result of demographic migration declining empires and the quickening integration of the global capitalist economy and its attendant communications systems David A. Hollinger argues that the problem of group solidarity is emerging as one of the central challenges of the twenty first century Building on many of the topics in his highly acclaimed earlier work these essays treat a number of contentious issues

many of them deeply embedded in America's past and present political polarization. Essays include Amalgamation and Hypodescent Enough Already, Universities Do Not Need More Christianity, Cultural Relativism, Why Are Jews Preeminent in Science and Scholarship, The Veblen Thesis Reconsidered, and The One Drop Rule and the One Hate Rule. Hollinger is at his best in his judicious approach to America's controversial history of race, ethnicity, and religion, and he offers his own thoughtful prescriptions as Americans and others throughout the world struggle with the pressing questions of identity and solidarity.

The Future of Reason, Science and Faith J. Andrew Kirk, 2016-12-05 Focusing on the history of ideas, this book explores important questions concerning knowledge in relation to philosophy, science, ethics, and Christian faith. Kirk contributes to the current debate about the intellectual basis and integrity of Western culture, exploring controversial issues concerning the notions of modernity and post-modernity. Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics, Kirk seeks to show that in post-Christian Europe, the Christian faith still possesses intellectual resources worthy to be reckoned with. This book's principal argument is that contemporary Western society faces a cultural crisis. It explores what appears to be an historical enigma, namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines. Kirk draws conclusions, particularly in the area of ethical decision making, from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society.

Shakespeare and Continental Philosophy Jennifer Ann Bates, 2014-09-10 This collection of 15 essays by celebrated authors in Shakespeare studies and in continental philosophy develops different aspects of the interface between continental thinking and Shakespeare's plays.

The Virtual University? Kevin Robins, Frank Webster, 2002-11-07 Higher education is changing in scope, style, technology, and objectives. This book looks at the impact of information technologies on higher education and the reorganization of universities in more managerial and business directions. The book combines empirical and analytical chapters from scholars on both sides of the Atlantic.

The Cambridge Companion to Saussure Carol Sanders, 2004-12-02 Ferdinand de Saussure is widely considered to be the founder of both modern linguistics and structuralism. The first to establish the structural study of language, he identified the difference between the system of language (*Langue*) and the idiosyncratic speech of individuals (*Parole*) and was first to distinguish between the synchronic study of language (language at a given time) and the diachronic language as it changes through time. This Companion brings together a team of leading scholars to offer a fresh new account of Saussure's work, as well as looking at his pioneering and renowned *Course in General Linguistics* of 1916, they consider his lesser-known early work, his more recently discovered manuscripts, and his influence on a range of other disciplines such as cultural studies, philosophy, literature, and semiotics. With contributions by specialists in each field, this comprehensive and accessible guide creates a unique picture of the lasting importance of Saussure's thought.

Realism and Racism Bob Carter, 2002-01-04

There are continuing difficulties within social science surrounding concepts of race. This book suggests that these difficulties stem from the uncertain ontological and epistemological status of ideas about race itself, a consequence of the recognition that concepts of race have all but lost their relevance as sociologically significant descriptions. This book surveys ways in which social scientists have attempted to come to terms with this situation before developing an alternative approach based on recent work by realist authors. This approach offers a radical revision of orthodox debates about race concepts, about the possibility of a social science and about the nature of empirical research. This is illustrated through two policy examples: an account of post-war migration to the UK and debates about trans-racial adoption in the UK and the USA.

Soulsunami Leonard Sweet, 2009-10-14 Road rage animal rights cyberporn crystal healing doctor assisted suicide everywhere we look the signs all tell us we're living in a post-Christian culture. Or are we? Leonard Sweet, cultural historian, preacher, futurist, creatologist and preeminent thinker, firmly believes we live today in a pre-Christian society fraught with challenges, dangers, critical choices and above all, tremendous potential for the church. The outcome will depend on our response to today's flood of religious pluralism that threatens to sweep us away. What will we do? Deny the reality of the incoming surge? Hunker in the bunker, hermetically sealing ourselves in an increasingly out-of-touch church counterculture? Or will we boldly hoist our sails and looking to God for guidance and strength, move with confidence and purpose over the waves? *SoulTsunami* is a fascinating, even mind-numbing look at the implications of our changing world for the church in the 21st century. With uncanny wisdom and trademark wit, Leonard Sweet explores ten key futuribles, precision guesses that fall short of predictions, expanding on and relating topics ranging from the reentry of theism and spiritual longing in contemporary society to the impact of modern technology to the global renaissance to models for the church to reach people caught in the cultural maelstrom. Here are eye-opening perspectives on the church from within and from without, from its surrounding society. Lively, well-written and provocative, *SoulTsunami* is a clarion call for Christians to remove their tunnel-vision glasses and take a good look at the swelling postmodern flood. It also is a voice of encouragement affirming the church in its role as God's lifeboat. And it is a passionate prophetic guide pointing the way to reach a world swept out to sea.

Philosophy and Psychoanalytic Theory Bert Olivier, 2009 The essays brought together in this volume are written from the dual perspectives of philosophy and psychoanalytic theory. Sometimes more weight is given to the one perspective than to the other and vice versa, but always with the conviction that the rational argumentative and hermeneutic interpretive approach of philosophy requires the sobering influence of psychoanalytic theory's conception of the human being as a split subject prone to the laws of the unconscious no less than to those of reason. Topics range from the question concerning the relation between discourse, evil and the agency of the subject to that of the non-relativistic ethical positioning of the psychotherapist from the problem of overcoming relativism by way of a poststructuralist understanding of language to that of a cogent Derridean philosophical response to global terrorism and from a Lacanian understanding of narrative identity of human knowledge as paranoid and

of trauma literature to a Kristevan perspective on nature as abject in the light of the degradation of ecosystems globally

The Bellum Grammaticale and the Rise of European Literature Erik Butler, 2016-03-23 The now forgotten genre of the bellum grammaticale flourished in the sixteenth and seventeenth centuries as a means of satirizing outmoded cultural institutions and promoting new methods of instruction In light of works written in Renaissance Italy ancien régime France and baroque Germany Andrea Guarneri's *Bellum Grammaticale* 1511 Antoine Furetière's *Nouvelle allégorique* 1658 and Justus Georg Schottelius *Horrendum Bellum Grammaticale* 1673 this study explores early modern representations of language as war While often playful in form and intent the texts examined address serious issues of enduring relevance the relationship between tradition and innovation the power of language to divide and unite peoples and canon formation Moreover the author contends the language wars illuminate the shift from a Latin based understanding of learning to the acceptance of vernacular erudition and the emergence of national literature

Christology From Within and Ahead Mark Chan, 2021-10-01 Troeltsch's struggle with historicism sets the stage for a proposal that Christology be done from within and from ahead Gadamer's philosophical hermeneutics and Schleiermacher's experiential theology inform a Christology from within that is rooted in tradition and experience while Pannenberg's notion of proleptic eschatological fulfilment serves as resource for a Christology from ahead This volume develops a hermeneutical Christology that takes into account the historical contingency of knowledge and seeks a Christology beyond the objectivism of timeless truth and the relativism of absolutised contextuality The book is concluded with an examination of the convergence of critical traditionality experiential appropriation and eschatological prolepsis in the Christology of the apostle Paul The author explores how Christology might respond to the scandal of universality in postmodernity without defaulting on its claim to transcontextual referentiality

After Postmodernism Jose Lopez, Garry Potter, 2005-03-01 What comes after postmodernism A buzzword which began as an energising radical critique became by the 20th Century's end a byword for fracture eclecticism political apathy and intellectual exhaustion The last few years have seen a growing interest in critical realism as a possible alternative way of moving forward The virtues of critical realism lie in its successful provision of a philosophical grounding for the social sciences and humanities and of a methodology applicable to many different fields of analysis After Postmodernism brings together some of the best known names in the field to present the first truly interdisciplinary introduction to critical realism The book presents the reader with a compendium of accessible essays illustrating the connection between meta theory theory and substantive research across Sociology Philosophy Literary Studies Politics Media Studies Psychology and Science Studies The flexibility of critical realism is illustrated in the range of topics discussed ranging from quantum mechanics to cyberspace to literary theory nature smoking the future of Marx the unconscious and of course postmodernism and the future of theory itself Contributors Allison Assiter Ted Benton Francis Barker Roy Bhaskar Jean Bricmont Sue Clegg Andrew Collier Justin Cruickshank Robert Fine David Ford Tim Forsyth Rom Harré Pam Higham Philip Hodgkiss Jose Lopez Christopher

Norris Bertell Ollman Jenneth Parker Frank Pearce Douglas V Porpora Garry Potter John Scott Philip Tew Charles R Varela Anthony Woodiwiss Gender and Sexuality in South African Music Chris Walton, Stephanus Muller, 2005-05-01 During the past two decades the study of sexuality and gender in music has become a decidedly mainstream activity To be sure music has long been obviously and intimately involved in matters pertaining to relations both sexual and otherwise between and amongst the sexes Its use in courtship is the one that perhaps first comes to mind this use being probably as old as music itself This book contains all the papers presented at the conference by the same name Badiou's 'Being and Event' Christopher Norris, 2009-05-24 Alain Badiou's Being and Event is the most original and significant work of French philosophy to have appeared in recent decades It is the magnum opus of a thinker who is widely considered to have re shaped the character and set new terms for the future development of philosophy in France and elsewhere This book has been written very much with a view to clarifying Badiou's complex and demanding work for non specialist readers It offers guidance on philosophical and intellectual context key themes reading the text reception and influence and further reading **Aspects of Enlightenment** Thomas Osborne, 1998-10-01 Aspects of Enlightenment is an attempt to reconfigure the terrain of contemporary social theory Critical of sociologistic approaches in that discipline and of vague concepts such as modernity and postmodernity the book argues that the proper subject matter of social theory is enlightenment itself Dismissing for the most part the conflicts in social and critical theory between realist and relativist approaches the book argues for the merits of various limited kinds of anti foundationalism that would guide fieldwork in specific areas of enlightenment As a means of illustrating this approach the book focuses on case studies that consider critical attitudes to scientific therapeutic and aesthetic kinds of enlightenment A key theme throughout the book is the status of the social sciences themselves with regard to the question of enlightenment as well as with the nature of the vocation of the intellectual as the embodiment of particular kinds of critical ethos Finally the book in an oblique homage to the work of Michel Foucault who figures here along with Max Weber as an exemplar of the critical attitude to enlightenment *Education Policy and Realist Social Theory* Robert Archer, 2018-05-04 In Europe welfare state provision has been subjected to market forces Over the last two decades the framework of economic competitiveness has become the defining aim of education to be achieved by new managerialist techniques and mechanisms This book thoughtfully and persuasively argues against this new vision of education and offers a different more useful potential approach This in depth major study will be of great interest to researchers in the sociology of education education policy social theory organization and management studies and also to professionals concerned about the deleterious impact of current education policy on children's learning and welfare Beyond Postmodernism Klaus Stierstorfer, 2012-05-02 After the veritable hype concerning postmodernism in the 1980s and early 1990s when questions about when it began what it means and which texts it comprises were apt to trigger heated discussions the excitement has notably cooled down at the turn of the century Voices are now beginning to be heard which seem to suggest a new episteme

in the making which points beyond postmodernism while it remains at the same time very uncertain whether what appears as newness is not rather a return to traditional concepts theoretical premises and authorial practices Contributors to this volume propose to explore new openings and recent developments in anglophone literatures and cultural theories which engage with issues seen to be central in the construction of a postmodern paradigm but deal with them in ways that promise new openings or a new Zeitgeist

The Mirage of China Xin Liu, 2012 Today's world is one marked by the signs of digital capitalism and global capitalist expansion and China is increasingly being integrated into this global system of production and consumption As a result China's immediate material impact is now felt almost everywhere in the world however the significance and process of this integration is far from understood This study shows how the a priori categories of statistical reasoning came to be re-born and re-lived in the People's Republic as essential conditions for the possibility of a new mode of knowledge and governance From the ruins of the Maoist revolution China has risen through a mode of quantitative self-objectification As the author argues an epistemological rift has separated the Maoist years from the present age of the People's Republic which appears on the global stage as a mirage This study is an ethnographic investigation of concepts of the conceptual forces that have produced and been produced by two forms of knowledge life and governance As the author shows the world of China contrary to the common view is not the Chinese world it is a symptomatic moment of our world at the present time

Dictionary of Critical Realism Mervyn Hartwig, 2015-01-30 Dictionary of Critical Realism fulfils a vital gap in the literature Critical Realism is often criticised for being too opaque and deploying too much jargon thereby making the concepts inaccessible for a wider audience However as Hartwig puts it Just as the tools of the various skilled trades need to be precision engineered for specific interrelated functions so meta theory requires concepts honed for specific interrelated tasks it is impossible to think creatively at that level without them This Dictionary seeks to redress this problem to throw open the important contribution of Critical Realism to a wider audience for the first time by thoroughly explaining all the key concepts and key developments It includes 500 entries on these themes and has contributions from major players in field However this text does not stop there it goes further than simply elucidating the concepts and includes a number of essays which use the notions in important areas thereby demonstrating the appropriate use of the concepts in action to encourage their wider use This book will become a requisite reference tool for Critical Realist scholars and Philosophers and Social scientists alike will enjoy this vital introduction and explanatory text of the indispensable ideas contained within the dynamic and vibrant school of Critical Realism
